

Grigore Gogu

Structural Synthesis of Parallel Robots

Part 2: Translational Topologies with Two
and Three Degrees of Freedom

Contents

Preface	vii
Acknowledgements	xiii
List of abbreviations and notations.....	xv
1 Introduction.....	1
1.1 Terminology	1
1.2 Methodology of structural synthesis.....	7
1.2.1 New formulae for mobility, connectivity, redundancy and overconstraint of parallel robots	8
1.2.2 Evolutionary morphology approach	13
1.2.3 Types of parallel robots with respect to motion coupling	14
1.3 Translational parallel robots	15
2 Translational parallel robots with two degrees of freedom	23
2.1 <i>T2</i> -type translational parallel robots with coupled motions.....	23
2.1.1 Overconstrained solutions	23
2.1.2 Non overconstrained solutions	54
2.2 <i>T2</i> -type translational parallel robots with decoupled motions	66
2.2.1 Overconstrained solutions	66
2.2.2 Non overconstrained solutions	78
2.3 <i>T2</i> -type translational parallel robots with uncoupled motions.....	85
2.3.1 Overconstrained solutions	86
2.3.2 Non overconstrained solutions	89
2.4 Maximally regular <i>T2</i> -type translational parallel robots	93
2.4.1 Overconstrained solutions	93
2.4.2 Non overconstrained solutions	95
2.5 Other <i>T2</i> -type translational parallel robots	97
2.5.1 Overconstrained solutions	98
2.5.2 Non overconstrained solutions	105
3 Overconstrained <i>T3</i>-type TPMs with coupled motions	107
3.1 Basic solutions with linear actuators	108
3.2 Derived solutions with linear actuators	138

3.3 Basic solutions with rotating actuators	194
3.4 Derived solutions with rotating actuators	266
4 Non overconstrained <i>T3</i>-type TPMs with coupled motions	365
4.1 Basic solutions with linear actuators	365
4.2 Derived solutions with linear actuators	375
4.3 Basic solutions with rotating actuators	401
4.4 Derived solutions with rotating actuators	412
5 Overconstrained <i>T3</i>-type TPMs with uncoupled motions	471
5.1 Basic solutions with rotating actuators	471
5.2 Derived solutions with rotating actuators	537
6 Non overconstrained <i>T3</i>-type TPMs with uncoupled motions.....	615
6.1 Basic solutions with rotating actuators	615
6.2 Derived solutions with rotating actuators	621
7 Maximally regular <i>T3</i>-type translational parallel robots.....	687
7.1 Overconstrained solutions	687
7.1.1 Basic solutions with no idle mobilities.....	687
7.1.2 Derived solutions with idle mobilities.....	706
7.2 Non overconstrained solutions	731
References.....	749
