1	Author's Preface	8
2	Definition and System Considerations	9
2.1	Definitions	9
2.1.1	General Terms	9
2.1.2	Tribological Contact	10
2.1.3	Friction	10
2.1.4	Wear	11
2.1.5	Lubricating Grease	12
2.1.6	System Considerations	12
3	Introduction to Instability and Postmodern Tribology	17
4	On the Phenomenon of Self-Organization	19
4.1	General Remarks	19
4.2	The Concept of Entropy and Self-Organization in Postmodern Tribology . .	23
4.2.1	Introduction	23
4.2.2	Selected Works Focusing on Solid-State Wear	24
5	Postmodern Lubricating Grease Tribology	30
5.1	Introduction (Entropy Concept, Self-organization)	30
5.2	Investigations in Stationary Non-Equilibrium	31
5.2.1	On Entropy Transport	31
5.2.2	Process and Counterprocess in Stationary Non-Equilibrium	34
5.2.3	Application of the DEG Theorem to Lubricating Grease Wear	36
5.3	On the Possibility of Self-Organization in Lubricating Grease Stress	39
5.3.1	Conditions for Possible Formation of New Structures	39
5.3.2	Studies on Self-Organization in Friction-Stressed Lubricating Grease	42
5.3.3	The Behavior of Grease under Triggered Self-Organization	46
5.3.4	Some Additional Insights into Possible Self-Organization Processes	49
6	Lubricating Grease	54
6.1	History and Descriptions	54
6.1.1	Historical Background	54
6.1.2	On the Definition of Lubricating Greases	56
6.2	Selected Types of Lubricating Grease	58
6.2.1	Thickener Types (Solids for Common Lubricating Greases)	59
6.2.2	Base Oils	60
	Mineral Oils	61

Contents

	Synthetic Oils	61
	Biodegradable Base Oils/Lubricating Greases	61
6.2.3	Biogenic Lubricating Greases	62
6.2.4	Grease Structure	65
6.3	Selected Test and Experimental Facilities	68
	Cone Penetration (DIN 150 2137)	70
	Timken Test Setup	70
	FE 8 Rolling Bearing Test Rig	71
7	Rheological behavior of Lubricating greases	75
7.1	Introduction	75
	Newtonian Fluids	75
	Non-Newtonian Fluids	76
	Time-independent Non-Newtonian Flow Behavior	76
	On time-dependent Non-Newtonian flow behavior	77
7.2	On the Rheology of Greases	80
7.2.1	Rheological Models for Plastic-Structure-Viscous Flow Behavior . .	80
	BINGHAM Model	80
	Equation by CASSON	82
	BAUER-Equation by ÅSTRÖM/HÖGLUND	84
	Modified BINGHAM Model by BAIR	86
	HERSCHEL-BULKLEY Equation	88
	SISKO Equation	91
	STANULOV ET AL. Equation	93
7.2.2	Models of Time-Dependent Flow Behavior	95
	BAUER Equation	95
	CZARNY Equation	97
	SPIEGEL ET AL. Equation	99
	OWN Empirical Approach	103
	Comparison of Time-dependent Models	105
7.2.3	Remarks on Rheometry in the Investigation of Lubricating Greases .	105
	Rotation Measurements	107
	Oscillation Measurements	109
	Use of Amplitude Sweep for Tribological Interpretation	111
8	A Selected Traditional Wear Model	114
8.1	The Fundamentals According to A. Tross	114
8.2	Solid-State Friction	116
8.3	The Postulate	119
9	The Extension of the Wear Concept	121
9.1	A General Introduction	121

Contents

9.2 Friction in Lubricating Grease 124

9.2.1 Friction States in the Presence of a Viscoelastic Lubricant 124

9.2.2 The Grease-Lubricated Contact 124

9.2.3 Energy Expenditure in Lubricating Grease 126

Energy Expenditure in Shearing of Lubricating Grease 126

Energy Expenditure under Application of Normal Force 129

Possibility for investigating cohesion behavior 132

Some Remarks on Mixed Frictionst]Friction, mixed 133

9.3 Lubricating Grease Wear 134

9.3.1 Some Historical Aspects 136

9.3.2 Selected Studies on the Friction Effects in Lubricating Grease 138

9.3.3 Experimental Investigations on Grease Wear 140

The Rheometer Procedure 140

Temperature Measurements 146

9.3.4 Activation Energy and Grease Wear 148

9.3.5 Remarks on EHL with the Presence of Grease 151

9.3.6 Other Experimental Investigations on Grease Behavior 157

Acoustic Measurements 157

Ball-Drop Experiments 160

Some Aspects of the Influence of Oil Polarity 163

9.3.7 On Thixotropy 165

9.3.8 On Lubricating Grease Thixotropy 166

9.3.9 Own Investigations on Lubricating Grease Thixotropy 169

Experimental investigations 169

Remarks on the Driving Forces of Thixotropic Effects 172

10 Epilogue 174

11 Original Quotes 175

Literature 177

Figures 194

List of persons 197

Index 198
