Foreword — V

1 Introduction — 1

2 Survey — 8

- 2.1 Short Company History – Power Generation — 12
 - 2.1.1 BBC Aktiengesellschaft Brown Boveri & Cie., 1891–1988 — 14
 - 2.1.2 ABB Asea Brown Boveri Power Generation Ltd., 1988–2000 — 29
 - 2.1.3 ALSTOM Power Ltd., since 2000 — 33
- 2.2 Gas Turbine Types — 36
 - 2.2.1 Stationary Power Generation Gas Turbines — 36
 - 2.2.2 Gas/Steam Combined-Cycle Power Plants — 39
 - 2.2.3 Aero Propulsion Gas Turbines — 40
- 2.3 Technical Basics — 42
 - 2.3.1 Gas Turbine Thermodynamics — 42
 - 2.3.2 Gas Turbine Component Performance — 45
 - 2.3.3 Gas/Steam Combined-Cycle Power Plant — 47

3 Gas Turbine Forerunners — 49

- 3.1 Turbomachines and Turbochargers — 49
 - 3.1.1 Early Turbo- and Fluidmachines — 49
 - 3.1.1.1 Historic Compressors — 51
 - 3.1.1.2 Water Wheels — 54
 - 3.1.1.3 Steam Turbines — 57
 - 3.1.1.4 Turbocompressors — 59
 - 3.1.2 Turbocharger Development History — 60
- 3.2 Early Attempts with the Gas Turbine Principle — 75
- 3.3 The Holzwarth Gas Turbine — 83

4 The Path to the First Power Generation Gas Turbine, 1927–1945 — 88

- 4.1 Development Survey at BBC — 88
 - 4.1.1 Development Department and Business Environment — 89
 - 4.1.2 Prominent Engineers — 96
 - 4.1.2.1 Adolf Meyer (1880–1965) — 98
 - 4.1.2.2 Walter G. Noack (1881–1945) — 101
 - 4.1.2.3 Claude Seippel (1900–1986) — 105
 - 4.1.2.4 Hans Pfenninger (1903–1989) — 110
- 4.2 GT Key Component: Axial Flow Compressor — 112
 - 4.2.1 Early Ideas and Trials — 113
 - 4.2.2 First Axial Compressor Development Tests after 1926 — 116

4.2.3	The Degree of Reaction and Other Fluid Mechanic Research —	124
4.2.4	Successful Compressor Reference Projects Beginning 1932 —	139
4.2.4.1	The First Supersonic Wind Tunnel at ETH Zurich —	143
4.2.4.2	The Guidonia Wind Tunnel —	146
4.2.4.3	The AVA/LFM Wind Tunnel Projects —	149
4.2.4.4	The Mach 4 Wind Tunnel at LRBA Vernon, France, 1947 —	155
4.2.4.5	The Hypersonic Wind Tunnel for Kochel/Tullahoma 1943–1960 —	157
4.2.4.6	The von Kármán Team at BBC Baden CH, June 1945 —	168
4.2.5	Outlook: Further Compressor Development —	174
4.3	The Early BBC Gas Turbines —	181
4.3.1	VELOX Boiler —	181
4.3.1.1	Concept Settlement —	181
4.3.1.2	Multi-Purpose Velox Deliveries to UK, 1940 —	188
4.3.1.3	Blast Furnace Gas Extension of the Velox Principle —	191
4.3.1.4	Velox: The Final Stages —	193
4.3.2	Houdry Refinery Process —	194
4.3.2.1	BBC Equipment —	194
4.3.2.2	Transforming Crude Oil into 100 Octane Petrol —	198
4.3.2.3	Strategic Importance and Side Effects —	202
4.3.3	The World’s First Utility Gas Turbine Set at Neuchâtel (1939) —	206
4.3.3.1	A Consequential Engineering Harvest —	206
4.3.3.2	Certified by Stodola and at the ‘Landi 39’ —	209
4.3.3.3	After 62 Years in Service: An ASME Technical Landmark —	214
4.3.4	First BBC Power Generation Gas Turbines —	217
4.3.5	BBC Locomotive Gas Turbines —	223
4.3.5.1	Von Ohain’s ‘Tuttlingen Engine’ —	232
4.3.5.2	German Tank Gas Turbine Developments —	235
4.3.5.3	Separate Gas Generators for Large Transport Aircraft —	236
5	Gas Turbine Technology Development 1945–1988 —	239
5.1	Development Survey at BBC —	239
5.1.1	‘Die Muehen der Ebene’ —	239
5.1.2	A Rare Top-Down View of the BBC Gas Turbine Business (1978) —	250
5.1.3	Strategic Failures: The BST and Turbodyne Interlude —	257
5.1.4	Business Facts —	263
5.1.5	Early Plants and the Key Development Projects GT8/GT9/GT11/ GT13 —	265
5.1.5.1	BBC Gas Turbine Development Roadmap 1945–1988 —	265
5.1.5.2	Beznau and Other Tailor-Made Gas Turbines —	272
5.1.5.3	The Development of Ready-Made GT Families after 1970 —	278
5.1.5.4	GT Designs on the Brink – and Beyond —	306
5.1.6	Prominent Engineers —	316

5.1.6.1	Albert Eiermann (1924–2013) —	317
5.1.6.2	Wilhelm Endres (1927–2007) —	319
5.1.6.3	Franz Farkas (*1935) —	323
5.2	Competitive Designs and Developments —	324
5.2.1	Escher Wyss: The Closed Cycle AK Engine —	325
5.2.2	Sulzer: Gas Turbine with Semi-Closed Process —	329
5.2.3	Other Companies —	329
5.3	GT Key Component: Combustor —	337
5.3.1	Early Developments and Evolution of Combustor Arrangements —	339
5.3.2	First Generation Lean Dry, Low NO _x Technology —	346
5.3.3	Multi-injection Burner and GT8 Annular Combustor —	348
5.3.4	Second Generation EV Premix Burner Technology —	349
5.3.5	SEV Burner Development for GT24/GT26 Applications —	353
5.3.6	Further Low Emission Combustion Development —	358
5.4	BBC Gas Turbine Mechanical Design and Manufacturing —	360
5.4.1	General Gas Turbine Design Principles —	360
5.4.2	The Welded Rotor Design and Manufacturing —	362
5.4.3	Gas Turbine Manufacturing Sites and Network —	368
5.5	Gas Turbine Special Projects —	376
5.5.1	Mobile and Packaged Energy Stations —	377
5.5.2	Aero Jet Expander —	381
5.5.3	Compressed Air Energy Storage —	385
5.5.4	Low and Medium BTU Fuels (GT11N2-LBTU, GT13E2-MBTU) —	388
6	Combined Cycle Power Plants: GT Technology Breakthroughs since the 1990s —	393
6.1	Gas Turbine Development Survey —	393
6.1.1	The GT Technology and Business Environment in the 1990s —	394
6.1.2	The ABB/Alstom Development Department —	398
6.1.3	The Key Development Project GT24/GT26 —	401
6.1.3.1	Secret ‘Skunk Works’ 1991–1995 —	403
6.1.3.2	GT24/GT26 Design Stabilisation 1996–2002 —	413
6.1.3.3	GT24/GT26 Success Story since 2003 —	425
6.1.4	Prominent Engineers —	429
6.1.4.1	Fredy Haeusermann (1942–2016) —	430
6.1.4.2	Jakob J. Keller (1950–1999) —	431
6.1.4.3	Hans Koch (1929–2023) —	432
6.2	GT Key Component: Turbine —	434
6.2.1	Aerodynamic Turbine Development Milestones —	436
6.2.2	Turbine Cooling Technology —	448
6.2.2.1	Out of Time: Turbine Water and Film Cooling 1925–1945 —	448
6.2.2.2	Heavy-Duty GT Turbine Cooling Development after 1965 —	460

- 6.2.3 High Temperature Materials and Coatings — **467**
- 6.2.4 Tests at the Gas Turbine Power Plant Birr — **475**
- 6.3 The Combined Cycle Power Plants — **478**
 - 6.3.1 Historic Developments — **478**
 - 6.3.2 The Bright Presence of Combined-Cycle Power Generation — **483**
- 6.4 Gas Turbine Outlook — **490**
 - 6.4.1 Future Power Generation Market — **490**
 - 6.4.2 Innovative Gas Turbine Technologies — **491**

- 7 ‘Les Palmarès’ — 496**
 - 7.1 BBC–ABB–Alstom Historical Firsts in Gas Turbine Technology for Power Generation — **496**
 - 7.2 BBC–ABB–Alstom GT Development Directors (Baden, CH) — **498**
 - 7.3 The Members of the GT Development ‘Hall of Fame’ — **499**

Bibliography — 502

Index of Names — 523

Subject Index — 528

Nomenclature and Abbreviations — 535

The Author — 540
