

Table of Content

1	Introduction	1
1.1	Research Background	1
1.1.1	Importance of Tower Crane Operations	1
1.1.2	Efficiency in Tower Crane Operations.....	1
1.1.3	Safety in Tower Crane Operations.....	2
1.2	Direct Cause of Efficiency and Safety Issues	2
1.3	Research Scope and Research Questions.....	3
1.3.1	Research Scope.....	3
1.3.2	Research Questions.....	3
1.4	Hypothesis and Research Objectives.....	4
1.4.1	Hypothesis	4
1.4.2	Research Objective	4
1.5	Dissertation Structure	5
1.6	Chapter Summary	6
2	Mechanism and Root Cause	7
2.1	Motivation for Exploration	7
2.2	Related Work	7
2.2.1	Review Scope	7
2.2.2	Identification of Direct Causes	8
2.2.3	Statistical Analysis for Accident Reports	8
2.2.4	Relevance Identification Between Direct Causes	9
2.2.5	Limitations of Related Work.....	10
2.3	Method for Exploration	10
2.4	Mechanism Exploration.....	11
2.4.1	Questionnaire Design	11
2.4.2	Current Practice	12
2.4.3	Data Collection and Analysis	13

2.5 Root Cause Definition and Mechanism Description.....	15
2.5.1 Definition of Root Cause	15
2.5.2 Mechanism Description.....	15
2.6 Chapter Summary	17
3 Review of Existing Research	18
3.1 Review Scope	18
3.2 Building Information Modeling (BIM)	18
3.2.1 Definition	19
3.2.2 BIM nD.....	19
3.2.3 Industry Foundation Classes (IFC).....	19
3.2.4 Level of Development (LOD)	19
3.2.5 As-Planned Model and As-Built Model.....	20
3.2.6 BIM Dataset.....	20
3.2.7 BIM in the Construction Industry.....	21
3.3 Augmented Reality (AR)	21
3.3.1 Definition	21
3.3.2 AR Display	22
3.3.3 AR Registration	22
3.3.4 AR Tracking.....	22
3.3.5 AR Interface.....	23
3.3.6 User Experience of AR.....	23
3.3.7 Visualization Techniques in AR.....	23
3.3.8 AR in the Construction Industry	24
3.4 Existing Research for Lifting Planning	24
3.4.1 Section Introduction	24
3.4.2 Lifting Planning on the Single Task Level	24
3.4.3 Lifting Planning on the Project Level.....	26
3.4.4 Limitations of Previous Solutions	26
3.5 Existing Research for Operation Visualization.....	27
3.5.1 Section Introduction	27
3.5.2 Real-Time Safety Assistance System	27
3.5.3 Tower Crane Navigation System	27
3.5.4 Limitations of Previous Solutions	28
3.6 Existing Research for Operation Monitoring	29
3.6.1 Section Introduction	29
3.6.2 Tower Crane Anti-collision System.....	29
3.6.3 Lifting Path Re-planning	29

3.6.4 Warnings About Unsafe Operations	30
3.6.5 Limitations of Previous Solutions	30
3.7 Conclusion of Research Review	31
3.8 Chapter Summary	32
4 Theoretical Background and Concept Development	33
4.1 Research Questions and Hypothesis	33
4.2 Developed Concept.....	34
4.3 Developed Methodology and Workflow	35
4.4 System Architecture	36
4.5 Chapter Summary	37
5 4D BIM-Based Lifting Planning	38
5.1 Chapter Introduction	38
5.2 3D BIM for Obstacle Identification	38
5.3 4D BIM for Construction Site Changes.....	40
5.4 BIM-Based Work Breakdown Structure (WBS) Method for Navigation Elements.....	42
5.5 4D BIM-Based Heuristic Algorithm for Lifting Paths	44
5.6 Proof of Sub-concept Implementation.....	46
5.7 Chapter Summary	54
6 Augmented Reality for Operation Visualization	55
6.1 Developed Sub-concept	55
6.2 Location-Based AR Registration for Spatial Relationship Presentation	55
6.3 AR Scene for Temporal Relationship Presentation.....	58
6.4 AR Interaction for Collaborative Operations.....	60
6.5 Cloud Computing for Lifting Planning Updates	62
6.6 Proof of Sub-concept Implementation.....	63
6.7 Chapter Summary	68
7 Augmented Reality for Operation Monitoring	70
7.1 Developed Sub-concept	70
7.2 Sensor Combination for Motion Capture	70
7.3 Hybrid AR Tracking for Operation Comparison	73
7.4 AR Hints for Operational Adjustments.....	75
7.5 AR Warning System for Misoperation Warnings.....	76
7.6 Proof of Sub-concept Implementation.....	78
7.7 Chapter Summary	85

8 Concept Evaluation **86**

8.1 Evaluation Strategy 86

8.2 Evaluation for Sub-concepts 87

8.3 Prototype Test 91

 8.3.1 Prototype Description 91

 8.3.2 Prototype Test 93

 8.3.3 Data Analysis for Prototype Test 94

8.4 Chapter Summary 97

9 Conclusion and Outlook **98**

9.1 Conclusion of the Research Project 98

9.2 Contributions 99

9.3 Research Limitations and Future Work 100

9.4 Chapter Summary 101

Reference **102**

List of Acronyms **136**

List of Figures **139**

List of Tables **141**

Appendix 1 Survey Questionnaire **142**

Appendix 2 Anonymized Answers of Interviewees **147**
