Preface xxiii

1	Fabrication of Nanomaterials and Their Potential Advantage for Sustainable Agriculture	1
	<i>Arjun Kumar Mehara, Anuradha Kumari, Neeraj K. Verma, Prachi Marwaha, Abhishek Rai, Mayank Kumar Singh, and Ankit Kumar Singh</i>	
1.1	Introduction	1
1.1.1	Shortcomings of Conventional Agriculture	2
1.2	Fabrication Techniques for Nanomaterials	3
1.2.1	Top-down Approaches	3
1.2.1.1	Mechanical Milling or Ball Milling	4
1.2.1.2	Nanolithography	5
1.2.1.3	Laser Ablation Method	5
1.2.1.4	Thermal Decomposition	5
1.2.1.5	Sputtering Method	6
1.2.1.6	Arc-discharge Method	6
1.2.2	Bottom-up Approach	7
1.2.2.1	CVD Method	7
1.2.2.2	Sol–Gel Method	7
1.2.2.3	Spinning Method	7
1.2.2.4	Hydrothermal Method	8
1.3	Green Synthesis of Nanomaterials	8
1.3.1	Nanomaterial Synthesis Using Microorganism	8
1.3.2	Nanomaterial Synthesis Using Bacteria	9
1.3.3	Nanomaterial Synthesis Using Actinomycetes	9
1.3.4	Green Synthesis of NP Using Fungi	10
1.3.5	Nanomaterial Synthesis Using Plant Extract	10
1.4	Nanomaterials as Controlled Delivery System for Actives and Sustainable Agriculture	11
1.4.1	Carrier-based Nanomaterials	11

1.4.1.1	Nanopesticides	14
1.4.1.2	Nanofertilizers	15
1.4.1.3	Nanosensors	15
1.4.1.4	Stimuli-responsive Nanocarriers	15
1.4.2	Carrier-free Nanomaterials	20
1.4.2.1	Micronutrient NFs	21
1.4.2.2	Macronutrient NFs	22
1.4.2.3	Nano-biofertilizers	24
1.5	Challenges and Future Outlook	25
1.6	Conclusion	26
	Acknowledgments	26
	References	27

2 Effect of Nanocomposites on Sustainable Growth of Crop Plants and Productivity 47

Katina Chachei, Sonali Ranjan, Kirpa Ram, and Ram Sharan Singh

2.1	Introduction	47
2.2	Types of NCs and Its Uptake Through Roots and Leaves in Plants	49
2.2.1	Metal-based Polymer Composites	50
2.2.2	Carbon-based Polymer Composites	50
2.3	Application and Effects of NCs in Plant Development and Productivity	51
2.3.1	Positive Effects on the Application of NCs in Plant	52
2.3.1.1	NC-based Fertilizer	55
2.3.1.2	NC-based Pesticide: Fungicide, Bactericide, and Herbicide	57
2.3.1.3	Biochar-based NCs	59
2.3.1.4	NC-based Materials as Sensors	60
2.3.1.5	Biopolymer-based NCs	61
2.3.1.6	Chitosan-based NCs	62
2.4	Adverse Effects of NCs on Crop Productivity and Sustainability	64
2.5	Challenges and Future Prospects in Application of NCs on Crop Plants	67
2.6	Conclusion	68
	Acknowledgement	68
	Author Contribution	68
	References	68

3 Role of Nanofertilizers in Sustainable Growth of Crop Plants and Production 77

Aaradhya Pandey, Pragya Tiwari, and Eti Sharma

3.1	Introduction	77
3.2	NFs, Its Types, and Synthesis Methods	78
3.2.1	NF and Their Significance in Current Agriculture	80
3.2.2	Classification of NFs	83
3.2.2.1	Action-based NFs	83
3.2.2.2	Nutrient-based NFs	83
3.2.2.3	Consistency-based NFs	84
3.2.2.4	Nanocarrier-loaded NFs	84

3.2.2.5	Nano-biofertilizers	84
3.3	Mode of Action	84
3.3.1	Mechanism of Nutrient Release and Uptake by Plants	85
3.3.2	Increased Nutrition Uptake by Plants	87
3.3.3	Improved Water and Nutrient Retention in Soil	87
3.4	Contribution Toward Sustainable Agriculture	88
3.4.1	Enhanced Nutrient Retention Capacity	88
3.4.2	Biotic and Abiotic Stress Tolerance by Plants	88
3.4.3	Increase Microbial Activity	89
3.4.4	Lesser Environmental Pollution	89
3.5	Customization of NFs	90
3.5.1	Dosage Optimization	90
3.5.2	Method of NFs' Application	91
3.5.2.1	Foliar Spray	91
3.5.2.2	Nanopriming	91
3.5.2.3	Soil Treatment	92
3.6	NFs' Integration with Precision Agriculture	92
3.7	Ethical, Regulatory, and Safety Issues	93
3.8	Advantages and Limitations	95
3.8.1	Advantages of NFs	95
3.8.2	Limitation of NFs	96
3.9	Conclusion and Future Perspective	97
	References	97
4	Nanotechnology is an Emerging Tool for Stress Management in Crop Plants	105
	<i>Mohd Anas, Mohammad Umar, and Abdul Razzak</i>	
4.1	Introduction	105
4.2	Synthesis and Characterization of Nanomaterials	109
4.2.1	Bottom-up Method	109
4.2.2	Chemical Method	109
4.2.3	Biological Method	109
4.2.4	Top-down Method (Physical Approach)	110
4.3	Characterization of Nanomaterials	110
4.4	Applications of Nanotechnology in Managing Abiotic Stress	111
4.4.1	Drought Stress	111
4.4.2	Salt Stress	112
4.4.3	Thermal Stress	113
4.4.4	Toxic Metal Stress	115
4.4.5	Organic Pollutants Stress	116
4.4.6	Hypoxia and Anoxia Stresses	117
4.5	Environmental Implications: Case Studies and Recent Plant Research	118
4.5.1	NPs as Phyto regulators	119
4.5.2	NPs for Preserving Soil Integrity and Functionality	120
4.5.3	Utilizing Nanopesticides in Plant Defense	121

4.5.4	Antimicrobial Action of NPs	123
4.6	Conclusion and Future Perspectives	124
	References	125
5	Impacts of Nanomaterials on Soil Microbial Communities	135
	<i>Nisha Kumari, Abhishek Tiwari, Ingle Sagar Nandulal, Sai Parasar Das, Bhabani Prasad Mondal, Bipin Bihari, Pritam Ganguly, Chandini, and Randeep Kumar</i>	
5.1	Introduction	135
5.2	Types of Nanomaterials and Their Agricultural Applications	136
5.3	Soil Microbial Communities: Role in Agriculture	136
5.3.1	Composition and Functions	136
5.4	Effect of NPs on Microbial Diversity	137
5.4.1	Changes in Microbial Community Structure	138
5.4.2	Impacts of NMs on Microbial Function and Soil Health	138
5.5	Ecotoxicology of NPs on Soil Microbial Community	139
5.5.1	Effects of Zinc NPs	139
5.5.2	Effect of Titanium NPs	140
5.5.3	Effect of Ag-NPs	141
5.5.4	Effect of Iron NPs	142
5.5.5	Effect of Copper NPs	142
5.6	Assessment and Monitoring of NM Impacts	143
5.6.1	Long-term Effects on Soil Ecosystem Services	143
5.6.2	Potential Risks and Benefits	144
5.7	Mitigation Strategies and Future Directions	145
5.7.1	Approaches to Minimize Negative Impacts	145
5.8	Regulatory and Policy Considerations	147
5.9	Future Research Prospects and Knowledge Gaps	148
5.9.1	Method of Application of Nanofertilizers	148
5.9.2	Formation of Successful Execution Mechanisms	149
5.9.3	Assessing the Financial Possibility of Extensive Production	149
5.9.4	Significance of Nanofertilizers on Environment	149
5.10	Conclusion	149
	References	150
6	Silver Nanoparticles' Emerging Roles in Enhancing Crop Plant Growth and Yield	159
	<i>Anuradha Kumari, Anumanchi Sree Manogna, Prabhat Kumar, and Ilora Ghosh</i>	
6.1	Introduction	159
6.2	AgNPs: Synthesis and Characterization	161
6.2.1	Methods for Synthesizing AgNPs	161
6.2.1.1	Chemical Methods	162
6.2.1.2	Physical Methods	162
6.2.1.3	Biological Methods	162
6.2.2	Factors Influencing the Synthesis Process and NP Properties	163
6.2.2.1	Concentration of Silver Precursor	163

6.2.2.2	Reducing Agent Type and Concentration	163
6.2.2.3	Stabilizing Agents	163
6.2.2.4	pH of the Reaction Medium	163
6.2.2.5	Temperature	163
6.2.3	Characterization Techniques for Evaluating the Size, Shape, and Stability of AgNPs	163
6.2.3.1	UV-vis Spectroscopy	164
6.2.3.2	Transmission Electron Microscopy	164
6.2.3.3	Scanning Electron Microscopy	165
6.2.3.4	Dynamic Light Scattering	165
6.2.3.5	X-ray Diffraction	165
6.2.3.6	Fourier Transform Infrared Spectroscopy	165
6.2.3.7	Zeta-potential Analysis	165
6.3	Antimicrobial Properties of AgNPs	165
6.3.1	Mechanisms of Action of AgNPs Against Plant Pathogens	166
6.3.1.1	Disruption of Cell Membrane Integrity	166
6.3.1.2	Generation of ROS	166
6.3.1.3	Interaction With Biomolecules	166
6.3.1.4	Inhibition of Signal Transduction	166
6.3.1.5	Release of Silver Ions	167
6.3.2	Effects of AgNPs on Pathogen Growth Inhibition and Disease Suppression in Crops	167
6.3.2.1	Bacterial Pathogens	167
6.3.2.2	Fungal Pathogens	167
6.3.2.3	Viral Pathogens	167
6.3.3	Potential Applications of AgNPs as Antimicrobial Agents in Crop Protection	168
6.3.3.1	Seed Treatment	168
6.3.3.2	Foliar Sprays	168
6.3.3.3	Soil Amendments	168
6.3.3.4	Postharvest Treatments	168
6.4	Seed Treatment With AgNPs	168
6.4.1	Effects of AgNP Seed Treatment on Germination Rates and Seedling Vigor	169
6.4.2	Influence of AgNPs on Seedling Establishment and Early Growth Stages	170
6.4.3	Optimization of AgNPs' Application Methods for Seed Treatment	170
6.5	Nutrient Uptake and Transport Enhancement	170
6.5.1	Role of AgNPs in Improving Nutrient Absorption by Crop Plants	171
6.5.2	Mechanisms of AgNP-mediated Nutrient Uptake and Transport Within Plants	171
6.5.2.1	Direct Uptake by Roots	171
6.5.2.2	Translocation Through Xylem	171
6.5.2.3	Influence on Cellular Mechanisms	172
6.5.2.4	Oxidative Stress and Defense Mechanisms	172
6.5.2.5	Formation of New Pores	172
6.5.2.6	Influence of Ag ⁺ Ions	172

- 6.5.3 Effects of AgNPs on Nutrient Availability in Soil and Nutrient Utilization Efficiency by Plants 172
 - 6.5.3.1 AgNPs' Effects on Soil's Nutrient Availability 172
 - 6.5.3.2 Plant Nutrient Utilization Efficiency 172
- 6.6 Stress Tolerance Improvement 173
 - 6.6.1 Mechanisms of Stress Tolerance Enhancement 173
 - 6.6.1.1 ROS Management 173
 - 6.6.1.2 Methylglyoxal Detoxification 173
 - 6.6.1.3 Enhanced Nutrient Uptake 173
 - 6.6.1.4 Gene Expression Regulation 173
 - 6.6.1.5 Physiological Enhancements 174
 - 6.6.1.6 Hormonal Regulation 174
 - 6.6.2 Mitigation of Abiotic Stresses by AgNPs 174
 - 6.6.2.1 Drought Stress Mitigation 174
 - 6.6.2.2 Salinity Stress Alleviation 174
 - 6.6.2.3 Heavy Metal Stress Reduction 174
- 6.7 Promotion of Photosynthesis and Biomass Accumulation 175
 - 6.7.1 Mechanisms of AgNPs-mediated Photosynthesis Promotion 175
 - 6.7.1.1 Improved Chlorophyll Content 175
 - 6.7.1.2 Enhanced Photosynthetic Efficiency 175
 - 6.7.1.3 Increased Nutrient Uptake 175
 - 6.7.1.4 Impact on Stomatal Conductance 175
 - 6.7.2 Promotion of Biomass Accumulation 175
 - 6.7.2.1 Root Growth Promotion 175
 - 6.7.2.2 Shoot Growth Enhancement 176
 - 6.7.2.3 Stress Tolerance Improvement 176
 - 6.7.2.4 Influence of AgNP Treatment on Crop Yield 176
- 6.8 Root Development and Soil Interaction 176
 - 6.8.1 Promotion of Root Growth and Development by AgNPs 176
 - 6.8.2 Effects of AgNPs on Root Architecture, Root Surface Area, and Nutrient Uptake 177
 - 6.8.3 Interactions Between AgNPs and Soil Components Affecting Plant Growth 177
- 6.9 Sustainable Agriculture Applications 178
 - 6.9.1 Potential Benefits and Challenges of Integrating AgNPs Into Agricultural Practices 178
 - 6.9.1.1 Potential Benefits 178
 - 6.9.1.2 Challenges 179
 - 6.9.2 Considerations for the Safe and Responsible Use of AgNPs in Crop Production 179
- 6.10 Conclusion 180

8 Chitosan Nanoparticles as Nanosorbent for Potential Removal of Pollutant from the Soil 231

Abirami Geetha Natarajan, Kripa V, Jothi Ganesan M, and Philip Bernstein Saynik

8.1 Introduction 231
8.1.1 Background on Soil Remediation 231
8.1.1.1 Primary Causes of Soil Pollution 232
8.1.2 Need for Effective Remediation Techniques 233
8.2 Chitosan 234
8.2.1 Chemical Structure and Properties 234
8.2.1.1 Solubility 235
8.2.1.2 Viscosity 236
8.2.1.3 Thermal Properties 236
8.2.1.4 Biological Properties 236
8.2.1.5 Mechanical Properties 236
8.2.2 Synthesis and Modification 236
8.2.2.1 Chemical Method 237
8.2.2.2 Biological Method 237
8.2.3 Applications of Chitosan 238
8.3 Nanotechnology and Soil Remediation 239
8.3.1 Introduction to Nanotechnology 239
8.3.2 Types of Nano Adsorbents 240
8.3.2.1 Metallic Oxide Nanoparticles 241
8.3.2.2 Metallic Nanoparticles 241
8.3.2.3 Carbonaceous Nanoparticles 241
8.3.2.4 Other Nanoparticles 241
8.3.3 Benefits of Using Nano Adsorbent 241
8.3.3.1 High Surface Area 241
8.3.3.2 Enhanced Reactivity 241
8.3.3.3 Selectivity and Functionalization 242
8.3.3.4 Small Intraparticle Diffusion Distance 242
8.3.3.5 Versatility 242
8.3.3.6 Reduced Secondary Pollution 242
8.4 Chitosan Nano Adsorbent for Soil Remediation 242
8.4.1 Synthesis of Chitosan Nanoparticles 242
8.4.1.1 Ionic Gelation 242
8.4.1.2 Emulsification and Cross-linking 243
8.4.1.3 Emulsion Solvent Diffusion 243
8.4.1.4 Microemulsion 243
8.4.1.5 Reverse Micellization 243
8.4.1.6 Synthesis from Biocomposites 243
8.4.2 Functionalization of Chitosan Nanoparticles 244

8.4.2.1	Cross-linking	244
8.4.2.2	Grafting	244
8.4.2.3	Functional Group Addition	245
8.4.2.4	Electrostatic Interactions	245
8.4.2.5	Hydrogen Bonding	245
8.4.2.6	Hybrid Functionalization	245
8.5	Key Research Studies	245
8.5.1	Removal of Herbicides	246
8.5.1.1	Removal of Diquat	246
8.5.1.2	Removal of Atrazine	246
8.5.2	Pesticide Removal	247
8.5.3	Organic Pollution Degradation	247
8.5.3.1	Degradation of Trichloroethene	247
8.5.3.2	Oil Spill Remediation	248
8.5.4	Immobilization and Removal of Heavy Metals	248
8.5.4.1	Stabilization of Chromium in Soil	248
8.5.4.2	Decontamination of Cu^{2+} from Soil	248
8.5.4.3	Removal of Cd(II)	249
8.5.4.4	Uranium (VI) Sorption	249
8.6	Advantages and Limitations	250
8.7	Future Perspective and Research Directions	250
8.8	Conclusion	251

13 Role of Nanoparticles in Plant Disease Management 347

Umesh Kumar, Prince Kumar Singh, Parvati Madheshiya, and Indrajeet Kumar

- 13.1 Introduction 347
- 13.2 Types of NPs used in Plant Disease Management 348
- 13.3 Plant Disease Management Through NPs 351
 - 13.3.1 Inhibition of Biofilm Formation 352
 - 13.3.2 Cell Wall and Cell Membrane Destruction 352
 - 13.3.3 Interaction with Biomolecules 353
- 13.4 Emerging Strategies for Mitigating Plant Diseases via NPs 354
 - 13.4.1 Techniques to Better Seed Germination and Plant Development 355
 - 13.4.2 Advancements in Food Processing and Packaging Technologies 355
 - 13.4.3 Stress Tolerance as a Key to Optimizing Crop Productivity 356
 - 13.4.4 Nano-biofertilizers: Revolutionizing Soil Enhancement 356
 - 13.4.5 Next-generation Delivery Mechanisms for Fertilizers and Nutrients 357
 - 13.4.6 NP-based Approaches to Bacterial Disease Management 357
 - 13.4.7 Role of NPs in Managing Viral Infections 357
 - 13.4.8 Utilization of NPs for Managing Fungal Infections 361
 - 13.4.9 NP-based Platforms for Effective Insecticide Application 361
 - 13.4.10 Enhancing Crop Performance Through Genetic Improvement 362
 - 13.4.11 Harnessing Nanosensors for Smart Agricultural Practices 362
- 13.5 Mitigation Strategies for Addressing NP-related Risks 363
 - 13.5.1 Interaction of NPs with Cellular Surfaces 363

13.5.2 Innovative Solutions for Sustainable Practices 363
 13.5.3 Regulatory Strategies for Controlling NPs' Risks 364
 13.6 Conclusion and Future Prospects 364

14 Challenges and Risk Assessment of Nanomaterial-based Chemicals Used for Sustainable Agriculture 377

Ranjani Ravikumar, Jayavardhini M, Sai Sidharth A, Vikky Rajulapati, and Philip Bernstein Saynik

14.1 Introduction 377
 14.2 Nanofertilizers – Types 379
 14.2.1 Action-based Nanofertilizers 379
 14.2.2 Nutrient-based Nanofertilizers 381
 14.2.3 Consistency-based Nanofertilizers 382
 14.3 Risk Assessment 382
 14.4 Uncertainties 383
 14.5 Risk Management 384
 14.6 Regulations and Safety Measures 385
 14.6.1 United States 385
 14.6.2 United Kingdom 386
 14.6.3 Canada 386
 14.6.4 Europe 387
 14.6.5 Australia 388
 14.6.6 Switzerland 388
 14.6.7 Russia 388
 14.6.8 China 388
 14.6.9 South Korea 389
 14.6.10 India 389
 14.7 Ethical and Safety Concerns of Nanofertilizers and Nanopesticides 390
 14.8 Conclusion 391
