

Contents

1	Error Theories; Analysis, Change and Development of Organizational Culture, Artificial Intelligence	1
1.1	Error	1
1.2	Safety and Security	2
1.3	Errors and Critical Incidents	5
1.4	Human Error	8
1.5	Error Types and Generic Error Modelling System	10
1.6	Knowingly Violating the Rules or Gross Negligence	14
1.7	Four Levels of Culpability (Mens Rea)	15
1.8	Person-Related Error Approach	17
1.9	System-Related Error Approach	17
1.10	Active and Latent Errors	18
1.11	The Swiss-Cheese Model	19
1.12	Human Factors	20
1.13	Dirty Dozen	20
1.14	SHELL-Model	21
1.15	Schein's 3-Level Model	29
1.16	Competing Values Framework (CVF)	30
1.16.1	The hierarchical organizational culture	32
1.16.2	The Market Culture	33
1.16.3	The Clan Culture	33
1.16.4	Adhocracy Culture	33

1.17	Nine Dimensions of Organizational Culture and Concept of Reconciling Corporate Culture	34
1.18	Safety Culture	37
1.19	Safety Climate	41
1.20	High Reliability Organizations (HROs).	42
1.21	Error Management	44
1.22	Error Culture and Error Management Culture	47
1.23	The Mindful Organizing Scale (MOS)	49
1.24	Active Shaping of Error Culture	52
1.25	Prosocial Motivation and Emotional Ambivalence	53
1.26	Risk Management Systems	54
1.26.1	ISO Standard 31000:2018	55
1.26.2	COSO ERM Integrated Framework	59
1.26.3	Key Weaknesses of Risk Management Systems	61
1.27	AI in Promoting Error Culture and Error Management	62
1.28	Organization and Management of the Information Process in Business Management	66
1.28.1	Integration of Technology Assessment Frameworks in Corporate Strategies	66
1.28.2	Feedback Mechanisms and Stakeholder Engagement	68
1.28.3	AI in Strategic Decision-Making	68
1.28.4	Implementing AI for Error Minimization	70
1.28.5	AI Technology and Corporate Social Responsibility	71
1.28.6	Anticipatory Governance	71
1.28.7	Global Information Governance	71
1.29	Conclusion	72
2	Development and Application of an Integrated Audit Approach to Identify the Weaknesses of the Risk Management Systems ISO 31000 and COSO ERM Framework in Capturing the Error Culture, Which has the Potential for Operationalization through AI	75
2.1	Methodology for Literature Research on Error Management in HROs and AI Transformation of MOS	75
2.2	Methodology for Comparing ISO 31000 and COSO ERM Frameworks	76

2.2.1	Criteria	76
2.2.1.1	Competing value framework	77
2.2.1.2	MOS Items	77
2.2.1.3	GEMS Criteria	78
2.2.1.4	SHELL criteria	79
2.2.1.5	Dirty Dozen	81
2.2.2	Matrix and Scale	82
3	Comparison of the Risk Management Systems ISO 31000:2018 and COSO ERM Framework with regard to their Ability to Capture the Error Culture	85
3.1	Competing Value Framework (CVF)	85
3.2	MOS Criteria	88
3.2.1	MOS: Deal with Failure	88
3.2.2	MOS: Questioning Simplistic Interpretations	94
3.2.3	MOS: Sensitivity to Operational Processes	99
3.2.4	MOS: Striving for Resilience	106
3.2.5	MOS: Pay Attention to Subject Matter Expertise	112
3.3	The GEMS Model Criteria	119
3.3.1	Skill-based Errors (Slips and Oversights)	119
3.3.2	Rule-based Errors (Errors of Confusion and Recognition)	125
3.3.3	Knowledge-based Errors (Errors of Reasoning and Judgment)	131
3.4	SHELL-criteria	137
3.4.1	Software	137
3.4.2	Hardware	142
3.4.3	Environment	146
3.4.4	Liveware	155
3.4.5	Liveware-Liveware Interface	160
4	Interpretation of Results: Evaluating ISO 31000:2018 and COSO ERM Frameworks in Capturing Error Culture and Potential Improvement through AI Solutions using a Holistic Approach with MOS	171
4.1	Adaptability and Response to Failures	171
4.2	Handling of Operational Sensitivities	171
4.3	Management of Human Error	172

4.4	Technological Aspects of Risk Management	172
4.5	Leadership and Communication in Risk Management	172
5	Conclusion and Recommendations	173
	Bibliography	177
