

Table of Contents

List of FiguresXX

List of Tables..... XXIII

List of Abbreviations.....XXV

1 Introduction to Data-driven Solution Design in Complex Systems.....1

1.1 A Missing Model for Data-driven Solution Design enabling Autonomization.....4

1.1.1 State of Research in Architecture and Enterprise Modeling..... 6

1.1.2 Classification of identified Research Work 12

1.1.3 Derivation of the Research Gap..... 14

1.2 Goal and Research Question – A Model for Transparency across Layers18

1.3 Scope21

1.4 Structure23

2 A Conceptual Background Model for a View across Layers.....25

2.1 A Technological Conceptualization27

2.1.1 A Frame for Data-Driven Solution Design realizing Autonomization..... 27

2.1.2 Identification of Technological Capabilities..... 28

2.2 Data-Driven Solution Design32

2.2.1 Technology Abstractions 36

2.2.1.1 Internet of Things and Big Data..... 37

2.2.1.2 Distributed Systems and Distributed Ledger Technology..... 40

2.2.1.3 Deep Learning as a Field of Machine Learning 47

2.2.2 Architectural Modeling for Complexity Reduction..... 67

2.2.2.1 Architectural and Design Patterns on the System and Technology Layer 70

2.2.2.2 Conceptual Models for Solution Specification integrating the Data Layer ... 74

2.2.2.3 Ontologies for defining a Holistic Model..... 77

2.2.2.4 Comparison between Modeling Approaches enabling Solution Designs 81

2.3 Implementation of a Knowledge Graph-based Recommender System82

2.4 Interim Conclusion and preliminary Limitations87

3 Research Design91

3.1 Design Science Research.....92

3.2 Data Collection101

3.2.1 Literature Reviews..... 103

3.2.2 Case-Study Design and Expert Interviews 106

3.2.2.1 Experts Interviews for System Patterns Design 113

3.2.2.2 Healthcare 114

3.2.2.3 Risk Management..... 118

3.2.2.4 Mobility..... 122

3.2.2.5 Logistics 127

3.3 Data Analysis.....131

3.4 Design.....134

3.5 Evaluation.....143

3.6 Interim Conclusion149

4 Development of an Ontology for Data-driven Solution Design152

4.1 Design of a Conceptual Background Model based on Related Work154

4.2 Design of Requirements and Design Principles160

4.2.1 Domain-specific Requirements160

4.2.1.1 Healthcare161

4.2.1.2 Risk Management.....167

4.2.1.3 Mobility.....174

4.2.1.4 Logistics176

4.2.2 Synthesis to Generic Requirements over all Case Studies181

4.2.3 System, Generic, and Functional Design Principles.....188

4.2.3.1 System Design Principles.....188

4.2.3.2 Generic Functional Design Principles.....188

4.2.3.3 Functional Design Principles in Healthcare203

4.2.3.4 Functional Design Principles in Risk Management209

4.2.3.5 Functional Design Principles in Mobility215

4.2.3.6 Functional Design Principles for Autonomization in Logistics218

4.3 Ontology Development.....221

4.3.1 Requirement Dimensions for Autonomization based on the Logistics Case.....223

4.3.2 Architectural Patterns Matrix connecting the Business and System Layers.....228

4.3.2.1 Categories for Architectural Patterns230

4.3.2.2 Selection Criteria supporting the Selection of Patterns.....232

4.3.2.3 Presentation of an Architectural Patterns Matrix236

4.3.2.4 Application of Selection Criteria with Experts238

4.3.3 Conceptual Models241

4.3.3.1 Development of a Conceptual Model in Healthcare244

4.3.3.2 Development of a Conceptual Model in Risk Management263

4.3.3.3 Development of a Conceptual Model in Mobility.....276

4.3.4 Design of an Ontology integrating all Layers.....286

4.3.4.1 Design Elements.....289

4.3.4.2 Tools for Ontology and Knowledge Graph Development292

4.3.4.3 Development of the Ontology293

4.4 Interim Conclusion307

5 Evaluation by a Recommender System Implementation and Experts310

5.1 Evaluation Elements and Criteria313

5.2 Protégé Ontology Test for Technical Feasibility Evaluation317

5.3 Prototype Development and Competency Questions Answering.....319

5.4 Expert Interviews for Relevance Evaluation335

5.5 Interim Conclusion340

6 Discussion about Relevance, Rigor and Future Work343

6.1 An Ontology for Opportunity Alignment and creative Solution Design.....343

6.2 Limitations.....345

6.3 Contributions349

6.3.1 Academic Contributions 350

6.3.2 Practical Contributions 352

6.4 Future Work.....353
