

Content

Symbols and abbreviations.....	XI
List of figures	XIV
List of tables	XVIII
1 Introduction	1
1.1 Motivation	1
1.2 Research objective and approach	2
2 Bioplastics, environmental impacts and circular economy	5
2.1 Bioplastics	5
2.1.1 Definition and categories	5
2.1.2 Types, market information and development	7
2.1.3 End-of-life options	10
2.1.4 Litter.....	16
2.1.5 European and global status quo of end-of-life options of (bio-)plastics.....	17
2.1.6 Potential in a circular economy.....	20
2.1.7 Downcycling, recycling und upcycling	21
2.2 Environmental impacts	23
2.2.1 Introduction to sustainability	23
2.2.2 Introduction to life cycle sustainability assessment.....	24
2.2.3 Introduction to life cycle assessment	25
2.2.4 Focus on bioplastics from life cycle assessment perspective	27
2.3 Circular economy	27
2.3.1 Introduction to circular economy and plastics	27
2.3.2 Definition of circular economy	28
2.3.3 Circularity indicators and sustainability	29
2.3.4 Transfer of circular economy to bioplastics.....	30
3 State of research on the environmental assessment of bioplastics and circular economy	31
3.1 Introduction to analysis and literature review	31
3.2 End-of-life options.....	31
3.3 Circularity indicator and circular economy	61
3.4 Circularity indicator versus life cycle assessment.....	71
4 Systematic approach for the environmental assessment of bioplastics in a circular economy ..	74
4.1 Introduction	74

4.2 The role of material quality and life cycle perspective	75
4.2.1 Assessment of different end-of-life options from one life cycle perspective	75
4.2.2 Assessment of material quality for recycling options.....	80
4.2.3 Assessment of different end-of-life options from a multiple life cycle perspective.....	87
4.3 Systematic approach to identify and select circular economy opportunities for bioplastics from an LCA perspective	93
4.3.1 Overview on approach steps	93
4.3.2 Step 1 - Identify bioplastic type specific end-of-life options for a circular economy ...	95
4.3.3 Step 2 - Assess environmental impact of the options (incl. collection and sorting).....	96
4.3.4 Step 3 - Assess avoided environmental impact (credits) of resulting products and/or co-products.....	98
4.3.5 Step 4 - Determine net environmental impact of end-of-life options	99
4.3.6 Step 5 - Estimate extended impact of multiple cycles	100
4.3.7 Step 6 - Analyse and select options with low environmental impact	101
4.3.8 Step 7 - Estimate saving potential in comparison to benchmark end-of-life option....	102
4.3.9 Step 8 - Estimate country-specific impacts.....	103
5 Exemplary applications	105
5.1 Measuring cup (PLA)	105
5.1.1 Product system	105
5.1.2 Application of systematic approach.....	105
5.1.3 Key findings.....	123
5.1.4 Assumptions and limitations.....	124
5.2 Bike bottle (Bio-PE)	126
5.2.1 Product system	126
5.2.2 Application of systematic approach.....	126
5.2.3 Key findings.....	143
5.2.4 Assumptions and bottlenecks.....	144
5.3 Discussion and limitations of the approach	145
5.4 Comparison and discussion of case studies and approach	146
6 Summary, current challenges and outlook	147
6.1 Summary	147
6.2 Current challenges	150
6.3 Outlook	151

6.3.1 Systematic approach 151

6.3.2 Vision for bioplastics in a circular economy 154

Publication bibliography 156

Annex 173

A.1 Multi-criteria analysis 173

 A.1.1 Environmental impact of end-of-life options of bioplastics 173

 A.1.2 Circularity indicators of (bio-)plastics 174

 A.1.3 Circularity indicator formulas 175

 A.1.4 LCIA data from literature review..... 181

A.2 Life cycle inventory data 184

 A.2.1 LCI data for 1t PLA end-of-life assessment for one life cycle 184

 A.2.2 LCI data for 1t PLA mechanical recycling (material quality) 190

 A.2.3 LCI data for 1t PLA end-of-life assessment for multiple life cycles 194

 A.2.4 LCI data for case study measuring cup (PLA)..... 196

 A.2.5 LCI data for case study bike bottle (Bio-PE)..... 202

A.3 Additional results 206

 A.3.1 LCIA of 1t PLA waste for different end-of-life options (one cycle) 206

 A.3.2 LCIA of 1t PLA waste for mechanical recycling (material quality)..... 207

 A.3.3 LCIA of 1t PLA waste for different end-of-life options (multiple cycles)..... 211

 A.3.4 LCIA of case study measuring cup (PLA)..... 216

 A.3.5 LCIA of case study bike bottle (Bio-PE) 218

A.4 Technical properties of bioplastics 220

 A.4.1 Technical properties for quality indicator mechanical recycling (PLA)..... 220

 A.4.2 Technical properties for quality indicator mechanical recycling (Bio-PE) 221

 A.4.3 Comparison of technical properties for quality indicator mechanical recycling (PLA)
 (0 cycles (virgin) with 3 cycles)..... 222
