

Preface **V**

The Authors **IX**

The Editors IX

The Contributors. XII

1 Introduction **1**
Peter Frenkel, Richard Krock, Michael Schiller

2 Vinyl Chloride Monomer **13**
Joseph A. Cowfer, Arjen Sevenster, Richard Krock

2.1 Overview 13

2.2 Introduction 14

2.3 Physical Properties 15

2.4 Reactions 16

2.4.1 Polymerization 16

2.4.2 Substitution at the Carbon–Chlorine Bond 16

2.4.3 Oxidation 18

2.4.4 Addition 19

2.4.5 Photochemistry 20

2.4.6 Pyrolysis 21

2.5 Manufacture 22

2.5.1 Direct Chlorination of Ethylene 24

2.5.2 Oxychlorination of Ethylene 26

2.6	Purification of Ethylene Dichloride for Pyrolysis	29
2.7	Ethylene Dichloride Pyrolysis to Vinyl Chloride	30
2.8	By-Product Disposal	32
2.9	Economic Aspects	33
2.10	Health and Environmental Considerations	34
2.11	Technology Trends	39
2.12	Specifications	43
2.13	Health and Safety Factors	44
2.14	Uses	46
3	Polymerization	55
	<i>Donald E. Witenhafer, David J. Poledna, Peter Frenkel, Allan Matyger, Allen Bodron</i>	
3.1	Organic Peroxide Initiators for PVC Polymerization	56
3.1.1	Polymerization with the Use of Organic Peroxides	56
3.1.2	Safety Considerations	57
3.1.3	Main Characteristics for Selecting Organic Peroxides	58
3.1.4	Commercially Available Organic Peroxide Initiators for PVC Polymerization	59
3.1.5	Emulsified Organic Peroxide Initiators for PVC Polymerization ..	60
3.1.6	Selecting Organic Peroxide Initiators for PVC Polymerization....	61
3.1.7	Modifying the Reactivity of Organic Peroxide Initiators	62
3.2	PVC Polymerization: Basic Considerations	64
3.3	Suspension Process Overview	68
3.3.1	Polymerization	69
3.3.2	Stripping	73
3.3.3	Centrifugation	74
3.3.4	Drying and Screening	74
3.4	Mass Process Overview	75
3.5	Special Considerations	78
3.5.1	Polymerization Kinetics	78
3.5.2	Resin Particle Structure and Formation	79
3.5.3	Agitation and Dispersants	82
3.5.4	Vinyl Chloride Recovery	83
3.5.5	Increasing Reactor Productivity	84

3.5.6	Chain Defects and Heat Stability	86
3.5.7	Molecular Weight Extension	88
3.5.8	Copolymerization.....	88
3.6	Summary.....	89
3.7	Microsuspension and Emulsion Polymerization.....	90
3.7.1	Microsuspension Polymerization of Vinyl Chloride Compared with Emulsion and Suspension Polymerization	91
3.7.2	Procedure and Variations	91
3.7.3	Emulsion Polymerization of Vinyl Chloride Compared with Microsuspension and Suspension PVC Polymerization	92
3.8	Procedure for Batch Polymerization	93
3.9	Other Considerations for Microsuspension and Emulsion Polymerization of PVC.....	94
3.9.1	Surfactant System	94
3.9.2	Initiation of Polymerization	94
3.9.3	Water.....	94
3.9.4	Copolymers	95
3.10	Primary Particle Size Microsuspension.....	95
3.10.1	Primary Particle Size Emulsion	96
3.11	Molecular Weight	97
3.12	Polymerization Equipment Operation.....	98
3.12.1	Homogenizers.....	98
3.12.2	Reaction Vessels	98
3.12.3	Agitation.....	99
3.12.4	Heat Removal	100
3.13	Downstream Equipment.....	101
3.13.1	Residual Vinyl Chloride Removal (Stripping)	101
3.13.2	Concentrating	102
3.13.3	Drying.....	103
3.13.4	Grinding.....	104
3.13.5	Packaging.....	105
3.14	Product Quality	105
3.15	Safety and Environment	105

4	Stabilizers and Lubricants for PVC and CPVC	109
	<i>Gianluca Sarti, Peter Frenkel, Yashodhan Kanade, Michael Schiller</i>	
4.1	Introduction	109
4.2	PVC Degradation, Decomposition and Stabilization	110
4.2.1	PVC Thermal Degradation	110
4.2.2	PVC Thermal Decomposition	120
4.2.2.1	Introduction	120
4.2.2.2	The First Stage of Thermal Decomposition	121
4.2.2.3	The Second Stage of Thermal Decomposition	122
4.2.3	General Stabilization of PVC	122
4.3	Calcium Organic Stabilizers (COSs)	125
4.3.1	Introduction	125
4.3.2	Calcium Zinc Stabilizers (CZSS)	125
4.3.3	Organic Stabilizers	139
4.3.4	Application Areas of COSs	140
4.3.5	Liquid Mixed Metal Stabilizers (LMMSs)	141
4.4	Organotin Stabilizers	143
4.4.1	Chemical Groups and General Characteristics	143
4.4.2	History of Organotin Stabilizers [122]	144
4.4.3	Alkyltin Carboxylates	145
4.4.4	Alkyltin Mercaptoacid Esters	147
4.4.5	Alkyltin Mercaptoalcohol Esters	150
4.4.6	Alkyltin Mercaptides	151
4.4.7	Dialkyltin Cyclo-Mercaptocarboxylates	152
4.4.8	Estertins	153
4.4.9	Additional Components Used in Combination with Alkyltin Heat Stabilizers	155
4.4.10	Lubrication of Organotin Stabilizers [122]	156
4.4.11	Hazard Classification of Dialkyltin Bis(2-ethylhexyl Thioglycolates)	157
4.4.12	Stabilizing PVC with Alkyltin (2-Ethylhexyl Thioglycolates) and the Universal Mechanism of PVC Stabilization	159
4.5	Lead Stabilizers	162
4.6	Rare-Earth Stabilizers [163]	165
4.7	Lubricants for PVC	166

4.7.1	Introduction	166
4.7.2	Nature of Lubricants.....	167
4.7.2.1	Partially Soluble Lubricant Structure	167
4.7.2.2	Effect of Molecular Structure on Lubricant Performance [168]	168
4.7.3	Classification of Lubricants.....	169
4.7.3.1	External and Internal Lubricants.....	169
4.7.3.2	Various Aspects of Lubricants	170
4.7.3.3	Classification on the Basis of Saturation Aspect	171
4.7.3.4	Classification on the Basis of Interaction Parameter (IP)	172
4.7.3.5	Classification on the Basis of the Hildebrand Solubility Parameter (HSP).....	172
4.7.3.6	Lacuna in the Traditional Classification of Lubricants .	175
4.7.3.7	Modern Classification of Lubricants on the Basis of Polarity [176]	176
4.7.4	Interaction of Lubricants with PVC during Processing.....	176
4.7.4.1	Particulate Structure of PVC from the Perspective of Lubricants	177
4.7.4.2	Mechanism of Fusion and the Lubricant's Role	177
4.7.4.3	Mechanism of Film-Former Type of Lubricants [176]..	179
4.7.5	How Non-polar Lubricants Function	182
4.7.6	How Polar Lubricants Function.....	183
4.7.7	Pseudo-Plasticizing Effect of Polar Lubricants.....	183
4.7.8	Combination of All Types of Lubricants.....	184
4.7.9	Various Lubricants	185
4.7.9.1	Natural and Synthetic Waxes.....	185
4.7.9.2	Metal Soaps	188
4.7.9.3	Fatty Acids, Alcohols, Esters and Complex Esters.....	189
4.7.10	Aspects of Lubricants Related to PVC Processing.....	191
4.7.10.1	Role of Lubricants at the Primary Particle Surface	191
4.7.10.2	Effect of Balance of Polar and Non-Polar Lubricants on Processing.....	191
4.7.10.3	Lubricants in Plasticized Applications	191
4.7.10.4	Effect of Over- and Under-Lubrication on Processing..	192
4.7.10.5	Plateout.....	193

4.7.10.6	Haze and Transparency	193
4.7.10.7	Impact Properties	194
4.7.11	Selection and Testing of Lubricants	195
4.7.11.1	Relationship of PVC's K-Value and the Lubricant Level	195
4.7.11.2	Using a Torque Rheometer to Fine-Tune the Level of Lubricant	195
4.8	Intermediate Lubricants	196
4.8.1	Antistatic Agents	196
4.8.2	Antifogging Agents	197
4.9	CPVC Stabilizers and Lubricants	198
4.9.1	Mechanism of CPVC Thermal Decomposition	198
4.9.2	Differences in Processing of PVC and CPVC	199
4.9.3	Heat Stabilizers for CPVC	202
4.9.4	Mechanism of CPVC Stabilization	204
4.10	Quality Control of Stabilizers [197]	206
5	Plasticizers	219
	<i>Peter Frenkel, Michael Schiller, Patrick Harmon</i>	
5.1	Preface	219
5.2	Historical Developments	220
5.3	Mechanisms of Plasticization	221
5.4	Types of Plasticizers	223
5.4.1	Traditional Plasticizers: Classification	223
5.4.2	Primary Bio-Based Plasticizers	237
5.4.3	Selected Types of Primary Bio-based Plasticizers	238
5.4.3.1	Citrates	238
5.4.3.2	Dicarboxylic Acid Esters	239
5.4.3.3	Acetylated Fatty Acid Esters	240
5.4.3.4	Isosorbide Diesters	241
5.4.3.5	Epoxidized Fatty Acid Esters	241
5.4.3.6	Other Bio-Based Plasticizers	246
5.5	Plasticizer Performance Attributes	246
5.6	Plasticizer Efficiency	255
5.7	Low-Temperature Performance Characteristics	256
5.8	Permanence (Transience) of Plasticizers	257

5.9 Miscibility (Compatibility) 258

5.10 Processability..... 262

5.11 Future of Plasticizers 263

5.12 Health, Safety and Environmental Aspects of Plasticizers 264

 5.12.1 Hazards and Risks 264

 5.12.1.1 Carcinogenicity 264

 5.12.1.2 Reproductive and Developmental Toxicity 265

 5.12.2 Environmental Fate and Toxicity..... 266

 5.12.3 Human Biomonitoring and Exposure Assessment 266

 5.12.4 Recent Epidemiological Studies 267

 5.12.5 Toxicology, Environmental Fate and Exposure to
 Other Plasticizers..... 268

5.13 Regulatory Impacts on Plasticizers – Current Topics 270

 5.13.1 U.S. EPA and TSCA 270

 5.13.2 California Proposition 65 and ortho-Phthalates..... 270

 5.13.3 U.S. Consumer Product Safety Commission (CPSC) and
 ortho-Phthalates..... 271

 5.13.4 REACH, Classification and Labeling, Substances of
 Very High Concern (SVHC)..... 271

 5.13.5 Regulated Applications of Plasticizers 273

 5.13.5.1 Food-Contact (FDA and EFSA/EU) Applications..... 273

 5.13.5.2 Medical Applications of Plasticizers in the U.S.
 and EU-27 276

6 Processing Aids and Impact Modifiers..... 285

Michael Schiller

6.1 Processing Aids/Flow Modifiers..... 285

 6.1.1 Introduction 285

 6.1.2 History 286

 6.1.3 Role of Processing Aids in PVC 289

 6.1.3.1 Promotion of Homogeneous Melt..... 290

 6.1.3.2 Melt Homogeneity 292

 6.1.3.3 Melt Strength, Extensibility and Elasticity 294

 6.1.4 Benefits of Processing Aids in PVC..... 295

 6.1.4.1 Extrusion [19] 295

 6.1.4.2 Foam Extrusion..... 295

6.1.4.3	Calendering/Thermoforming [22].....	297
6.1.4.4	Injection Molding [23]	297
6.1.4.5	Blow Molding [24].....	300
6.2	Impact Modifiers.....	300
6.2.1	Introduction	300
6.2.2	Impact Modification Theory [27]	301
6.2.3	Influence of Degree of Gelation/Fusion [62]	306
6.2.4	Impact Modifiers - Functions, Features and Types	309
6.2.4.1	Predefined Particle Size Modifiers [68]	310
6.2.4.2	Modifiers with Network Structure [68]	313
6.2.4.3	Inorganic Impact Modifiers [68]	314
6.2.5	Impact Modifiers Selection	317
6.2.6	Mathematical Modeling of the Dependency of Impact Strength on the Dosage of Impact Modifier	318
6.2.7	Impact and Toughness Testing	320
6.2.7.1	Charpy and Izod Impact Test [98]	320
6.2.7.2	Falling-Weight Tests [98]	321
6.2.7.3	Bottle-Drop Impact Tests [102].....	323
6.2.7.4	Tensile Impact [102].....	323
6.2.7.5	Fracture Toughness [102]	323
7	Functional Fillers, Mineral Additives and Reinforcing Agents in PVC.....	327
	<i>Jürgen W. Leonhardt, Michael Knerr</i>	
7.1	Introduction	327
7.1.1	Definitions	327
7.1.2	Functional Fillers and Their Applications	328
7.2	Properties of Fillers	328
7.2.1	Form Factor	329
7.2.2	Particle Size Distribution (PSD)	329
7.2.2.1	Average Particle Diameter (D50%)	330
7.2.2.2	Top Cut	330
7.2.2.3	The Specific Surface Area as a Measure of the Fines Content (BET)	330
7.2.3	Surface Energy	331
7.2.4	Further Properties of Functional Fillers	331

7.3	Properties of Filled Plastics.	332
7.3.1	Influence of the Shape Factor.	333
7.3.1.1	Spherical or Cubic Aggregates.	333
7.3.1.2	Platelet and Fibrous Fillers.	333
7.3.2	Influence of the Particle Size Distribution.	334
7.3.2.1	Influence of the Top Cut.	334
7.3.3	Effect of Surface Treatment.	336
7.3.4	Color.	336
7.3.5	Density and Relative Density/Specific Gravity.	337
7.3.6	Further Properties of Modified Plastics.	338
7.4	Application Criteria for Functional Fillers and Reinforcing Agents in Thermoplastics.	342
7.5	Description of the Individual Functional Fillers.	345
7.5.1	Round and Cubic Particles.	345
7.5.1.1	Natural Calcium Carbonates.	345
7.5.1.2	Synthetic, Precipitated Calcium Carbonates.	350
7.5.1.3	Dolomite.	351
7.5.1.4	Calcium Sulfates.	351
7.5.1.5	Barium Sulfate (Barite).	351
7.5.1.6	Glass Beads.	352
7.5.1.7	Synthetic Silica.	352
7.5.1.8	Natural Silica.	352
7.5.1.9	Silicate Beads.	353
7.5.1.10	Feldspar and Nepheline Syenite.	353
7.5.1.11	Industrial Carbon Black.	353
7.5.1.12	Wood Flour.	353
7.5.1.13	Metals and Metal Oxides.	354
7.5.2	Platelet-Like Particles.	354
7.5.2.1	Talc Powder.	354
7.5.2.2	Kaolin.	356
7.5.2.3	Mica.	356
7.5.2.4	Graphite.	357
7.5.2.5	Aluminum Hydroxide and Magnesium Hydroxide.	357
7.5.3	Acicular and Fibrous Particles.	358
7.5.3.1	Wollastonite.	358

7.5.3.2	Whiskers	358
7.5.3.3	Asbestos	358
7.5.3.4	Glass Fibers	359
7.6	Adhesion Promoters/Coupling Agents	360
7.7	Processing of Plastics Containing Functional fillers and Reinforced Plastics	361
7.7.1	Rigid PVC (u-PVC) Profile Extrusion	361
7.7.2	Pipe Extrusion	363
7.7.3	Cable Extrusion	364
7.7.4	Wood Flour Processing	366
7.7.5	Blow Molding	367
7.7.6	Blown and Flat Films	368
7.7.7	Sheets and Deep-drawn Molded Parts	369
7.7.8	Injection Molded Articles	370
7.7.9	Plastisol Applications	370
7.7.10	Recycling	371
7.8	Outlook and Technological Trends	372
8	PVC Blends and Alloys	375
	<i>Donald E. Witenhafer, Saleem Shakir</i>	
8.1	Introduction	375
8.2	High Heat Deflection Temperature of PVC Blends	377
8.2.1	Glutarimide Copolymers	377
8.2.2	ABS, AMSAN Blends	378
8.2.3	Suprel Alloy Example	379
8.2.4	Styrene/Maleic Anhydride (SMA) Copolymer Blends	380
8.2.5	PVC and CPVC Blends	380
8.3	Flexible PVC Blends	381
8.3.1	Butadiene Acrylonitrile Copolymer Blends	381
8.3.2	Polyketone Blends	385
8.4	Compatibilizers	386
8.5	Summary	387

9 Compounding Processes..... 389
Rabeh Elleithy, James W. Summers, Ralph J. Purtell, Nicolas Gehring

9.1 Introduction..... 389

9.2 Powder Mixing in PVC..... 390

 9.2.1 Hot or High-Speed Mixer..... 391

 9.2.1.1 Vortex..... 393

 9.2.1.2 Influencing the Vortex..... 394

 9.2.2 Cold or Cooling Mixer..... 395

 9.2.2.1 Vertical Cooling Mixers..... 396

 9.2.2.2 Horizontal Cooling Mixers..... 397

 9.2.2.3 Double Batching..... 398

 9.2.3 Heating Cooling Mixer Cycle..... 400

 9.2.4 PVC Mixing without Cooling Mixer..... 401

9.3 Vinyl Chloride Monomer Emissions, De-Dusting and Dehumidifying..... 402

 9.3.1 Vinyl Chloride Monomer (VCM) Emissions..... 402

 9.3.2 De-Dusting..... 402

 9.3.3 Dehumidifying..... 404

9.4 Liquid Addition..... 406

 9.4.1 Plasticizer Addition [12]..... 407

 9.4.2 Types of Injection..... 408

9.5 Solutions to the Agglomeration Problems in High Speed Mixing [16]..... 410

9.6 Mixing Troubleshooting..... 411

9.7 Plastisol Mixing..... 413

9.8 Powder to Product by Twin Screw Extrusion..... 415

9.9 Powder to Compound with an Internal Batch Mixer (Banbury)
 and Mill..... 416

9.10 Powder to Compound with an Internal Batch Continuous Mixer
 and Mill..... 418

9.11 Powder to Compound by Single Screw Compounding..... 419

9.12 Powder to Compound by Reciprocating Single Screw Compounding..... 420

9.13 Powder to Compound by Twin Screw Compounding..... 422

9.14 Powder to Compound by Planetary Screw Extruders..... 424

9.15 Summary..... 426

10 Flexible PVC 427
William Coaker, Ralph J. Purtell, Walter Fischer

10.1 Origins 427

10.2 Raw Materials for Flexible PVC Applications..... 428

 10.2.1 The Resin 428

 10.2.1.1 Suspension PVC..... 428

 10.2.1.2 Dispersion PVC 432

10.3 Particulate Architecture of PVC Resins Used in Flexible Products 435

10.4 Favored Processing Methods for Flexible PVC..... 438

10.5 Designing Flexible PVC Compounds..... 442

 10.5.1 Formulation Development..... 442

 10.5.2 General Problems in Formulation Development..... 443

 10.5.3 Properties Often Specified for Semi-Rigid and Flexible PVC Products..... 447

10.6 Additives Used in Flexible PVC Compounds..... 449

 10.6.1 Liquid Plasticizers and Solid Plasticizers..... 449

 10.6.2 Stabilizers 450

 10.6.3 Fillers 450

 10.6.4 Lubricants 453

 10.6.5 Light Stabilizers 454

 10.6.6 Flame Retardants and Smoke Suppressants 456

 10.6.7 Other Additives..... 457

10.7 Markets for Flexible and Semi-Rigid PVC 458

 10.7.1 Cable Insulation and Jacketing/Sheathing..... 458

 10.7.1.1 U.S. Market 458

 10.7.1.2 European Market 461

 10.7.2 Calendered and Extruded Products..... 462

 10.7.3 Supported PVC Films and Sheets 463

 10.7.4 Wall Coverings 464

 10.7.5 Floorings and Floor Tiles..... 465

 10.7.6 Solid and Foamed Flexible PVC Backings..... 467

 10.7.7 PVC Packaging Films..... 468

 10.7.8 Direct and Indirect Medical Applications 468

 10.7.9 Hoses and other Transparent Applications..... 469

 10.7.10 Gaskets 470

10.7.11	Films	470
10.7.12	Transparent PVC Agricultural Film	471
10.7.13	Automotive Applications	471
10.7.14	Waterstop Membranes	472
10.7.15	Shoe Soles	472
10.7.16	Oil-Resistant Applications	473
10.7.17	Electrical Plugs	473
10.7.18	Roofing Membranes	474
10.7.19	Conveyor Belts	474
10.7.20	Tarpaulins	475
10.7.21	PVC-NBR Alloys	475
10.7.22	PVC-EVA Alloys	477
10.7.23	Dry Blend Recommendations	477
10.8	Specifications for and Quality Control Testing on Flexible PVC Products..	480
10.8.1	Tensile Properties after Oven Aging	480
10.8.2	Thermal Stability by Torque Rheometer	482
10.8.3	Melt Viscosity	483
10.8.4	Hardness	484
10.8.5	Low Temperature Brittleness	484
10.8.6	Plasticizer Compatibility	484
10.8.7	Moisture	485
10.8.8	Poor Dispersion, Contamination and Resin Gels	486
10.8.9	Small-Scale Defects and Surface Phenomena	486
10.9	Regulatory Issues	486
10.10	Future Projections	486
11	Specialty PVC Resins	489
	<i>Viswanathan Narayan, Peter Gall, Saleem Shakir, Ashok Shah,</i>	
	<i>David Poledna, Andy Olah</i>	
11.1	Dispersion and Blending Resins	492
11.2	Powder Process Resins	498
11.2.1	PVC for Powder Coating and Powder Molding Systems	498
11.3	Specialty Suspension PVC Resins	498
11.3.1	Ultra-High-Molecular Resins	499
11.3.2	Ultra-High-Absorptive Resin	500

11.3.3	Deglossing or Dulling Resins	503
11.3.4	Specialty Grade Coarse Emulsion Resins	505
11.4	Copolymer Resins	506
11.4.1	Conventional VCl/VAc Copolymers	507
11.4.2	Solution Polymers	507
11.5	Overview of Chlorinated Polyvinyl Chloride Materials, Products and Applications	508
11.5.1	Introduction	508
11.5.2	The Chlorination Process	508
11.5.3	Chlorinated Polyvinyl Chloride Compounds	512
11.5.4	End-Use Applications for Chlorinated Polyvinyl Chloride Compounds	512
11.5.4.1	Potable Water Distribution at Elevated Temperatures .	513
11.5.4.2	Industrial Handling of Corrosive Fluids at Elevated Temperatures	518
11.5.4.3	CPVC-Based Fire Sprinkler Systems	519
11.5.4.4	CPVC-Based Non-Pipe Products that Offer Alternatives to Other High-Temperature Thermoplastics	521
11.5.5	CPVC Compounding and Processing	521
11.6	Summary	522
12	Properties, Characterization and Testing of PVC, its Materials and Additives	525
	<i>Michael Schiller, Peter Frenkel, Richard Krock</i>	
12.1	Introduction	525
12.2	Characterization at the Molecular Level	525
12.2.1	Measurement of Residual Vinyl Chloride Monomer (RVCM) in PVC Resins and Articles	525
12.2.1.1	Measuring RVCM in PVC Resin and In-Process Wastewater	526
12.2.1.2	Measuring RVCM in PVC Materials	526
12.2.2	Characterization of PVC at the Molecular Level	527
12.2.3	Characterization at the Particulate Level	532
12.2.4	Other Methods of Characterizing PVC	533
12.3	Characterization of Additives for PVC and CPVC	535
12.3.1	Stabilizers	535

12.3.1.1	Lead-Containing Stabilizers, Mixed-Metal Carboxylates and Calcium-Organic Stabilizers	535
12.3.1.2	Tin Stabilizers	536

22 Decarbonization of PVC..... 1049
Peter Frenkel, Jason Leadbitter, Domenic DeCaria

22.1 Transition to Bio-Sourced Feedstocks in the PVC Value Chain:
Renewable Raw Materials and Bio-Feedstocks 1049

22.2 Bio-Based Components of PVC Materials..... 1053

22.2.1 Bio-Sourced PVC Resins 1053

22.2.2 Bio-Based PVC Additives..... 1056

22.2.2.1 Biopolymers Suitable for Blending with PVC 1056

22.2.2.2 Bio-Based Plasticizers for PVC Plasticizates 1056

22.2.2.3 Biogenic Fillers and PVC Composites..... 1057

22.2.2.4 Bio-Based Heat Stabilizers 1058

22.2.2.5 Bio-Based Lubricants..... 1059

22.3 Bio-Based PVC Materials and Carbon Footprint 1061

22.4 Reducing the Carbon Footprint via Process Decarbonization 1062

22.4.1 Key Process Decarbonization Pathways for the PVC Industry 1063

22.4.1.1 Enhanced Energy Efficiency Measures 1063

22.4.1.2 Electrification of Boilers and Development of
Advanced Electric Furnaces..... 1063

22.4.1.3 Fuel Switching to Low-Carbon Hydrogen, Biofuels
and Nuclear Energy 1064

22.4.1.4 Carbon Capture, Utilization and Storage (CCUS)
as a Complementary Solution 1065

22.4.2 Areas for Research in Decarbonization of PVC..... 1067

22.4.2.1 Advanced Modeling and Process Optimization
for PVC Production 1067

22.4.2.2 Materials for High-Temperature Electric Furnaces
and Their Design 1067

22.4.2.3 Designing Modular Carbon Capture and
Utilization (CCU) Systems for Industry-Specific
Applications 1067

22.4.3 Potential Impacts, Practicality and Timing for Decarbonization
of PVC Processes..... 1068

22.5 PVC and Inter-Material Competition on the GWP Scale..... 1069

22.5.1 Inter-Material Competition with Other Plastics..... 1069

22.5.2 Inter-Material Competition with Non-Plastics 1070

23 PVC Industry Structure and Dynamics..... 1075
Ana Lopez, David Smalley

23.1 Supply and Producers 1075

 23.1.1 Global Regional Supply..... 1075

 23.1.2 Leading Producers..... 1076

 23.1.3 Producer Backward Integration..... 1079

 23.1.4 Producer Forward Integration 1081

 23.1.5 Industry Restructuring..... 1083

23.2 Demand..... 1085

 23.2.1 Global Regional Demand 1085

 23.2.2 Per Capita Consumption..... 1086

 23.2.3 Demand by End Use 1087

 23.2.4 Market Status of Specialty Resins 1089

 23.2.5 Merchant Resin vs. Compound Sales 1091

 23.2.6 Impact of Regulations..... 1092

 23.2.7 Interregional Trade..... 1093

 23.2.8 Growth Forecast to 2030..... 1094

 23.2.9 Capacity Needs..... 1096

23.3 Pricing and Economics..... 1097

 23.3.1 Resin Price Structure..... 1097

 23.3.2 Price Determinants 1098

 23.3.3 PVC Resin Cost Components 1099

 23.3.4 Capital Investment in New Plant 1102

24 Global Vinyl Council 1105
Richard Krock, Ned Monroe
