Part I Fundamentals of Artificial Intelligence

1	What Is Meant by Artificial Intelligence and How Can It Be Used?	3
1.1	What Is the Core of Artificial Intelligence?	5
1.1.1	Manifestations of Intelligence	5
1.1.2	Nature and Abilities of Artificial Intelligence	7
1.1.3	Types of Learning	13
1.1.4	Generative AI	21
1.2	Summary	21
1.3	What Goals Can Be Achieved with Artificial Intelligence?	22
1.4	Summary	26
1.5	Fields of Application of Artificial Intelligence	26
1.5.1	Natural Language Processing (NLP): Processing of Natural Language	28
1.5.2	Natural Image Processing—Computer Vision: Image Processing	37
1.5.3	Expert Systems: Expert Systems	47
1.5.4	Robotics: Robots	49
1.5.5	Affective Computing: Emotional AI—Emotional Artificial Intelligence	57
1.6	Summary	60
1.7	Ethics and Fairness of Artificial Intelligence	60
1.7.1	Current State of Research on Ethics and Fairness of Artificial Intelligence	60
1.7.2	Intelligence Explosion, Superintelligence, and Transhumanism	67
1.7.3	Explainable Artificial Intelligence: Explainable Artificial Intelligence	71
1.7.4	Reduction of Noise as a Success Factor	76
1.8	Summary	77
1.9	Where Do Companies in Germany Stand in the Global AI Environment?	78
1.10	Summary	93

1.11	EU Legal Framework for the Use of AI.....	94
1.12	Summary	101
	References.....	102
2	Drivers of Artificial Intelligence	107
2.1	Moore's Law and the Effects of Exponentiality	108
2.2	Digitalization and Dematerialization of Products, Services, and Processes	109
2.3	Networking of Products, Services, Processes, Animals and People	112
2.4	Big Data	116
2.5	New Technologies	124
2.6	Necessity of Sustainable Corporate Governance.....	137
2.7	Summary	141
	References.....	141
 Part II Fields of Application of Artificial Intelligence		
3	Production, Maintenance, Mobility, Transport, Agriculture	145
3.1	Production and Maintenance Sector	145
3.1.1	Trend Towards Smart Factory	145
3.1.2	Networking as a Core Element of a Smart Factory	150
3.1.3	Technologies of Smart Manufacturing.....	153
3.1.4	SheIn: Smart Manufacturing as a Business Model	179
3.1.5	Overall Assessment of the Development Towards Smart Manufacturing	182
3.2	Summary	190
3.3	Mobility and Transport Sector.....	190
3.3.1	Automation of Mobility.....	190
3.3.2	Developments of Autonomous Vehicles	193
3.3.3	Innovative Logistics Solutions.....	197
3.3.4	Predictive Risk Intelligence.....	201
3.4	Summary	203
3.5	Agriculture.....	203
3.5.1	AI Applications in Agriculture.....	203
3.5.2	Status of AI Use in Agriculture	205
3.6	Summary	208
	References.....	208
4	Marketing, Sales, Customer Service	211
4.1	Customer-Company-Expectation Matrix as a Framework.....	211
4.2	Customer Service: From Simple Chatbot to Digital Assistant.....	213
4.2.1	Chatbots and Digital Assistants	213
4.2.2	Large Language Models: <i>ChatGPT</i>	226
4.2.3	Social Bots and Social Media Listening	237
4.2.4	From Avatar to Digital Human.....	240
4.3	Summary	241

4.4	Design of Voice Marketing	242
4.4.1	Corporate and Brand Language	244
4.4.2	Voice Branding.	245
4.4.3	Voice Search and Voice Engine Optimization	246
4.4.4	Voice Commerce	256
4.4.5	Voice Integration	262
4.4.6	Voice Controlling.	263
4.5	Summary	268
4.6	Voice Identification and Speech Analysis	268
4.7	Summary	274
4.8	With AI to Effective Language	274
4.8.1	System for Increasing Text Performance.	274
4.8.2	Solutions for AI-Supported Translation.	276
4.8.3	Concepts for AI-Supported Text Generation	277
4.9	Summary	280
4.10	Conversion of Text into Image and Video Content:	
	AI Creation of Music	281
4.10.1	AI-Supported Development of Images	281
4.10.2	AI-Supported Development of Videos.	285
4.10.3	AI-Supported Development of Music	288
4.11	Summary	291
4.12	AI-Supported Customer Acquisition and Advertising Design.	292
4.12.1	AI-Supported Customer Acquisition	292
4.12.2	AI-Supported Analysis of Advertising Messages	296
4.12.3	AI-Supported Advertising Planning.	297
4.12.4	AI Solutions for the Post-Cookie Era	298
4.13	Summary	300
4.14	Dynamic Pricing	301
4.15	Summary	303
4.16	Optimization of Product Development and Customer	
	Experience	303
4.17	Summary	305
4.18	Retail	305
4.19	Summary	311
4.20	Hotel and Hospitality Industry.	311
4.21	Summary	314
	References.	314
5	Health and Safety	319
5.1	Health Sector	319
5.1.1	Diagnosis and Medical Imaging	319
5.1.2	Precision Medicine and Personalized Therapy	323
5.1.3	Use of Robots in the Medical Sector.	324
5.1.4	Patient Monitoring and Early Detection	
	of Complications	326
5.1.5	Support in Drug Research	326

5.1.6	Improvement of Health Systems and Medical Administration	328
5.1.7	Bio-Hack and Self-Optimization	328
5.2	Summary	333
5.3	Security Sector—Social Scoring	333
5.3.1	AI Use in the Security Sector—Face and Object Recognition	333
5.3.2	Social Credit System in China	337
5.4	Summary	340
	References	341
6	Energy Sector and Smart Home	343
6.1	AI-Supported Applications in the Energy Sector	343
6.2	AI-Supported Solutions for Smart Homes	345
6.3	Summary	354
	References	355
7	Education and Knowledge Transfer	357
7.1	Challenges in the Education Sector	357
7.2	Development of Adaptive Learning Systems—Incl. Automated Evaluation	358
7.3	Ai-Based Administration and Student Support	362
7.4	Development of Immersive Learning Environments—VR and AR Solutions	363
7.5	Summary	366
	References	366
8	Human Resource Management (HRM)	367
8.1	Strategic HR Planning	368
8.2	AI-Supported Recruitment	369
8.3	Capture and Analysis of Resumes	375
8.4	Matching of Candidates and Job Requirements	377
8.5	Onboarding New Employees	378
8.6	Talent Management—Training and Development	379
8.7	Performance Management	381
8.8	Incentivization	383
8.9	Employee Retention Management	383
8.10	Status of the Use of (AI-Based) HR Technologies in Germany	384
8.11	Summary	389
	References	389
9	Financial Services Sector	391
9.1	Wealth Management—Asset Management—Robo Advisor	392
9.2	High-Frequency Trading	393
9.3	Fraud Detection and Fraud Prevention	394

9.4	AI-Supported Process Automation in the Financial Sector	396
9.5	Summary	398
	References.	399
10	Military Sector	401
10.1	AI Application Areas in the Military Sector	401
10.2	Autonomous Weapon Systems.	402
10.3	Summary	405
	References.	406
11	Metaverse.	407
11.1	Characterization of the Metaverse	407
11.2	Interesting AI Applications in the Metaverse.	409
11.3	Will the Metaverse Become a Success Story?	412
11.4	Summary	414
	References.	414
 Part III AI Challenge – How to Anchor Artificial Intelligence in the Company		
12	Developing an AI Journey in your Own Company	417
12.1	Phase Concept for the Company’s Own AI Journey	417
12.2	Analysis of the Status Quo.	419
12.2.1	Analysis of the Impact of Artificial Intelligence on Competitive Dynamics	420
12.2.2	3-Horizon Model	421
12.2.3	AI Maturity Map	423
12.3	Building AI Basics.	428
12.3.1	Building Comprehensive in-House AI Competence	428
12.3.2	Development of Goals and Strategies for AI Use	429
12.3.3	Development of AI Governance.	432
12.4	Optimize Processes and Realign	434
12.4.1	Identification of Exciting Use Cases	434
12.4.2	Access to AI Solution Modules	438
12.4.3	Funding Programs for AI Applications	444
12.5	Enrichment of Products and Services through AI: Product and Service Innovations—Embedding AI in the Business Model	445
12.6	Accompanying Change Management	445
12.7	Controlling the AI Journey.	446
12.8	Summary	449
	References.	450
13	Outlook.	453
13.1	Summary	457
	References.	457

14	Data, Law and Responsibility—Legal Challenges in the Use of Artificial Intelligence	459
14.1	The Ambivalence of Artificial Intelligence and the Role of Law	459
14.2	Artificial Intelligence and Law: Concept, Definition, Legal Questions	460
14.2.1	Concept and Definition	460
14.2.2	Legal Questions Regarding the Use of AI	460
14.3	Tsunami of the Information Society	461
14.3.1	Copyright	461
14.3.2	Related Rights	462
14.3.3	Obligation to Label	463
14.4	Generative Artificial Intelligence: Regulation Is at a Crossroads	463
14.5	Protection of Personal Data: High Requirements for Automated Decision-Making Systems	464
14.6	Reactions from GDPR Legislators and Business	465
14.7	Red Flags in Handling AI Tools	465
14.8	Outlook	466
	References	467
	Index	469
