

Table of Contents

	Page
1 Area of Application.....	5
2 Terms	7
3 Selection Criteria	12
4 Specification of the Target Gas.....	15
5 Alarm Set Points	16
6 Monitoring Oxygen Deficiency and Excess Oxygen	17
7 Fixed Gas Detection Equipment.....	18
7.1 Design of Fixed Gas Detection Equipment.....	18
7.1.1 Increased Availability.....	18
7.1.2 Gas Sampling.....	19
7.1.3 Installation and Design Documents	21
7.2 Operation of Fixed Gas Detection Equipment.....	21
7.2.1 Initial Commissioning of the Fixed Gas Detection Equipment.....	21
7.2.2 Operating Instructions.....	22
7.2.3 Alarms and Status Indications.....	22
7.2.4 Measures in the Event of Non-Availability.....	23
7.3 Maintenance of Fixed Gas Detection Equipment	23
7.3.1 Checks of Fixed Gas Detection Equipment	24
7.3.2 Calibration and Adjustment.....	28
7.3.3 Specification of Check Intervals.....	29
7.3.4 Repair	31
7.3.5 Gas Detection Equipment with Automatic Self-Test Routines	32
8 Portable Gas Detection Equipment.....	33
8.1 Selection of Portable Gas Detection Equipment.....	33
8.1.1 Power Supply	34
8.1.2 Gas Sampling	34

Table of Contents

8.1.3 Design Documents35

8.2 Operation of Portable Gas Detection Equipment36

8.2.1 Initial Commissioning of the Portable Gas Detection Equipment36

8.2.2 Operating Instructions.....37

8.2.3 Qualification for the Use of Portable Gas Detection Equipment37

8.3 Maintenance of Portable Gas Detection Equipment38

8.3.1 Checks of the Portable Gas Detection Equipment38

8.3.2 Calibration and Adjustment.....41

8.3.3 Specification of Check Intervals.....44

8.3.4 Repair45

9 Transportable Gas Detection Equipment47

**10 Integration into Tests in Accordance with the Betriebssicherheitsverordnung
(BetrSichV – Ordinance on Industrial Safety and Health)48**

11 Requirements for Persons Being Charged with the Checks51

11.1 Trained Persons51

11.2 Qualified Personnel51

11.3 Competent Persons (Gas Detection Equipment) 52

11.4 Specialists53
