

Table of Contents

Preface *xv*

Abbreviations *xix*

1	Opinions and Suggestions	1
1.1	Be a “Doctor,” Not Just a “Drug Fetcher”	1
1.2	Synthetic Organic Chemistry: Still as Much an Art as a Science	1
1.3	Synthetic Organic Chemistry Is an Experimental Science under the Guidance of Theory	2
1.4	Reduce Mistakes in Your Synthetic Work	2
1.5	Your Knowledge, Experience, and Skills Can Never Be Too Much	3
1.6	What Is a Mistake?	4
1.7	Beyond Experience: Combining Literature and Insight for Optimal Synthetic Design	6
1.8	Improve Your Decision-Making Ability	6
1.9	Know the Mechanism of the Reactions You Perform	7
1.10	Always Learn Something from the Reaction You Performed	8
1.11	Knowing Reaction Mechanisms Alone Doesn’t Make an Excellent Chemist—But It’s Essential	8
1.12	Patents Do Not Tell You the Full Story of Chemistry	8
1.13	Summarize Your Work After Completing a Synthesis	9
1.14	Two Examples	9
	References	12
2	General Terms and Concepts in Synthetic Organic Chemistry	13
2.1	Reaction Mechanism	13
2.2	Approaches to Draw Reaction Mechanism	13
2.2.1	Linear Way: Catalytic and Noncatalytic Reactions	14
2.2.2	Cyclic Way: Catalytic Reactions	14
2.3	Desired Product	14
2.4	Unexpected Product	14
2.5	Side Reaction	15
2.6	Side Product and By-product	15
2.7	Impurity	15

2.8	Theoretical Yield, Percentage Yield (Yield), Net Yield, and Overall Yield	16
2.9	Intermediate	16
2.10	Transition State	17
2.11	Species	17
2.12	Free Radical	17
2.13	Stoichiometric Reaction	17
2.14	Catalytic Reaction	17
2.15	Material Balance	17
2.16	Electron Balance	18
2.17	Nucleophile	18
2.18	Electrophile	18
2.19	Acid	18
2.20	Base	18
2.21	Acidity and pK_a	19
2.22	Acid-Base Reaction	19
2.23	Reaction Selectivity	20
2.24	Chemoselectivity	20
2.25	Regioselectivity	21
2.26	Stereoselectivity	21
2.27	Iteroselectivity	23
2.28	One-pot Synthesis/Telescoping Process	25
2.29	Cascade Reaction	27
2.30	Multicomponent Reaction	29
2.31	Flow Chemistry	29
2.32	Atom Economy	30
2.33	Green Chemistry	31
2.34	Partial Synthesis, Total Synthesis, and Formal Synthesis	32
2.35	Linear Synthesis and Convergent Synthesis	34
2.36	Divergent Synthesis	36
2.37	Click Chemistry	36
2.38	Parallel Synthesis	37
2.39	Solid-phase Synthesis	38
2.40	Combinatorial Chemistry	38
2.41	Process Chemist versus Medicinal Chemist	39
	References	40
3	General Terms and Concepts in Medicinal Chemistry	43
3.1	What Is a Drug?	43
3.2	Drug Discovery	43
3.3	Medicinal Chemistry	44
3.4	Drug Target	45
3.5	Enzyme	45
3.6	Receptor	46
3.7	Inhibitor	47
3.8	Activator	48

3.9	Drug Design	48
3.10	Ligand-based Drug Design	49
3.11	Structure-based Drug Design	50
3.12	Lipinski's Rule of Five	50
3.13	Lead Compound	51
3.14	Hit-to-Lead	52
3.15	High-Throughput Screening	52
3.16	Pharmacophore	52
3.17	Affinity, Efficacy, and Potency	53
3.18	Structure-Activity Relationship	54
3.19	Partition Coefficient and Log <i>P</i> /Clog <i>P</i>	54
3.20	Drug Candidate	55
3.21	Preclinical Studies	55
3.22	Toxicity	56
3.23	Pharmacokinetics and Pharmacodynamics	56
3.24	Absorption, Distribution, Metabolism, and Excretion	56
3.25	Bioavailability	57
3.26	Pharmacology	58
3.27	Formulation	58
3.28	Active Pharmaceutical Ingredient	59
3.29	Drug Stability	59
3.30	Prodrugs	60
3.31	Deuterium-containing Drug	61
3.32	Antibody Drug Conjugates	62
3.33	Good Laboratory Practice	62
3.34	Good Manufacturing Practice	63
3.35	Chemistry, Manufacturing, and Controls	64
3.36	Contract Research Organization	65
3.37	Investigational New Drug Application	65
3.38	Clinical Trials	65
3.39	New Drug Application	66
	References	67
4	Mechanism Problems from Reactions Give Expected Products	71
4.1	Formation of Noncyclic Compounds	71
	Problem 1: <i>t</i> -BuOK Promoted Isomerization of Terminal Alkyne to Internal Alkyne	71
	Problem 2: Dimerization of Terminal Aziridines to (<i>E</i>)-but-2-ene-1,4-diamines	72
	Problem 3: Thiourea-Mediated Conversion of Alcohols to Alkylhalides	74
	Problem 4: Oxidative Decarboxylation of <i>N</i> -Aroylglycines with Lead(IV) Acetate	76
	Problem 5: Preparation of Aromatic Amines Promoted by DDQ and Ph ₃ P	78

	Problem 6: Conversion of Alkyl Aryl Ketones to α -Arylalkanoic Acids Using DPPA	80
	Problem 7: Synthesis of β -Aryl- α -Keto Acid from Benzaldehyde and Hydantoin	82
	Problem 8: α -Amination of Amides	83
	Problem 9: α -Oxidation of Amides	85
	Problem 10: Tsunoda Reagent for Mitsunobu Reaction	87
	Problem 11: Preparation of Arylacetonitriles from Arylbromides	89
	Problem 12: Transformation of Aromatic Bromides into Aromatic Nitriles	90
	Problem 13: Preparation of Nitriles from Carboxylic Acid by Smiles Rearrangement	91
	Problem 14: Synthesis of Disubstituted Malononitriles	92
	Problem 15: Preparation of 2-Arylacetonitriles from Aromatic Ketones	95
	Problem 16: Synthesis of Aminophosphonate by Birum-Oleksyszyn Reaction	97
	Problem 17: Synthesis of Primary Sulfonamide by using <i>N</i> -Sulfinyl- <i>O</i> -(<i>tert</i> -butyl)hydroxylamine	98
4.2	Formation of Hydrazine Derivatives	101
	Problem 18: Preparation of Hydrazines from Amines by Using Oxaziridines	101
	Problem 19: Preparation of Hydrazines from Alcohols	102
	Problem 20: Synthesis of Arylaceto-hydrazoneyl Cyanide	103
4.3	Formation of Cyclic Alkane and Derivatives	105
4.3.1	Cyclopropane	105
	Problem 21: Preparation of Methyl (1 <i>S</i> ,5 <i>R</i>)-2-oxo-3-oxabicyclo[3.1.0]hexane-1-carboxylate	105
	Problem 22: Synthesis of Cyclopropylamines	107
	Problem 23: Formation of Cyclopropane by Dialkylation of Active Methylene	109
	Problem 24: A Tandem Cyclopropanation Ring-Expansion Reaction	111
4.3.2	Cyclobutane	115
	Problem 25: Synthesis of 3-Ethylbicyclo[3.2.0]hept-3-en-6-one	115
4.3.3	Cyclopentane	117
	Problem 26: Preparation of <i>cis</i> -2-(Methoxycarbonyl)cyclopentane-1-carboxylic Acid	117
	Problem 27: Rearrangement of Furfuryl Alcohol to 4-Hydroxy-2-cyclopentenone	119
4.3.4	Cycloheptane	120
	Problem 28: Preparation of Homobenzylic Ketones by 1,2-shift in 1,1'-disubstituted Olefins	120
4.4	Formation of Aromatic Compounds	122
	Problem 29: Formation of Hexasubstituted Benzene Ring by Cyclization	122

- Problem 30: Vicarious Nucleophilic Substitution of Hydrogen in Aromatic Nitro Compounds 124
- Problem 31: Synthesis of Tetralone from 1-Naphthol and 1,2-Dichlorobenzene 125
- 4.5 Formation of Nonaromatic Heterocycles 126
- 4.5.1 Lactone 126
- Problem 32: Preparation of Thiolactone from Lactone 126
- Problem 33: Preparation of D-Erythronolactone from Erythorbic Acid 129
- Problem 34: Synthesis of L-lyxonolactone-2,3-O-isopropylidene 129
- Problem 35: Thermal Rearrangement of Ozonides 131
- 4.5.2 Hydrofuran 133
- Problem 36: Preparation of 2,2-Dimethyl-5-phenylfuran-3(2H)-one by a Rearrangement 133
- Problem 37: Decarboxylative Elimination of β -Hydroxycarboxylic Acid 134
- 4.5.3 Tetrahydropyran 137
- Problem 38: Construction of Fosdenopterin Core by Viscontini Reaction 137
- 4.5.4 Pyrrolidine 138
- Problem 39: Formation of 2,5-Dibenzyltetrahydropyrrolo[3,4-c]pyrrole-1,3-dione 138
- Problem 40: Synthesis of *trans*-3-substituted Proline Derivatives 139
- Problem 41: Preparation of 5,5-Dimethyl-3-methylene-1-(prop-1-en-2-yl)pyrrolidin-2-one 141
- Problem 42: Synthesis of Heteroaromatic-Fused Pyrrolidines via Cyclopropane Ring-Opening Reaction 144
- Problem 43: Synthesis of Spiro[3*H*-indole-3,2'-pyrrolidin]-2(1*H*)-one 146
- 4.5.5 Piperidine 148
- Problem 44: Synthesis of (2*S*,4*R*)-4-Hydroxypipericolic Acid from Homoallyl Alcohol 148
- Problem 45: Preparation of a Spiropiperidine 151
- Problem 46: Dealkylation of Tertiary Amine with DEAD 153
- Problem 47: A Novel Synthesis of δ -Keto- α -amino Acids 155
- Problem 48: Construction of Morphine Core by Acid Promoted Cyclization 157
- Problem 49: Preparation of 8a-Phenyloctahydroquinolin-4a(2*H*)-ol 159
- Problem 50: Preparation of an Octahydroquinolizine 160
- Problem 51: Preparation of a Chromeno[3,2-*i*]quinolizine 162
- 4.5.6 Imidazoline 163
- Problem 52: Preparation of Phenytoins from Benzils 163
- 4.5.7 Oxazolidine 164
- Problem 53: Preparation of a Chiral (*R*)-5-(Hydroxymethyl)-3-aryloxazolidin-2-one 164
- 4.5.8 Tetrahydropyrimidine 166
- Problem 54: Synthesis of Tetrahydropyrimidinol 166

- 4.5.9 Diazepine 167
Problem 55: Synthesis of 2,3,4,5-Tetrahydro-1H-benzo[e][1,4]diazepine 167
- 4.5.10 Trioxane 170
Problem 56: Formation of 1,2,4-Trioxanes from Cyclic Peroxides and Carbonyl Compounds 170
Problem 57: Synthesis of 1,2,4-Trioxanes from 4-Alkylphenols and Aldehydes 172
Problem 58: A Key Step for Industrial-Scale Synthesis of Artemisinin (Qinghaosu) 173
- 4.6 Formation of Monocyclic Aromatic Heterocycles 175
- 4.6.1 Oxathiolane 175
Problem 59: Synthesis of Substituted 1,3-Oxathiolane 175
- 4.6.2 Pyrrole 177
Problem 60: Preparation of Pyrrole-2-Aldehyde from Pyrrole-2-*t*-butyl ester 177
Problem 61: Synthesis of 2-Formylpyrroles from Pyridinium Iodide Salts 179
Problem 62: Preparation of 2-Aminopyrroles 180
Problem 63: Synthesis of 3-(3,4-Dihydro-2H-pyrrol-5-yl)pyridine (Myosmine) 182
Problem 64: Formation of Substituted Pyrrole by Cyclization of γ -ketonitrile 183
- 4.6.3 Thiophene 186
Problem 65: Synthesis of Trisubstituted Thiophene 186
- 4.6.4 Pyrrol-2-one 188
Problem 66: Preparation of Spiro 1H-Pyrrol-2(5H)-ones by One-Pot Multicomponent Reaction 188
- 4.6.5 Pyridine 191
Problem 67: A General Preparation of Pyridines via the Annulation of Ketones 191
Problem 68: Conversion of Benzenes to Pyridines by *ipso*-selective Nitrene Internalization 192
Problem 69: Synthesis of Multisubstituted Pyridines via HFIP Catalyzed Cyclization 197
Problem 70: Preparation of Multisubstituted Pyridine 199
Problem 71: Preparation of 4-Perfluoroalkylpyridines 201
Problem 72: C-2 Amination of Pyridine 203
Problem 73: C-2 Amination of Pyridine *N*-oxide Derivatives 205
Problem 74: Nucleophilic Cyanation of Pyridines 207
Problem 75: Synthesis of 2-Arylpyridines from Acetophenones 209
Problem 76: Preparation of *penta*-substituted Pyridone 211
- 4.6.6 Imidazole 212
Problem 77: Formation of 2,4-disubstituted Imidazole 212
Problem 78: Synthesis of Substituted 2-Aryl-*N*-benzylbenzimidazoles 213
Problem 79: Preparation of 1-Isopropenyl-1,3-dihydro-2H-benzo[d]imidazol-2-one 216

- 4.6.7 Isoxazole 217
Problem 80: Formation of 5-Chloro-3-phenylbenzo[c]isoxazole 217
Problem 81: Preparation of Isoxazoles from Nitro Compounds and Oxetanes 219
- 4.6.8 Thiazole 221
Problem 82: Preparation of Thiazole by Thiourea 221
Problem 83: Preparation of Thiazole from Sulfoxide During Ceftibuten Synthesis 223
- 4.6.9 Pyrazole 224
Problem 84: Synthesis of Trifluoromethylpyrazoles 224
Problem 85: Preparation of Pyrazole by Sulfur Extrusion 226
Problem 86: Synthesis of 4-(3-Aminopropyl)-5-amino-1-methylpyrazole 227
- 4.6.10 Pyrimidine 229
Problem 87: Formation of 5-Hydroxypyrimidin-4(3*H*)-one by 3,3-sigmatropic Rearrangement 229
Problem 88: Regioselective Chlorination of 1-Methylpyrimidine-2,4,6(1*H*,3*H*,5*H*)-trione 231
Problem 89: An Industrial Synthesis of Orotic Acid 232
Problem 90: 2-Thioxo-2,3-dihydropyrimidin-4(1*H*)-one to Pyrimidine-2,4(1*H*,3*H*)-dione 234
Problem 91: Preparation of *N,N'*-Dicyclohexylbarbituric Acid from DCC and Malonic Acid 235
- 4.6.11 Pyrazine 237
Problem 92: Synthesis of Ethyl 3-(trifluoromethyl)pyrazine-2-carboxylate 237
- 4.6.12 Triazole 239
Problem 93: Preparation of [1,2,4]Triazolo[1,5-*a*]pyridin-2-amine 239
- 4.6.13 Oxadiazole 240
Problem 94: Formation of 1,3,4-Oxadiazole 240
Problem 95: Preparation of 1,2,4-Oxadiazole 241
- 4.6.14 Thiadiazole 243
Problem 96: Formation of 1,2,4-Thiadiazole 243
- 4.6.15 Triazine 245
Problem 97: Synthesis of 1,2,3-Triazines 245
- 4.7 Formation of Bicyclic and Polycyclic Aromatic Heterocycles 248
- 4.7.1 Indole 248
Problem 98: Formation of 2,3-Disubstituted Indole 248
Problem 99: A Novel Synthesis of Indoles by Vinyl Grignard Reagent with Nitroarenes 250
Problem 100: Deprotection of 2-Hydroxyethyl from Indole Derivative 252
- 4.7.2 Indolizine 254
Problem 101: Access to 2-Iodoindolizines via Iodine-Mediated Cyclization of 2-pyridylallenes 254
- 4.7.3 Quinolone 254
Problem 102: Oxidative Rearrangement of Carboline to Quinolone 254

4.7.4	Indazole	257
	Problem 103: A Special Cadogan Reductive Cyclization-Preparation of Indazole	257
	Problem 104: Preparation of Indazoles from 2-Methylanilines	259
	Problem 105: Synthesis of 7-aza-Indazoles by Diels-Alder/Retro-Diels-Alder Cascade	260
	Problem 106: Synthesis of Indazole by Davis-Beirut Reaction	262
4.7.5	Quinazoline	265
	Problem 107: Synthesis of Quinazolines	265
	Problem 108: Carbon Dioxide Mediated Synthesis of Quinazoline-2,4(1H,3H)-dione	266
	Problem 109: Synthesis of 3-Alkylquinazolin-4-ones Promoted by Mukaiyama Reagent	269
	Problem 110: Dimroth Rearrangement in the Preparation of Gefitinib and Erlotinib	270
4.7.6	Thienoquinolizine	272
	Problem 111: A [3+2] Cycloaddition Followed by Sulfur Extrusion	272
4.7.7	Pyridopyrimidine	273
	Problem 112: An Extended Dimroth Rearrangement Catalyzed by MeONa	273
4.7.8	Pyrrolopyrimidine	274
	Problem 113: One-Pot Synthesis of 2-(7H-Pyrrolo[2,3-d]pyrimidin-4-yl) acetates	274
4.7.9	Pyrazolopyrimidine	276
	Problem 114: Cyclization of Diazo Compound with Aldehyde	276
4.8	Miscellaneous	277
4.8.1	Steroid	277
	Problem 115: Formation of Cyclopropane Ring in a Nucleophile Substitution on Steroid	277
	Problem 116: Preparation of 21-Hydroxypregna-4,9(11), 16-triene-3,20-dione-21-acetate	280
4.8.2	Macrolide	281
	Problem 117: An Ascomycin Rearrangement	281
4.8.3	Gibberellin	283
	Problem 118: An Acyloin Rearrangement in Gibberellin	283
4.8.4	Cannabicitran	284
	Problem 119: Formation of Cannabicitran During the Synthesis of Cannabichromene	284
4.8.5	Serratezomine	287
	Problem 120: Transformation of Serratine into Serratezomine A	287
4.8.6	Vincamine	288
	Problem 121: Preparation of Vincamine from Tabersonine	288
	References	290

5	Mechanism Problems from Reactions Give Unexpected, Undesired, or Side Products	305
5.1	Formation of Noncyclic Alkane and Derivatives	306
5.1.1	Alcohol	306
	Problem 122: An Unexpected Impurity from a Grignard Reaction	306
	Problem 123: Formation of a Dimer Impurity in the Development of Delafloxacin	308
	Problem 124: Formation of an Amidino-Diol Side Product	310
5.1.2	Amine	312
	Problem 125: Formation of Ketoamine During Semmler–Wolff Aromatization	312
	Problem 126: Formation of an Aniline Impurity by Smiles Rearrangement	314
5.2	Formation of Cyclic Alkane and Derivatives	316
5.2.1	Cyclopropane	316
	Problem 127: Formation of a Cyclopropane Impurity	316
5.3	Formation of Aromatic Compounds	318
5.3.1	Benzene	318
	Problem 128: Formation of an Undesired Substituted Benzene Side Product	318
5.4	Formation of Nonaromatic Heterocycles	320
5.4.1	Aziridine	320
	Problem 129: Formation of an Aziridine-a Neighboring Group Participated Cyclization	320
5.4.2	Pyrrolidine	323
	Problem 130: Formation of Ring-contracted Side Product During Fluorination	323
5.4.3	Piperidine	326
	Problem 131: An Unusual DAST-Mediated Rearrangement	326
5.4.4	Tetrahydropyrazine	329
	Problem 132: Formation of an Unexpected Tetrahydropyrazine Product	329
5.4.5	Tetrahydropyrimidine	332
	Problem 133: Formation of Impurities During a CDI-promoted Cyclization	332
5.4.6	Oxazepane	334
	Problem 134: An Unusual Stevens Rearrangement Catalyzed by Acid	334
5.4.7	Tetrahydroquinoline	336
	Problem 135: Formation of Unexpected Tetrahydrobenzoquinoline Side Product in a Hydrogenation	336

5.5	Formation of Monocyclic Aromatic Heterocycles	338
5.5.1	Pyrrole	338
	Problem 136: Formation of an Amino Pyrrole Impurity	338
5.5.2	Pyridine	341
	Problem 137: Pyridyl Walks to Hydroxyl from Sulfone During an Alkylation	341
5.5.3	Pyrazole	343
	Problem 138: Ring Expansion by [3 + 2] Cycloaddition During the Synthesis of Pyrazoles	343
5.5.4	Oxazole	346
	Problem 139: Formation of 2-(2,6-difluorophenyl)-4-(<i>p</i> -tolyl)oxazole as an impurity	346
	Problem 140: Formation of an Oxazoline Impurity in the Synthesis of a M1 Agonist	349
5.5.5	Triazole	351
	Problem 141: Formation of Dimethylcarbamoyl-OBt in a HBTU-promoted Amide Preparation	351
5.5.6	Tetrazole	353
	Problem 142: Formation of a Tetrazole Impurity Caused by Acetone	353
5.5.7	Diazepine	355
	Problem 143: Accidental Discovery of Librium	355
5.6	Formation of Bicyclic Aromatic Heterocycles	356
5.6.1	Benzofuran	356
	Problem 144: Formation of Two Benzofuran Side Products During the Synthesis of Morin	356
5.6.2	Benzoxazolinone	361
	Problem 145: Formation of Undesired Benzoxazolinone from <i>N</i> ,2-Dihydroxybenzamide	361
5.6.3	Quinoline	363
	Problem 146: Formation of Quinoline-4-carboxylic Acids by Pfitzinger Reaction Conditions	363
	Problem 147: Formation of a Tricyclic Impurity During Alkylation of 8-hydroxyquinoline	365
5.6.4	Naphthyridine	368
	Problem 148: Unexpected Formation of a Dibenzo[<i>c,f</i>]-2,7-naphthyridine-3,6-diamine	368
5.6.5	Pteridine	370
	Problem 149: Formation of Two Pteridine Impurities During a Synthesis of Dexrazoxane	370
5.7	Miscellaneous	372
5.7.1	Steroid	372
	Problem 150: Formation of Impurity F of Clobetasol Propionate	372
	Problem 151: Formation of a 24-Methylene Steroidal Impurity	373

5.7.2	Terramycin	375
	Problem 152: An Unusual Reaction of Terramycin with Methyl Iodide	375
5.7.3	Cephem	376
	Problem 153: Degradation of Cephem Intermediate	376
	References	378
