| II. Commentaries and Manuals | XIX |
| III. Journal Papers | XXIV |
| IV. Case notes | LV |
| V. Reports, Studies and Guidelines | LV |
| VI. Internet Sources | LXIII |

Table of Cases

| | |
|----------------------------------------|--------|
| I. U.S. Decisions | LXIX |
| II. European Court Decisions | LXXXIX |
| III. German Court Decisions | XCI |
| IV. Decisions from other jurisdictions | XCIX |

Table of Abbreviations

Gendering

| | |
|------------------------------------------------------------------------|-----------|
| Part I: Introduction | 1 |
| Chapter 1: Insights into medical device safety through comparative law | 2 |
| Chapter 2: Abstract | 6 |
| Chapter 3: Scope | 8 |
| Part II: Enhancing medical device safety | 13 |
| Chapter 1: Enhancing medical device safety by regulation | 19 |
| Chapter 2: Enhancing medical device safety by product liability law | 25 |
| Chapter 3: Interplay of medical device regulation and litigation | 34 |
| Chapter 4: Excursus: private lawmaking and voluntary standards | 42 |

Table of Contents

| | |
|----------------------------------------------------------------------------------|-----------|
| Part III: The law of the United States | 45 |
| Chapter 1: Regulation of medical devices | 45 |
| § 1: Definitions regarding medical devices | 47 |
| I. Definition of medical devices | 47 |
| A. Statutory definition of medical devices | 48 |
| B. Medical software and medical applications | 50 |
| C. Delimitation of medical devices to drugs and biologics | 52 |
| II. Combination products | 55 |
| § 2: Rationale and history of medical device regulation | 56 |
| § 3: Regulatory system | 62 |
| I. The FDA as a regulatory authority | 63 |
| II. Classification | 72 |
| A. Device classes | 73 |
| B. Classification process | 74 |
| III. Premarket oversight | 77 |
| A. Safety and effectiveness standard | 79 |
| B. Clinical evaluation | 80 |
| C. Market access for devices with substantial equivalence to a predicate | 83 |
| D. Market access to medical devices without a substantially equivalent predicate | 90 |
| IV. Postmarket oversight | 104 |
| A. Data gathering and exchange | 107 |
| 1. Surveillance and reporting duties of the manufacturer | 111 |
| 2. Data gathering and exchange by the FDA | 119 |
| B. Enforcement by the FDA | 121 |
| V. Summary | 123 |
| Chapter 2: U.S. product liability law concerning medical devices | 128 |
| § 1: History and policy of product liability | 129 |
| § 2: Medical devices as products | 135 |
| § 3: Strict product liability | 140 |
| I. Defect | 143 |
| A. Patient protection through substantive defectiveness requirements | 143 |

| | |
|-------------------------------------------------------------------------------|------------|
| 1. Design defect | 145 |
| 2. Manufacturing defect | 183 |
| 3. Failure to warn claim | 185 |
| 4. Interplay of design defects with appropriate warnings and instructions | 204 |
| B. Patient protection through presumptions | 207 |
| 1. The relation between safety and procedural legal instruments | 212 |
| 2. Presumptions supporting the injured consumer in establishing defectiveness | 213 |
| II. Causation | 242 |
| A. Substantive requirements | 243 |
| 1. Cause-in-fact and proximate cause | 243 |
| 2. General and specific causation in medical device cases | 249 |
| 3. Evaluation | 250 |
| B. Proof of causation | 251 |
| III. Damages | 253 |
| A. Compensatory damages | 255 |
| B. Punitive damages | 265 |
| 1. Substantive requirements of punitive damages | 272 |
| 2. Amount of punitive damages | 275 |
| 3. Regulatory compliance defense against punitive damages | 291 |
| IV. Defect-related defenses | 293 |
| A. Preemption | 294 |
| 1. The concept of preemption | 294 |
| 2. Preemption of medical device tort claims | 297 |
| B. The state-of-the-art defense | 307 |
| V. Summary | 314 |
| Part IV: German Law | 321 |
| Chapter 1: Regulation of medical devices | 322 |
| § 1: Definitions | 324 |
| I. Definition of medical devices | 324 |

Table of Contents

| | |
|-------------------------------------------------------------------|-----|
| A. Statutory definition of medical devices | 325 |
| B. Medical software and apps | 330 |
| C. Medical devices without an intended medical purpose | 333 |
| D. Delimitation of medical devices | 334 |
| II. Combination products | 341 |
| § 2: Rationale and history of regulation of medical devices | 343 |
| § 3: Regulatory system | 352 |
| I. Notified bodies as regulating body | 353 |
| A. Legal requirements | 355 |
| B. Appointment of the notified body | 363 |
| C. Monitoring and enforcement powers of the responsible authority | 371 |
| II. Classification | 377 |
| A. Device classes | 377 |
| B. Classification system | 380 |
| III. Premarket oversight | 386 |
| A. Safety and performance requirements | 390 |
| B. Clinical evaluation | 395 |
| C. Conformity assessment procedures | 404 |
| 1. Conformity assessment regarding Class I devices | 411 |
| 2. Conformity assessment regarding Class IIa devices | 417 |
| 3. Conformity assessment regarding Class IIb devices | 422 |
| 4. Conformity assessment regarding Class III devices | 432 |
| 5. Assessment | 434 |
| IV. Postmarket oversight | 444 |
| A. Data gathering and exchange | 445 |
| 1. Monitoring and reporting duties of the manufacturer | 447 |
| 2. Data gathering by the competent authority | 454 |
| 3. Monitoring by the notified body | 460 |
| B. Enforcement power | 463 |
| V. Summary | 467 |

| | |
|------------------------------------------------------------------------------------|-----|
| Chapter 2: German product liability law | 472 |
| § 1: History and policy of product liability law | 473 |
| § 2: Medical devices as products | 479 |
| I. Implants as products | 481 |
| II. Classification of stand-alone medical software as a product | 484 |
| § 3: Strict product liability | 491 |
| I. Defect | 497 |
| A. Substantive requirements | 499 |
| 1. Legitimate safety expectations | 501 |
| 2. Original defect types | 524 |
| 3. Part of a product series that has an unreasonably high failure rate | 529 |
| 4. Interplay of design defects or manufacturing defects and failure to warn claims | 556 |
| B. Procedural requirements | 557 |
| 1. Presumptions and theories regarding design and manufacturing defects | 559 |
| 2. Presumptions regarding failure to warn claims | 562 |
| II. Causation | 563 |
| A. Substantive requirements | 563 |
| B. Proof of causation | 567 |
| III. Damages | 572 |
| A. Compensatory damages | 577 |
| 1. Economic losses | 579 |
| 2. Non-economic damages | 586 |
| B. Punitive damages | 599 |
| IV. Defect-related defenses | 600 |
| A. Defect did not exist at the time when the product was put into circulation | 601 |
| B. Compliance with mandatory regulations | 603 |
| C. Development risk defense | 605 |
| V. Summary | 612 |

| | |
|-------------------------------------------------------------------------|------------|
| Part V: Comparison of U.S. and German law | 617 |
| Chapter 1: Medical device regulation | 619 |
| § 1: Body responsible for medical device oversight | 620 |
| § 2: Classification | 632 |
| I. Device classes | 632 |
| II. Classification process | 635 |
| § 3: Premarket regulation | 641 |
| I. Standard of review | 641 |
| II. Clinical evaluation | 643 |
| III. Premarket review processes | 647 |
| A. Review of Class I devices in Germany and the U.S. | 649 |
| B. Review of U.S. Class II devices and German Class IIa devices | 649 |
| C. Review of U.S. Class III devices and German Class IIb to III devices | 651 |
| D. Exceptions from the review process | 657 |
| § 4: Postmarket oversight | 661 |
| I. Data gathering and exchange | 661 |
| A. Surveillance and reporting duties of the manufacturer | 663 |
| B. Data gathering and exchange by the regulatory body | 668 |
| II. Enforcement | 670 |
| § 5: Summary and key takeaways | 672 |
| Chapter 2: Product liability law | 676 |
| § 1: Medical devices as products | 676 |
| § 2: Defect | 680 |
| I. Design defect | 685 |
| A. Predictability | 686 |
| B. Safety-relation | 691 |
| 1. Safety-relation and safety standard imposed by the design defect | 691 |
| 2. Interplay of design defect and medical device regulation | 697 |
| C. Achievable standard of safety | 699 |
| D. Proof | 701 |

Table of Contents

| | |
|----------------------------------------------------------------------------|------------|
| E. Analysis and summary | 705 |
| II. Manufacturing defect | 707 |
| III. Failure to warn claim | 708 |
| A. Addressee of the warning | 709 |
| B. Duty to warn | 713 |
| C. Adequacy of the warning | 717 |
| IV. Part of a product series that has an unreasonably high failure rate | 718 |
| V. Interplay of design defect and failure to warn claim | 721 |
| § 3: Causation | 721 |
| § 4: Damages | 724 |
| I. Compensatory damages | 724 |
| II. Punitive damages | 731 |
| § 5: Summary and key takeaways | 732 |
| Part VI: Prospects | 739 |
