Acronyms	IX
Formula Symbol Convention	X
List of Formula Symbols	XI
Kurzfassung	XIX
Abstract	XXI
1 Introduction	1
2 Theoretical Background	3
2.1 Electric Vehicle Drivetrains	3
2.2 Parasitic Effects in Electric Vehicle Drivetrains	5
2.2.1 Electromagnetic Interference	5
2.2.2 Bearing Currents	8
2.2.3 Winding Partial Discharges	10
2.3 SiC MOSFETs	12
2.3.1 Properties of Silicon Carbide Semiconductors	12
2.3.2 Structure of SiC MOSFETs	13
2.3.3 Switching Behavior of SiC MOSFETs	14
2.4 Generation of Losses in an Inverter	19
2.5 Active Gate Drivers	21
2.5.1 Hardware Realization of Active Gate Drivers	21
2.5.2 Control of Active Gate Drivers	24
2.5.3 Applications of Active Gate Drivers	27
2.6 Contributions of this Dissertation	30
3 Active Gate Driver	32
3.1 Hardware Implementation of the Active Gate Driver	34
3.2 Control Scheme of the Active Gate Driver	37
3.3 Low-Level Control Scheme for Switching Speed Adjustment	38
3.3.1 Low-Level Control Scheme Implementation in the AGD Controller	39
3.4 Double Pulse Measurements	40
3.4.1 Measured Switching Behavior of a SiC MOSFET Driven by a Conventional Gate Driver	42

3.4.2	Measured Switching Behavior of a SiC MOSFET Driven by an Active Gate Driver	47
3.4.3	Optimal Timing Determination	48
3.5	Low-Level Control Scheme to Reduce Voltage Overshoot	50
3.6	High-Level Control of the AGD	55
3.6.1	Operating Range Interpolation Using Artificial Neural Networks .	57
3.6.2	Operating Range Interpolation Using Piecewise Linear Approximation	57
3.6.3	Comparison between AGD and CGD	59
3.7	Loss Estimation by Virtual Sinusoidal Currents	61
3.8	AGD Control Robustness	64
3.8.1	Timing Sensitivity	64
3.8.2	Influence of Device Variations on the AGD Control Method . . .	65
3.8.3	Influence of Measurement Errors on the AGD Control Method . .	71
3.9	Simplified AGD Control Schemes	72
3.9.1	Control Without Parameter Estimator	73
3.9.2	Fixed Gate Resistor Per Switching Event	75
3.10	Summary	78
4	Comparison of AGD and dv/dt Filter	81
4.1	Filter Modelling	82
4.2	Filter Component Sizing	84
4.2.1	Filter Inductor	84
4.2.2	Filter Capacitor and Damping Resistor	89
4.3	Filter Loss Measurements	91
4.4	Virtual Sinusoidal Measurements	93
4.5	Summary	99
5	Inverter Verification	100
5.1	Inverter Test Bench	100
5.1.1	DC Link	101
5.1.2	Measurement PCB	102
5.1.3	Controller	102
5.1.4	Control Software	103
5.1.5	Electric Machine	104
5.2	Efficiency Estimations	105
5.3	Measurement Acquisition	107
5.4	Measurement Results	109
5.4.1	CM Current and Output Voltage Measurement	110
5.4.2	Efficiency Measurement	114
5.4.3	EMI Measurement	119
5.4.4	EMI Reduction by AGD	121
5.5	Summary	123
6	Conclusion	124

<i>Contents</i>	<i>VII</i>
A Appendix	128
A.1 AGD Schematic	128
A.2 AGD-Based CM Current Reduction	130
Bibliography	132
Curriculum Vitae	147
