

Contents

1 Introduction 13

1.1 State of the Art 14

1.2 Aims and Objectives 15

2 Fundamental Knowledge 17

2.1 Electrodynamics 17

2.1.1 Eddy Currents 18

2.1.2 Skin Effect 20

2.1.3 Mutual Coupling 22

2.1.4 Proximity Effect 23

2.2 Finite-Element Simulation 24

2.2.1 Derivation of the Main Equation 25

2.2.2 Treatment of Conductive Regions 25

2.2.3 Treatment of Non-Conductive Regions 26

2.2.4 Continuity Equation 27

2.3 Statistical Methods 28

2.3.1 Linear Regression 28

2.3.2 Design of Experiments 30

2.3.2.1 Normalization 31

2.3.2.2 D-Optimal Designs 31

3 Inductively Coupled Coils Sensor Principle 35

3.1 Circuit Model 38

3.2 Phase Relations 39

3.3 Important Quantities 40

3.3.1 Tx-Impedance 40

3.3.2 Induced Rx-Voltage Amplitude 40

4 Harmonic Analysis of the Angular Error 43

4.1 Definitions and Signal Corrections 43

4.1.1 Encoder Signals 43

4.1.2 Angular Error 45

4.1.3 Correction of Main Signal Harmonic 46

4.2 Approximation of Angular Error 48

4.2.1 Geometric Projection Method 49

4.2.2 Taylor Series Approximation 51

4.2.3 Error Bounds 53

4.3	Numerical Example	54
4.4	Common Distortions of Encoder Signals	54
4.5	Normalization	56
5	Modeling and Simulation	59
5.1	Simulation Procedure	59
5.1.1	Parametrization of the Sensor Geometry	60
5.1.2	Numerical Implementation of Faraday’s Law	62
5.2	D-Optimal Designs in Application	64
5.2.1	Tx-Inductance Model	65
5.2.2	Rx-Voltage Amplitude Model	67
5.2.3	Angular Error Model	68
5.3	Validation with Measurements	73
6	Characteristic Harmonics	77
6.1	Offset of Angular Error	77
6.2	Fourth Harmonic of the Angular Error	81
7	Improving the Rx-Coil Geometry	87
7.1	Strategy	87
7.2	Validation	89
8	Recommended Design Rules	93
9	Conclusions	95
	Bibliography	101
A	Mathematical Background Required for the Harmonic Analysis	105
A.1	Partial Derivatives of the Arctangent	105
A.2	Multivariate Taylor Series	106
A.3	Derivation of the Residual Error Bound	107
B	Datasets and Results of the Regression Analysis	109
B.1	D-Optimal Design for the Tx-Inductance and the Rx-Voltage Amplitude	109
B.2	D-Optimal Design for the Angular Error	109
