Preface	ix
List of Authors	xi
List of Reviewers	xiii
Subject index	xv

Global and mesoscale modeling and data needs

Large-scale land–atmosphere models and data needs <i>P. R. Rowntree</i>	3
Mesoscale land–atmosphere models and usefulness of microwave remote-sensing data <i>J. Noilhan and J.-C. Calvet</i>	17
Snow cover and snow mass estimates from remote sensing, climatology and the United Kingdom Meteorological Office General Circulation Model <i>J. L. Foster, A. T. C. Chang, R. J. Gurney, F. Hewer and R. Essery</i>	55
Soil moisture estimation: comparisons between hydrologic model estimates and remotely sensed estimates <i>E. F. Wood, Dah-Syang Lin, P. A. Troch, M. Mancini and T. J. Jackson</i>	77

Synergism

Sensitivity of active and passive microwave sensors to land parameters <i>P. Pampaloni</i>	95
Theory of microwave scattering from vegetation based on the collective scattering effects of discrete scatterers <i>L. Tsang, J. A. Kong, Z. Chen, K. Pak and C. Hsu</i>	117
Synergism of optical and microwave observations for land surface studies <i>B. J. Choudhury</i>	155

Radiometry at infrared and microwave frequencies <i>T. Schmugge</i>	193
Synergism of active and passive microwave data for estimating bare soil surface moisture <i>S. S. Saatchi, E. G. Njoku and U. Wegmüller</i>	205
 Snow	
Intercomparison of snow retrieval algorithms by means of spaceborne microwave radiometry <i>H. Rott and T. Nagler</i>	227
Canadian development and use of snow cover information from passive microwave satellite data <i>B. E. Goodison and A. E. Walker</i>	245
Application of SSM/I data for snow cover and climate research <i>R. L. Armstrong</i>	263
Size parameters of snow grains in scattering and emission models <i>Y.-Q. Jin</i>	273
Monitoring snow cover on the Tibetan Plateau using passive microwave satellite data <i>D. A. Robinson and T. E. Spies</i>	285
Passive microwave remote sensing of snow: volume scattering in snow and parametric inversion of snow parameters with an artificial neural network <i>L. Tsang, D. T. Davis, R. West, Z. Chen, J.-N. Hwang and D. P. Winebrenner</i>	295
 Vegetation	
Vegetation models and observations A review <i>Y. H. Kerr and J.-P. Wigneron</i>	317
Progress in multi-frequency radiometry of natural objects <i>Ch. Mätzler and U. Wegmüller</i>	345
Microwave emission from vegetation <i>S. Paloscia</i>	357
Canopy opacity models <i>U. Wegmüller, C. Mätzler and E. Njoku</i>	375
Modeling microwave emission from vegetation-covered surfaces: a parametric analysis <i>P. Ferrazzoli and L. Guerriero</i>	389
Retrieval of geophysical parameters from multifrequency passive microwave measurements over a soybean canopy <i>J.-P. Wigneron</i>	403

Soil moisture

Passive microwave radiation from soil: examples of emission models and observations

J. R. Wang and B. J. Choudhury 423

Estimation of soil moisture profiles and root zone moisture content by means of microwave radiometry and *a priori* information

A. M. Shutko, E. A. Reutov and S. P. Golovachev 461

Soil moisture estimation from multifrequency microwave radiometer data based on statistical inversion technique

K. S. Rao, Y. S. Rao and G. Ijjas 475

Retrieval of soil moisture profile by combined remote sensing and modeling

D. Entekhabi, H. Nakamura and E. G. Njoku 485

Identification of snowcover using SSM/I measurements

N. C. Grody and A. Basist 499

Surface temperature

Surface temperature estimation over land using satellite microwave radiometry

E. G. Njoku 509

Evaporation monitoring over land surface using microwave radiometry

A. Chanzy and W. P. Kustas 531

A model for the radiobrightness of Northern Prairie

A. W. England, J. F. Galantowicz, Y. A. Liou, E. J. Kim and P. A. Dahl 551

Atmospheric correction and precipitation

Overland precipitation

E. C. Barrett and D. Kniveton 571

Theoretical foundations and verification of a multispectral, inversion-type microwave precipitation profile retrieval algorithm

E. A. Smith, A. Mugnai and G. Tripoli 599

Radiometric correction for atmospheric effects in surface sensing from aircraft and satellites

J. B. Snider, E. R. Westwater and L. S. Fedor 623

Instrumentation

The design of the ESA Multifrequency Imaging Microwave Radiometer (MIMR)

Y. Menard 637

Working group reports

ESA/NASA St. Lary workshop
11–15 January 1993

Working group reports 649

Working group A1: Snow

Chairmen: H. Rott and R. Armstrong

Rapporteur: B. Goodison 651

Working group A2: Vegetation and temperature

Chairman: P. Pampaloni

Rapporteur: E. Njoku 657

Working group A3: Soil moisture

Chairman: T. J. Jackson

Rapporteur: Y. H. Kerr 661

Working group A4: Atmospheric correction/precipitation

Chairman: E. A. Smith

Rapporteur: B. A. Burns 669

Working group B1: Modelling

Chairmen: P. Rowntree and M. Suarez

Rapporteur: D. Entekhabi 675

Working group B2: Synergism

Chairman: F. Becker

Rapporteur: T. Schmugge 679
