

Preface	IX	<i>Kevin Wolters, Georgios Christou, Markus Feldmann</i>	
Composite Construction in Steel and Concrete	X	Probabilistic design of composite girders considering the degradation of the shear connection and the redistribution of forces	99
CODIFICATION	1		
<i>Nicole Schmeckebier, Wolfgang Kurz</i>		<i>Trent Phillips, Gian Andrea Rassati, James Swanson, Nadia Baldassino, Riccardo Zandonini</i>	
Engineering model for the vertical shear capacity of composite slabs with additional reinforcing steel	3	Progressive collapse modeling of a steel structure with composite slab using commercial finite element software	111
<i>Stephen Hicks, Markus Schäfer, Graham Couchman</i>		COMPOSITE BRIDGES	123
European code developments	15		
<i>Roberto T. Leon</i>		<i>Wojciech Lorenc, Günter Seidl, Robert Kühne</i>	
Evolution of USA composite codes: Changes in chapter I (composite construction) of the AISC 360-22	27	Composite dowels for bridges: trends and challenges for new European design rules	125
<i>Stephen Hicks, Matthias Braun, Zlatko Markovic, James Way</i>		<i>Richard Stroetmann, Cäcilia Karge, Tobias Mansperger</i>	
New Eurocode 4 design rules for composite beams with precast concrete slabs	40	Development of an orthotropic composite slab system for road bridges	139
<i>Ioan Diacu</i>		<i>Luís Vieira, José Oliveira Pedro, Rodrigo Gonçalves, Dinar Camotim</i>	
Potentially unsafe structural consequences in the design of composite beams shear connectors (a look at some of the Eurocode 4-1-1 design backgrounds)	50	Effect of cross-section bracing in steel-concrete composite bridge decks using the generalized beam theory	149
COMPOSITE BEAMS	61	<i>Mike Tibolt, Dennis Rademacher, Oliver Hechler, Kevin Wolters, Nils Rittich, Stoyan Ivanov</i>	
<i>Roland Bärtschi, Samuel Garcia, Robert Kroyer, Pascal Sutter</i>		Integral sheet piling abutments of modular composite bridges for a time efficient construction	161
Deformation capacity and ductility of shear connectors	63	<i>Radosław Sęk, Bogusław Pilujski, Dariusz Sobala, Wojciech Lorenc</i>	
<i>Samiran Adhikari, Gian Andrea Rassati, James A. Swanson, Rachel A. Chicchi</i>		New type of composite arch element using composite dowels: application in railway network arch bridge	173
High-definition modelling of composite beams	75	<i>Piotr Koziół, Wojciech Lorenc, Maciej Kozuch, Witold Kosecki, Adam Stempniewicz</i>	
<i>Philipp Hauser, Wolfgang Kurz</i>		New type of transition zone for steel-concrete hybrid beams in bridges	182
Non-linear analysis of composite beams with minimal modelling and calculation effort for strain-limited design	87		

<i>Riccardo Zanon</i>		<i>Qingjie Zhang, Markus Schäfer</i>	
Use of high-strength steel for slender medium span bridges: two recent case studies in France	192	Innovative numerical approaches for strain limited design of composite beams	295
COMPOSITE COLUMNS	205	<i>Joshua Henneberg, Peter Schaumann</i>	
<i>Markus Schäfer, Qingjie Zhang, Pellumb Zogu, Marco Bergmann, Ozgun Ergun</i>		Numerical analysis of early age movement in grouted connections	307
Assessment of general method for composite column design in EN 1994-1-1 and comparison with simplified method	207	<i>Sina Kazemzadeh Azad, Brian Uy, Yifan Zhou, Yuchen Song, Jia Wang</i>	
<i>Ozgun Ergun, Markus Schäfer</i>		Performance and design of stainless-steel composite structures – beams, columns and joints	320
Comparison of geometrical imperfection definitions on encased composite columns	219	FATIGUE AND FRACTURE	333
<i>Przemyslaw Schurgacz, Martin Neuenschwander, Markus Knobloch</i>		<i>Lena Stempniewski, Ulrike Kuhlmann</i>	
Slender column strength of innovative concrete filled steel tube columns with high-performance building materials	231	Composite bridges with cracked concrete deck spanning between transverse beams under fatigue shear loading	335
<i>Mark Denavit</i>		<i>Maryam Hosseini, Olivia Mirza, Fidelis Mashiri</i>	
Variable stiffness reduction factor for stability design of steel-concrete composite columns	243	Fatigue analysis of composite beam with bolted shear connectors	347
COMPOSITE DECKS	255	<i>Martin Mensinger, Florian Oberhaidinger, Lukas Stimmelmayer</i>	
<i>Valentino Vigneri, Christoph Odenbreit, Markus Schäfer, Stephen Hicks, Dennis Lam, François Hanus</i>		Influence of hot dip galvanizing on the fatigue behaviour of T-studs for a grouted joint of integral composite frame bridges	354
Characterization of the load-slip behaviour of headed stud shear connections in narrow profiled sheeting	257	<i>Josef Karl Kraus, Karsten Geißler</i>	
<i>Leopold Sokol, Anna Palisson</i>		Studies of the fatigue stress and strength of large composite bridges with cantilevers and precast concrete elements	364
Sagging bending resistance of composite slabs in partial shear connection	270	FIRE BEHAVIOUR	373
COMPOSITE STRUCTURAL ELEMENTS	281	<i>Manuel Romero, Vicente Albero, Ana Espinos, Enrique Serra, Antonio Hospitaler, David Pons</i>	
<i>Dongxu Li, Brian Uy, Zhichao Huang, Mahbub Khan</i>		A novel strategy for slim-floor fire protection	375
Behaviour and design of high-performance steel and steel-concrete composite structures	283		

Pascal Lequime
Advanced numerical fire design of industrial composite slabs with unprotected steel beams – a case study 384

Hitesh Lakhani, Jan Hofmann
Concrete cone failure of post installed fasteners during fire 396

Oliver Beckmann, Michael Cyllok
Load transfer from hollowcore slabs to DELTABEAM® slim-floor beams in case of a Fire 404

Alexey Tretyakov, Ilia Tkalenko, Kamila Cábová, František Wald
Finite element analyses for European model of the steel and fibre reinforced concrete circular hollow section column in fire 416

Takeo Hirashima, Fuminobu Ozaki, Tor Yoshida, Kei Kimura, Junichi Suzuki
Membrane action of reinforced concrete slabs in fire 422

Kei Kimura, T. Hirashima, F. Ozaki, Tor Yoshida, Junichi Suzuki
Numerical analysis of load-bearing fire test for reinforced concrete slabs 434

INNOVATIVE STRUCTURES 447

Hau Tran, Huu-Tai Thai, Brian Uy, Tuan Ngo, Dongxu Li, Jun Mo
Advanced analysis of steel-concrete composite buildings 449

Jovan Fodor, Markus Schäfer
Experimental and numerical investigation of the friction based demountable shear connector 461

Huu-Tai Thai
Innovative composite structural systems for modular tall buildings 473

Riccardo Zanon, Dennis Rademacher, Günter Seidl, Daniel Pak
Integral bridge with RS-Overpass technology – step into the future standard highway overpasses 485

JOINTS 497

Nilde Maci, Jan Hofmann
Influence on the load-displacement behaviour of steel-to-concrete connections with post-installed adhesive anchors 499

Petr Cervenka, Jakub Dolejs
Steel FRC slab in compression in steel-concrete composite frame joints 510

Michael Petrasch, Jan Hofmann
Strengthening of anchor channels on the concrete surface 522

Maximilian Ziwes, Jakob Ruopp, Ulrike Kuhlmann
Studies on steel-to-concrete joints with concentrated loading conditions 534

PRACTICAL APPLICATIONS 547

Maciej Kozuch, Wojciech Lorenc, Błażej Bartoszek, Adam Stempniewicz, Henryk Windorpski, Michał Struczyński, Radosław Sęk, Wojciech Ochojski
Application of rolled sections in composite bridges with span over 50 m 549

Ulrich Breuninger, Jonas Landsberger
Design, calculation and construction work of a prestressed composite construction to support the facade columns of a high-rise building 561

Xuemei Li, Ashpica Chhabra, Han Ding
Kunming Tower: composite systems in supertall design 573

Stefano China, Aroldo Tego
NPS composite beams and columns used for the
Odense university hospital 585

SEISMIC BEHAVIOUR 597

*Nicholas E. Briggs, Raul E. Avellaneda- Ramirez, Kyle
Coleman, Benjamin W. Schafer, Matthew R. Eatherton,
W. Samuel Easterling, Jerome Hajjar*
Cyclic behavior of composite connections in compo-
site floor diaphragms 599

Yuko Shimada
Evaluation of the plastic deformation capacity of
composite beams through the connection
coefficient 611

Yixin Zhang, Yang Liu, Jie Ruan, Pinzhi Wang
Seismic performance of prefabricated core steel
tube reinforced concrete columns 621

J. Ann Albright, Alessio Argentoni, Paolo M. Calvi
Experimental investigation of interior and exterior
steel-concrete composite NPS beam-column
joints 632

*Luis B. Fargier-Gabaldon, Paul Cordova,
Gustavo Parra-Montesinos, Gregory Deierlein*
RCS moment frames in high seismic zones in the
United States 644

*Rafaela Don, Adrian Ciutina, Aurel Stratan,
Cristian Vulcu*
Slim-floor beam-to-column joints for seismic-resis-
tant structures: joint performance and case study
on MRFs 656

*Raul Avellaneda Ramirez, Matthew Eatherton,
W. Samuel Easterling, Benjamin Schafer, Jerome Hajjar*
Strength of concrete filled steel deck composite
diaphragms with reinforcing steel 668

SHEAR CONNECTIONS 679

Taygun Yolacan, Markus Schäfer
Determination of slip-factor between friction shims
and shot-blasted steel surfaces 681

*Yannick Broschart, Wolfgang Kurz, Kevin Wolters,
Georgios Christou, Markus Feldmann, Josef Hegger,
Martin Claßen*
Development of a consistent design concept for
composite dowels 693

Cäcilia Karge, Richard Stroetmann, Joachim Wisniewski
Experimental and numerical investigation of dowel
strips for longitudinal and transverse loading 705

*Valentino Vigneri, Robert Kroyer, Stefano China,
Alessio Argentoni, Andreas Taras*
Longitudinal shear transfer in composite steel truss
and concrete (CSTC) beams 717

*Angeliki Christoforidou, Florentia Kavoura,
Marko Pavlovic, Milan Veljkovic*
Mechanical performance of injected steel-reinforced
resin connectors under different confined conditions
for reusable composite structures 729
