

TABLE OF CONTENTS

1. INTRODUCTION	13
2. BASIC KNOWLEDGE	17
2.1 Primary Principles	17
2.1.1 THERE IS NO SUCH THING AS A PERFECT NATURAL HOOF!	17
2.1.2 THE LANGUAGE OF THE HOOF	18
2.1.3 THE HOOF LINES	19
2.2 The Nature of Hooves	21
2.2.1 LIFE IS MOTION – MOTION IS LIFE	21
2.2.2 FUNCTIONS AND FACULTIES OF THE HOOF	22
2.3 Hoof Physics	24
2.4 Flexibility – A Blessing	25
2.5 Deformation – Blessing and Curse	25
3. ANATOMY	29
3.1 Construction of the Horse Hoof	29
3.2 Exterior of the Hoof and the Lower Leg	30
3.2.1 NATURAL HOOF AND TRIMMED HOOF FROM BELOW	32
3.3 Interior of the Hoof	35
3.4 The Hoof Horn	39
3.4.1 THE LAYERS OF SKIN	39
3.4.2 TUBULES AND LAMINAE	41
3.4.3 THE SEGMENTS OF THE HORN CAPSULE	45
3.4.3.1 DETAILED DESCRIPTION OF THE STRUCTURE OF EACH SEGMENT.	46
3.4.4 THE COFFIN BONE SUPPORT – THE LAMINAE LAYER (WHITE LINE)	54
3.4.5 HORN: GROWTH AND QUALITY.	58
4. STATICS AND BALANCE	61
4.1 The Balance of Forces	61
4.2 Lines	62
4.2.1 LONGITUDINAL STATIC LINES: HEELS, TOES, CORONARY BAND	62
4.2.2 LATERAL STATIC LINES: SIDE HOOF WALLS	63

4.3 Longitudinal Statics 64
 4.3.1 ASSESSMENT OF THE LONGITUDINAL STATICS – AN OVERVIEW 64
 4.3.2 NATURAL POSTURES WITH BALANCED STATICS 68
 4.3.3 HEEL AND TOE 70
 4.3.4 HOOF-PASTER N AXIS 70
 4.3.5 POSITION OF THE COFFIN 73
 4.3.6 COFFIN JOINT PIVOT POINT. 76
4.4 Lateral Statics. 78
 4.4.1 NATURAL CROOKEDNESS 79

5. MOBILITY 83

5.1 Mobility is Life – Life is Mobility 83
5.2 The Mobilisers: Muscles 84
5.3 Totally Networked: Muscles, Tendons, Hooves. 84
 5.3.1 THE TENDONS: ENERGY STORERS AND INDIRECT MOBILISERS 84
 5.3.2 THE HOOVES: SHOCK-ABSORBERS AND INFORMANTS 85
5.4 The Supporters: Tendons 87
 5.4.1 THE MOST IMPORTANT TENDONS IN THE HOOF AND LOWER HORSE LEG 92
5.5 Energy-saving Mechanisms. 94
 5.5.1 TENSION-SPRING MECHANISM (FOREHAND). 94
 5.5.2 TENSION-SAW CONSTRUCTION (HINDQUARTERS) 95
5.6 The Motion Sequence – The Various Phases of Footing 96
 5.6.1 INTRODUCTION 96
 5.6.2 THE PARTS PLAYED BY THE MUSCLES, TENDONS AND LIGAMENTS 98
 5.6.3 STANCE AND SWING– STRIDES 2 × 3 99
 5.6.4 THE MOVEMENT OF THE FOREHAND 100
 5.6.5 THE MOVEMENT OF THE HINDQUARTERS 105
5.7 The Movement of the Hooves – The Distribution of Impacting Forces 116
 5.7.1 THE PUSH-OFF DIRECTION 116
 5.7.2 THE PUSH-OFF POINT 117
 5.7.3 THE DIRECTION OF IMPACTING FORCES 119
 5.7.4 CONCLUSION 122
5.8 The Hoof Mechanism 124
 5.8.1 THE HEART OF THE HOOF – SUPPLY OF NUTRIENTS AND SHOCK-ABSORPTION 124
 5.8.2 THE VERTICAL HOOF MECHANISM. 126
 5.8.3 CONCLUSION: HOOF MECHANISM 128
5.9 Sole Bulge “Suction-cup Effect” and Locomotion Comfort 128

5.10 Shock-absorption. 131

5.10.1 BULBS AND CUSHIONS 131

5.10.2 HOOF CARTILAGE 133

6. THE PRACTICAL WORK. 135

6.1 Introduction 135

6.2 General 138

6.2.1 WHAT IS TO BE DONE? – TRIM OR ADD?. 138

6.2.2 WHERE CAN IT BE DONE? – THE SHOEING SITE 141

6.2.3 WHAT CAN YOU DO IT WITH? – TOOLS AND THEIR USES. 141

6.3 Take a Good Look First... 143

6.3.1 IN GENERAL 144

6.3.2 IN PARTICULAR 144

6.3.3 FROM THE RIGHT ANGLE 147

6.4 ...Then Lay on Hand

6.4.1 HOLDING THE HOOF. 149

6.4.2 HOW IS THE HOOF TRIMMED? 149

6.5 How Does the Correction Work? 155

6.5.1 CONTROLLING THE DIRECTION OF THE TUBULE GROWTH 156

6.6 Conclusion: Working methods in the Treatment of Hooves 160

7. ANOMALIES 165

7.1 Introduction. 165

7.1.1 NATURAL ANOMALIES – BASICS 165

7.1.2 ACQUIRED ANOMALIES – BASICS 168

7.2 Natural Anomalies. 169

7.2.1 NATURAL ANOMALIES REQUIRING NO CORRECTION. 169

7.2.2 NATURAL ANOMALIES REQUIRING CORRECTION 172

7.3 Acquired Anomalies 176

7.3.1 WRONG LONGITUDINAL STATICS 176

7.3.1.1 TOES TOO LONG – HEELS TOO FLAT 179

Practical Example 1 – Long Toe – Flat Underrun Heel. 181

Practical Example 2 – Long Toe – Underrun Heel 185

7.3.1.2 HIGH HEELS – HEEL IS TOO STEEP 185

Practical Example 3 – Excessively High Heels 188

7.3.2 INCORRECT LATERAL STATICS. 190

<i>Practical Example 4 – Left-hand forehoof of a horse with a poor genetic anatomical predisposition, routine trimming process</i>	194
<i>Practical Example 5 – Difference in length of lateral hoof walls, incorrect trimming and unsuitable shoes</i>	195
<i>Practical Example 6 – Lateral walls of different length due to the wrong method of trimming.</i>	196
<i>Practical Example 7 – Difference in length of the side walls due to unfavourable anatomical predisposition</i>	198
<i>Practical Example 8 – Arthrosis.</i>	200
<i>Practical Example 9 – Wrong kind of training – wrong exercising on the lunge</i>	200
7.3.3 HEEL ANOMALIES	202
7.3.3.1 HEEL ANOMALIES – AN OVERVIEW	205
7.3.3.2 THE TREATMENT OF HEELS IN GENERAL	208
7.3.3.3 COMMON SOURCES OF ERROR.	210
<i>Practical Example 10 – Contracted heels with rolled-up, underrun and fractured heels</i>	210
<i>Practical Example 11 – Contracted hoof</i>	212
<i>Practical Example 12 – Contracted hoof after correction</i>	212
7.3.4 CONTRACTED HOOVES.	214
<i>Practical Example 13 – Contracted coronet hoof</i>	214
<i>Practical Example 14 – Hoof with contracted weight-bearing rim</i>	215
7.3.5 COMBINATION OF INCORRECT LONGITUDINAL AND LATERAL STATICS	216
<i>Practical Example 15 – Bleeding horn split</i>	217
<i>Practical Example 16 – Pronounced contracted hoof.</i>	218
<i>Practical Example 17 – Underrun heels; heels with little viability due to long toes and deformed horn wall; unnatural sequence of movements.</i>	220
<i>Practical Example 18 – Contracted heels with pushed-up bulbs on the outside and deformation of the horn wall</i>	221
8. PUTRIFICATION ON AND IN HOOF	225
8.1 Thrush	226
8.2 Abscesses	227
<i>Practical Example 19 – Stabilizing abscess-related horn deficiency by shoeing.</i>	230
8.3 Cancer of the Frog	231

9. LAMINITIS 233

9.1 Origin. 235

9.2 Laminitis – Overview of the Causes 237

9.2.1 INCORRECT FEEDING 237

9.2.2 EQUINE METABOLIC SYNDROME (EMS) 238

9.2.3 MORBUS CUSHING AND CUSHING-SYNDROME 238

9.2.4 LAMINITIS CAUSED BY POISONING 238

9.2.5 TRAUMATIC LAMINITIS AND STRESS LAMINITIS. 239

9.3 Handling and Treatment 239

9.3.1 MAIN PRIORITY: CONSULT THE VET WITHOUT DELAY! 239

9.3.2 WORST-CASE-SCENARIO 240

9.3.3 BASIC TREATMENT PRINCIPLES 240

10. EXTERIOR APPEARANCE OF THE HORN CAPSULE . . 247

10.1 General Remarks 247

10.1.1 SHORT-TERM DISTURBANCES – TREATMENT 248

10.1.2 BADLY WORN WEIGHT-BEARING RIM – TREATMENT 248

10.2 Deformation. 249

10.2.1 TRANSVERSE GROOVES – SYMPTOMATIC OF LAMINITIS 249

10.2.2 DEFORMATION 249

10.3 Discoloration 250

10.3.1 RED LINES OR EXTENSIVE RED MARKS 250

10.3.2 RED MARKS IN THE WHITE LINE NEAR THE TOE 251

10.3.3 BLEEDING IN THE SOLE 251

10.3.4 CIRCUMFERENTIAL BLEEDING 252

10.4 Cracks, Clefts 253

10.4.1 WIND CRACKS 253

10.4.2 HORN CLEFTS 253

10.4.3 LONGITUDINAL GAP IN THE SIDE WALL 255

10.4.4 LONGITUDINAL GAP IN THE TOE 256

10.4.5 TRANSVERSE CRACKS IN GENERAL 256

10.4.6 TRANSVERSE CRACK (UNSUITABLE HORSESHOE). 256

10.4.7 TRANSVERSE CRACK (TRAUMA/ACCIDENT). 257

10.4.8 TRANSVERSE CRACK ON THE CORONET 258

10.4.9 TRANSVERSE CRACK CAUSED BY A BLOW 258

10.5 Fractures	259
10.6 Decomposition	260
10.6.1 HOLLOW WALL	260
10.6.2 “WHITE LINE DISEASE”	261
10.7 Unusual Appearances	262
10.7.1 SCARRED HORN	262
10.7.2 DETACHMENT	263
10.7.3 ADAPTATION THROUGH DEFORMATION	263
 11. DOING AWAY WITH HORSESHOES.	 265
 11.1 The Changeover (but please only do it systematically)	 265
11.2 Complication: Wall Fractures.	265
11.3 The “Hardening-up” Myth.	266
11.4 Contraindications.	266
 12. HORSESHOES AND ALTERNATIVE PROTECTION	 269
 12.1 Why does one need “Hoof Protection”?	 269
12.2 Hoof Protection – an Overview	271
12.3 Hoof Shoes – When and Why?	273
 13. GUIDELINES FOR PRACTICAL HOOFCARE	 275
 13.1 Looking at the Hooves from the Exterior.	 275
13.1.1 HOOVES WHILE STATIONARY	275
13.1.2 HOOVES AND HORSE IN ACTION	277
13.1.3 POSITION OF ALL HOOVES, SEEN FROM THE FRONT, SIDE AND BACK	278
13.1.4 OPTICAL APPEARANCE OF THE HORN CAPSULE	278
13.1.5 COURSE OF THE CORONET	280
13.1.6 LENGTH OF THE LATERAL HOOF WALLS – TRANSVERSE STATICS	280
13.1.7 RELATIONSHIP BETWEEN LENGTH OF TOES AND HEIGHT OF HEELS – LONGITUDINAL STATICS	 281
13.1.8 HEELS.	281
13.2 Observation and Treatment of the Hooves from Underneath	283
13.2.1 SOLE.	283
13.2.2 FROG	283
13.2.3 HEELS	284

13.2.4 CORNER BARS 285

13.2.5 WEIGHT-BEARING RIM 286

13.2.6 TOES 286

13.3 Trimming the Hooves from the Outside 287

14. FREQUENTLY ASKED QUESTIONS 289

14.1 Water or Oil – or “How do I take care of Hooves? 289

14.1.1 THE DRY SUMMER HOOF 290

14.1.2 OILING?. 291

14.1.3 STUDIES ON THE HOOF’S WATER SUPPLY 291

14.2 “Thin Soles”: What does that mean for my horse? How can I judge
whether the soles are too thin? What can I do against thin soles?. 292

14.3 Is a white hoof more vulnerable than a black one? 293

14.4 My horse always has problems with its hooves, whereas other horses in
the same stable have none, although they live under the same conditions.
Why 293

14.5 What is a “Glazed Layer”? 294

Dear Horse-lovers! 294

15. THANKS! 295

16. SOURCES 299
