Preface — VII

1 Introduction — 1

- 1.1 A disruptive technology, additive manufacturing — 1
- 1.2 Advantages of additive manufacturing over traditional manufacturing — 2
- 1.3 Classification of additive manufacturing technologies — 4
 - 1.3.1 Vat polymerization — 4
 - 1.3.2 Material jetting — 8
 - 1.3.3 Binder jetting — 9
 - 1.3.4 Material extrusion — 11
 - 1.3.5 Powder bed fusion — 13
 - 1.3.6 Directed energy deposition — 15
 - 1.3.7 Sheet lamination — 16
- 1.4 Timeline/history of additive manufacturing — 18

2 Additive manufacturing of polymers — 21

- 2.1 Classification of polymers — 21
 - 2.1.1 Thermoplastics — 22
 - 2.1.2 Thermosets — 22
 - 2.1.3 Elastomers — 23
- 2.2 Selection of polymers for additive manufacturing — 23
- 2.3 Additive manufacturing of thermoplastic polymers — 24
- 2.4 Additive manufacturing of thermosets — 26
 - 2.4.1 Additive manufacturing of photosensitive thermosets — 27
 - 2.4.2 Additive manufacturing of heat-sensitive thermosets — 27
- 2.5 Additive manufacturing of elastomers — 29

3 Additive manufacturing of polymer composites — 31

- 3.1 Additive manufacturing of powder-doped polymer composites — 31
- 3.2 Additive manufacturing of short fiber-doped composites — 34
 - 3.2.1 Short fiber-reinforced thermoplastic composites — 35
 - 3.2.2 Short fiber-reinforced thermoset composites — 37
- 3.3 Prediction of mechanical properties of short fiber-reinforced composites — 39
- 3.4 Alignment of short fibers within additively manufactured composites — 41

3.5	Additive manufacturing of continuous fiber-reinforced composites — 42
3.6	Mechanical performance comparison of additively manufactured polymer composites — 45
4	Additive manufacturing of metals — 48
4.1	Feedstock material fabrication for powder bed fusion — 49
4.2	Feedstock materials used in metal additive manufacturing — 52
4.2.1	Titanium and titanium alloys — 53
4.2.2	Aluminum alloys — 54
4.2.3	Other metals — 54
4.3	Design considerations in metal additive manufacturing — 55
4.3.1	Void formation — 55
4.3.2	Residual thermal stresses — 55
4.3.3	Surface roughness — 56
4.3.4	Postprocessing — 56
4.4	Mechanical properties of additively manufactured metals — 57
5	Additive manufacturing of ceramics — 62
5.1	Powder-based ceramic additive manufacturing — 63
5.1.1	Binder jetting of ceramics — 64
5.1.2	Powder bed fusion of ceramics — 65
5.2	Slurry-based ceramic additive manufacturing — 66
5.2.1	Vat polymerization of ceramics — 66
5.2.2	Direct writing (DW) of ceramics — 67
5.3	Bulk solid-based technologies — 70
5.3.1	Sheet lamination — 71
5.3.2	Fused filament fabrication (FFF) — 72
5.4	Additive manufacturing of polymer-derived ceramics — 73
5.5	Mechanical properties of AM ceramics — 74
6	Bioprinting — 78
6.1	Bioprinting methods — 78
6.2	Bioink types used in bioprinting — 81
6.3	Bioprinting applications — 83
6.3.1	Bioprinting of blood vessels — 84
6.3.2	Skin bioprinting — 85
6.3.3	Cartilage printing — 86
6.3.4	Cardiac tissue bioprinting — 86
6.3.5	Kidney tissue bioprinting — 88
6.4	Challenges and limitations of bioprinting functional organs — 89
6.5	Bioprinting in cancer research — 89

7 Topology optimization — 92

- 7.1 Topology optimization for additive manufacturing — **93**
- 7.2 Topology optimization methods — **96**
- 7.3 Solution of topology optimization problem using ANSYS finite element software — **99**

8 Advanced concepts in additive manufacturing — 101

- 8.1 Hybrid additive manufacturing — **101**
 - 8.1.1 Additive/subtractive hybrid manufacturing — **101**
 - 8.1.2 Additive/additive hybrid manufacturing — **102**
 - 8.1.3 Hybrid additive manufacturing/scaffolding technologies — **103**
- 8.2 Additive manufacturing of thermoelectric materials — **106**
- 8.3 4D printing with smart materials — **113**
 - 8.3.1 4D printing materials — **115**
 - 8.3.2 Applications of 4D-printed structures — **119**
- 8.4 Artificial intelligence in additive manufacturing — **120**
 - 8.4.1 Implementation of AI in design optimization — **121**
 - 8.4.2 Implementation of AI in process/quality control — **122**
 - 8.4.3 Implementation of AI in additive manufacturing automation and process management — **124**

References — 127**Index — 141**
