

Table of contents

1	Introduction	1
2	Theoretical background	9
2.1	Regulatory and supervisory developments	9
2.2	Literature review	13
3	Research method and sample	17
3.1	Semi-structured interviews	17
3.2	Archival data	20
3.3	Conceptual framework	21
4	Results	27
4.1	Pillar I: Integrating climate risks into the standardized approach (SA)	27
4.1.1	Background and rationale	27
4.1.2	Credit ratings and dialogue with rating agencies	29
4.2	Pillar I: Integrating climate risks into internal models (IRB)	30
4.2.1	Background and rationale	30
4.2.2	Materiality	34
4.2.3	Rating criteria and climate-related scores	36
4.2.4	Override framework and margin of conservatism (MoC)	42
4.2.5	Model calibration	45
4.3	Pillar II: Integrating climate risks into the ICAAP and broader risk management	48
4.3.1	Background and rationale	48
4.3.2	Risk identification, materiality assessment & risk inventory	52
4.3.2.1	Identification of risk drivers and relevance assessment	52
4.3.2.2	Materiality assessment	56
4.3.2.3	Risk inventory	63
4.3.3	Risk quantification approaches	64
4.3.3.1	Credit rating simulations and credit portfolio models	66
4.3.3.2	Climate-related scoring methodologies	68
4.3.3.3	Climate-related data and data collection	75
4.3.4	Risk quantification with climate stress testing	80
4.3.4.1	Integration of climate stress testing into stress testing frame- work	84
4.3.4.2	Climate scenario choices, assumptions and related challenges	88

4.3.4.3	Choice of baseline scenario	102
4.3.4.4	Top-down modeling approaches	107
4.3.4.5	Bottom-up modeling approaches	113
4.3.4.6	Balance sheet assumptions	116
4.3.4.7	Physical risk scenario analysis	120
4.3.4.8	Data for climate stress testing	124
4.3.4.9	Integration of climate stress test results into business and risk strategies	127
4.3.5	Internal capital adequacy assessments and capital considerations . . .	129
4.3.5.1	Integration of climate risks into scenarios for capital ade- quacy and capital planning	129
4.3.5.2	Climate-related capital adequacy assessments	132
4.3.5.3	Climate-related capital buffers	137
4.3.5.4	Economic and normative perspectives	143
4.4	Pillar II: Integrating climate risks into risk appetite, risk metrics and limit system	145
4.4.1	Linking risk appetite, risk strategy & business strategy	145
4.4.2	Key risk indicators (KRIs)	149
4.4.3	Limits and exclusions	154
4.5	Pillar I & II: Integrating climate risks into loan pricing	159
4.5.1	Background and rationale	159
4.5.2	Pricing of climate risks through capital considerations	160
4.5.3	Pricing of climate risks through credit risk and funding considerations	163
4.6	Pillar II: Integrating climate risks into the Supervisory Review and Evaluation Process (SREP)	165
4.6.1	Background and rationale	165
4.6.2	Business model, governance and risk management assessments	168
4.6.3	Pillar 2 Requirement (P2R) and Pillar 2 Guidance (P2G)	170
5	Discussion and conclusion	173
