Editors and authors	XI	2.5.14.3	Diagnostic imaging techniques: radiographic, ultrasonographic, CT, and MRI examinations	24
Figure sources and credits	XII	2.5.14.4	Confocal scanning laser ophthalmoscopy (cSLO) and OCT	24
Abbreviations	XIII	2.6	Differential diagnosis	24
1	Introduction	2.6.1	Introduction	24
	<i>Frans C. Stades, Michael H. Boevé</i>	2.6.2	Epiphora without distinct blepharospasm	24
2	Clinical and differential diagnostic procedures	2.6.3	Blepharospastic/painful eye with sufficient or excessive tear production ...	24
	<i>Sylvia C. Djajadiningrat-Laanen</i>	2.6.4	Protrusion of the nictitating membrane with enophthalmos	25
2.1	Description of the patient	2.6.5	Exophthalmos	25
2.2	Patient history	2.6.6	The “red” eye	25
2.3	Animal handling, equipment, and instruments	2.6.7	The “blue-white” cornea	25
		2.6.8	The “pigmented” eye	25
2.3.1	Restraint and sedation	2.6.9	The “blind” eye	25
2.3.2	Materials and instruments	3	Therapeutics, diagnostics, and surgical principles for ophthalmic diseases	27
2.4	Assessment of visual function		<i>Frans C. Stades</i>	
2.5	Examination of the eye and its adnexa ..	3.1	Introduction	27
2.5.1	Head, skull, and orbital area	3.1.1	The conjunctival sac	28
2.5.2	Tear film and tear production	3.1.2	Subconjunctival	30
2.5.3	Ocular discharge	3.1.3	Retrobulbar	30
2.5.4	Eyelids (palpebrae)	3.1.4	Intraocular	30
2.5.5	Conjunctiva	3.1.5	General rules	31
2.5.6	Globe (bulbus oculi)	3.2	Ocular therapeutic and diagnostic agents	31
2.5.7	Sclera	3.2.1	Vasoconstrictors	31
2.5.8	Cornea	3.2.2	Antiallergic agents (generally replaced by glucocorticosteroids today)	32
2.5.9	Anterior and posterior chambers	3.2.3	Antiglaucoma agents	32
2.5.10	Pupil and iris	3.2.3.1	Moderating production of aqueous: carbonic anhydrase inhibitors	32
2.5.11	Lens	3.2.3.2	Osmotic agents	32
2.5.12	Vitreous	3.2.3.3	β-blocking agents	32
2.5.13	Fundus	3.2.3.4	Prostaglandin analogues	32
2.5.13.1	Morphology of the fundus	3.2.3.5	Sympathomimetics	32
2.5.14	Additional and specific examinations	3.2.3.6	Miotics. Improving drainage of aqueous ..	33
2.5.14.1	Chromatic pupillary light responses			
2.5.14.2	Electroretinography (ERG) and visual evoked potentials (VEPs)			

3.2.4	Mydriatics	33	4.4.2.2	Traumatic corneal edema	52
3.2.5	Antimicrobial agents	34	4.4.2.3	Hyphema	52
3.2.5.1	“Initial choice” antimicrobials/ disinfectants	34	4.4.2.4	Blunt trauma with deeper penetration	53
3.2.5.2	“Second choice” antimicrobials	34	4.5	Penetrating or perforating trauma	53
3.2.5.3	“Specific choice” antimicrobials	35	4.5.1	Lid lacerations and conjunctival sac wounds	54
3.2.5.4	Antimycotics	35	4.5.1.1	Lacerations of the lid margin including the lacrimal canaliculus	56
3.2.5.5	Virostatic drugs: DNA-synthesis inhibitors	35	4.5.1.2	Lacerations with loss of tissue	57
3.2.6	Glucocorticosteroids	36	4.5.2	Conjunctival lacerations	57
3.2.7	Administration	36	4.5.3	Corneal lacerations	57
3.2.7.1	Topical, into the conjunctival sac	36	4.5.3.1	General rules of treatment	57
3.2.7.2	Subconjunctival	36	4.5.3.2	Non-perforating corneal wounds	58
3.2.7.3	Oral	36	4.5.3.3	Perforating corneal defects	59
3.2.8	Non-steroidal anti-inflammatory drugs (NSAIDs)	37	5	Orbit and globe	63
3.2.9	Topical anesthetics	37		<i>Barbara Nell, Frans C. Stades</i>	
3.2.10	Vitamins, epithelializing agents, and neutral agents	38	5.1	Introduction	63
3.2.11	Eye wash solutions (Collyria)	38	5.2	Clinical presentation of orbital diseases	64
3.2.12	Other “drugs” for ocular use	38	5.2.1	Enophthalmos	65
3.2.12.1	Diagnostic agents	38	5.2.2	Exophthalmos	65
3.2.12.2	Mucolytic and discharge-dissolving agents	39	5.2.3	Luxation or proptosis of the globe or bulbus	66
3.2.12.3	Antihypertensive agents (in secondary retinopathy)	39	5.2.4	Strabismus	66
3.2.12.4	Other drugs for ophthalmic use	39	5.3	Causes of orbital diseases	66
3.2.13	Radiation	39	5.3.1	Atrophy of orbital/periorbital tissue	66
3.2.14	Protective devices	40	5.3.2	Sympathetic denervation/ Horner’s syndrome	67
3.3	Surgical options	40	5.3.3	Masticatory muscle myositis	68
3.3.1	Anesthesia	40	5.3.4	Orbital muscle myositis	68
3.3.2	Preparation of the surgical field	40	5.3.5	Other retrobulbar processes	68
3.3.3	Positioning on the operating table	40	5.3.6	Orbital fat prolapse/Prolapse of the Harderian gland	72
3.3.4	Draping	41	5.4	Clinical presentation and causes of bulbar diseases	72
3.3.5	Magnifying equipment	41	5.4.1	Anophthalmia, cyclopia, microphthalmia ..	72
3.3.6	Surgical equipment	41	5.4.2	Phthisis bulbi	73
3.3.7	Suture material	42	5.4.3	Macrophthalmos	73
3.3.8	Suturing	43	5.4.4	Buphthalmos/hydrophthalmos	73
3.3.9	Hemostasis	45	5.4.5	Endophthalmitis, panophthalmitis	74
3.3.10	Cryosurgery	45	5.4.6	Nystagmus	74
3.3.11	Laser techniques	45	5.5	Surgery of globe and orbit	74
4	Ocular emergencies	47	5.5.1	Enucleation of the globe or bulbus	74
	<i>Frans C. Stades</i>		5.5.1.1	Lateral subconjunctival approach	77
4.1	Introduction	47	5.5.1.2	Transpalpebral approach	77
4.2	Luxation or proptosis of the globe	47	5.5.2	Evisceratio bulbi	78
4.3	Chemical burns	51	5.5.3	Exenteratio orbitae	78
4.4	Blunt trauma	51	5.5.4	Orbitotomy	78
4.4.1	Orbital fractures	52			
4.4.2	Contusion of the globe	52			
4.4.2.1	Suffusion (hyposphagma)	52			

6	Lacrimal secretory and drainage systems	79			
	<i>Barbara Nell, Frans C. Stades</i>				
6.1	Introduction	79	7.9.1.2	Medial canthoplasty	113
6.2	Diseases of the lacrimal secretory system	82	7.9.2	Upper eyelid trichiasis/entropion	114
6.2.1	Quantitative tear film deficiencies		7.9.3	Caruncle trichiasis and trichiasis in other locations	118
	Keratoconjunctivitis sicca (KCS)	82	7.10	Injuries	118
6.2.2	Qualitative tear film deficiencies	85	7.11	Ptosis	118
6.2.3	(Sialo)dacryoadenitis	85	7.12	Lagophthalmos	118
6.2.4	Cysts and neoplasms	86	7.13	Blepharitis	118
6.2.5	Prolapse of the nictitating membrane gland and the Harderian gland	86	7.13.1	Non-specific blepharitis	118
6.3	Diseases of the nasolacrimal drainage system	86	7.13.2	Chronic blepharitis	118
6.3.1	Atresia, micropunctum, stenosis of the lacrimal puncta	86	7.13.3	Specific blepharitis	119
6.3.2	Atresia and secondary closure of the canaliculi	89	7.13.3.1	Chalazion/hordeolum	119
6.3.3	Dacryocystitis	89	7.13.3.2	Blepharitis adenomatosa (meibomianitis)	120
6.3.4	Lacerations and other reasons for obstruction	92	7.13.3.3	Juxtapalpebral defects/ granulomatous changes	120
6.3.5	Cysts and neoplasms	92	7.13.3.4	Eosinophilic granuloma	120
7	Eyelids	93	7.13.3.5	Blepharitis in birds	120
	<i>Frans C. Stades</i>		7.13.3.6	Blepharitis in horses	121
7.1	Introduction	93	7.14	Neoplasia of the eyelids	121
7.2	Ankyloblepharon	94	7.14.1	Sarcoids in horses	125
7.3	Palpebral aplasia	94	8	Conjunctiva and nictitating membrane	127
7.4	Dermoids/dysplasia of the lid	96		<i>Katrin Voelter, Michael H. Boevé</i>	
7.5	Distichiasis	96	8.1	Introduction	127
7.6	Entropion	99	8.2	Non-pigmented margin of the nictitating membrane	128
7.6.1	Entropion in sheep and horses	107	8.3	Dermoid	128
7.7	Ectropion and/or macroblepharon (oversized palpebral fissure)	108	8.4	Ectopic cilia	128
7.7.1	Shortening of the lower palpebral conjunctiva	109	8.5	Protrusion of the nictitating membrane	129
7.7.1.1	Basting the ventral palpebral conjunctiva	109	8.6	Cysts	129
7.7.1.2	V-Y method	109	8.7	Eversion/inversion of the nictitating membrane	130
7.7.2	Simple wedge resection	109	8.8	Prolapse of the gland of the nictitating membrane ("cherry eye")	132
7.7.3	Kuhnt-Szymanowski method	109	8.9	Subconjunctival hemorrhages	134
7.7.4	Kuhnt-Szymanowski method, Blaskovics modification	109	8.10	Conjunctivitis	134
7.7.5	Z-plasty/free transplants	109	8.10.1	Serous/catarrhal conjunctivitis	137
7.7.6	Total fissure shortening methods	109	8.10.2	Purulent conjunctivitis	138
7.8	Blepharophimosis	111	8.10.3	Follicular conjunctivitis	138
7.9	Trichiasis	111	8.10.4	Plasmacellular conjunctivitis of the nictitating membrane	139
7.9.1	Nasal fold trichiasis, medial entropion, macroblepharon, associated with shallow orbits	113	8.10.5	Papillary/nodular/granulomatous conjunctivitis	139
7.9.1.1	Removal of nasal folds	113	8.10.6	Neonatal conjunctivitis (ophthalmia neonatorum)	139
			8.10.7	Allergic conjunctivitis	140
			8.10.8	Lipogranulomatous conjunctivitis	140
			8.10.9	Infectious bovine/ovine keratoconjunctivitis (pink eye)	141
			8.11	Eosinophilic granuloma	141

8.12	Symblepharon	141	9.10	Scleral diseases	169
8.13	Conjunctival stricture in the rabbit	142	9.10.1	(Epi)scleritis	169
8.14	Neoplasia of the conjunctiva	144	9.10.2	Scleral neoplasia	171
9	Cornea and sclera	145	10	Intraocular pressure and glaucoma	173
	<i>Katrin Voelter, Michael H. Boevé</i>			<i>Michael H. Boevé</i>	
9.1	Corneal diseases and disorders	145	10.1	Introduction	173
9.1.1	Introduction	145	10.2	Glaucoma	174
9.1.2	Clinical signs	146	10.2.1	Classifications of glaucoma	176
9.1.3	Location of lesions and causes	148	10.2.1.1	Etiology	176
9.1.4	Regeneration	149	10.2.1.2	Stage of disease	176
9.1.5	Delayed epithelialization	150	10.2.1.3	Classification of primary glaucoma based on the appearance of the iridocorneal angle	176
9.2	Congenital corneal disorders	150	10.2.2	Clinical aspects of glaucoma	179
9.2.1	Microcornea	150	10.2.2.1	Clinical signs of glaucoma	179
9.2.2	Persistent pupillary membrane (PPM)	150	10.2.3	Primary glaucoma	181
9.2.3	Dermoid	151	10.2.3.1	Acute or insidious onset: Primary open-angle glaucoma (POAG)	181
9.3	Corneal trauma	151	10.2.4	Treatment	182
9.4	Inflammatory corneal disease/keratitis .	151	10.2.4.1	Medical treatment	182
9.4.1	Superficial keratitis (non-ulcerative)	151	10.2.4.2	Surgical treatment and photocoagulation	184
9.4.1.1	Chronic superficial keratitis/pannus (Überreiter's disease)	152	10.2.5	Secondary glaucoma	186
9.4.1.2	Eosinophilic keratitis	153	10.2.5.1	Secondary glaucoma associated with the lens or vitreous	186
9.4.1.3	Pigmentary keratopathy/pigmentary keratitis	153	10.2.5.2	Secondary glaucoma associated with uveal changes	187
9.4.2	Deep or interstitial keratitis/keratitis profunda (non-ulcerative)	154	10.2.5.3	Secondary glaucoma associated with hyperpigmentation, ocular (uveal) melanosis and melanocytic glaucoma	188
9.5	Corneal defects, erosions, and ulcers	154	10.2.5.4	Secondary glaucoma associated with trauma	188
9.5.1	Corneal defects	154	10.2.5.5	Secondary glaucoma associated with intraocular neoplasia	188
9.5.1.1	Spontaneous chronic corneal epithelial defect	155	10.2.5.6	Secondary glaucoma associated with medication	188
9.5.1.2	Punctate keratitis	158	10.2.5.7	Secondary glaucoma associated with intraocular surgery	188
9.5.1.3	Ulcerative corneal disorders	158	11	Uvea	189
9.5.1.4	Deep corneal ulcers	158		<i>Sylvia C. Djajadiningrat-Laanen</i>	
9.6	Corneal sequestrum	160	11.1	Introduction	189
9.7	Corneal perforation	164	11.1.1	Iris	189
9.8	Infectious corneal diseases	165	11.1.2	Ciliary body	190
9.8.1	(Herpetic) keratitis	165	11.1.3	Choroid	190
9.8.2	Infectious bovine/ovine keratoconjunctivitis	165	11.2	Persistent (epi)pupillary membrane	191
9.8.3	Mycotic corneal infections	166	11.3	Iris hypoplasia	193
9.8.4	Corneal abscess (horse)	166	11.4	Acorea	193
9.9	Degenerative/dystrophic corneal disorders	166	11.5	Heterochromia of the iris	194
9.9.1	Degenerative corneal disorders	166			
9.9.2	Corneal dystrophies	167			
9.9.2.1	Epithelial/stromal dystrophy	167			
9.9.2.2	Corneal macular dystrophy	168			
9.9.2.3	Endothelial dystrophy, endothelial decompensation	169			
9.9.3	Corneal inclusion cysts	169			

11.6	Blue iris/white coat	194	12.2	Developmental disorders of the lens and vitreous	213
11.6.1	Color dilution and ocular abnormalities ..	194	12.2.1	Aphakia/coloboma/spherophakia/microphakia/lenticonus/lentiglobus	213
11.6.2	Coat, iris color and deafness	194	12.2.2	Persistent hyaloid artery (PHA)	213
11.6.3	Partial oculocutaneous albinism	194	12.2.3	Persistent hyperplastic tunica vasculosa lentis (PHTVL)/persistent hyperplastic primary vitreous (PHPV)	213
11.7	Color changes in the iris	194	12.3	Cataract	215
11.8	Uveal cysts	194	12.3.1	Classification of cataracts	215
11.9	Hyphema	195	12.3.1.1	Type	215
11.9.1	Dysplastic vascular abnormalities	195	12.3.1.2	Degree of maturation	216
11.9.2	Trauma	195	12.3.1.3	Age of onset	216
11.9.3	Vascular wall injury	196	12.3.1.4	Localization	216
11.9.4	Systemic arterial hypertension	196	12.3.1.5	Etiology	217
11.9.5	Coagulation disorders	196	12.3.2	Treatment of cataract	218
11.9.6	Anterior uveitis	196	12.3.2.1	Considerations before cataract surgery ..	218
11.9.7	Neoplasms	196	12.3.2.2	Cataract surgery	219
11.10	Anterior uveitis	196	12.3.2.3	Preventive management of cataract in populations	222
11.10.1	Traumatic uveitis	199	12.4	Lens (sub)luxation	223
11.10.2	Metabolic uveitis	199	12.5	Vitreous degeneration	227
11.10.3	Infection-related uveitis	199	12.6	Vitreous floaters, asteroid hyalosis, and synchysis scintillans	227
11.10.3.1	Viral	199	12.6.1	Vitreous floaters	228
11.10.3.2	Bacterial	199	12.6.2	Asteroid hyalosis	228
11.10.3.3	<i>Ehrlichia</i> and <i>rickettsia</i>	200	12.6.3	Synchysis scintillans	228
11.10.3.4	Mycotic	200	12.7	Hemorrhages and/or exudates in the vitreous	228
11.10.3.5	Algae	200	12.7.1	Blood	228
11.10.3.6	Protozoal	200	12.7.2	Exudate	228
11.10.3.7	Nematodes	201	12.8	Retinal detachment and intraocular neoplasms	229
11.10.4	Immune-mediated uveitis	201	13	Fundus and optic nerve	231
11.10.4.1	Lens-induced uveitis	201		<i>Björn Ekesten</i>	
11.10.4.2	Uveodermatologic syndrome (UDS)	201	13.1	Introduction	231
11.10.4.3	Lupus erythematosus (LE)	202	13.1.1	Ontogenesis	231
11.10.5	Idiopathic uveitis	202	13.1.2	Retina	232
11.10.6	Pseudo-uveitis caused by neoplasia	202	13.1.3	Optic nerve head (ONH) and vascular supply	234
11.10.7	Equine recurrent uveitis	204	13.1.4	Postretinal pathways	236
