

I **Table of content**

I Table of content I

II List of figures..... V

III List of tables VI

IV Abbreviations VII

1 Introduction 1

 1.1 Herpesviruses..... 1

 1.1.1 Taxonomy and Classification..... 1

 1.1.2 Virion structure and genome organization 1

 1.2 Human herpesviruses 6A and 6B 3

 1.2.1 History and epidemiology 3

 1.2.2 Genome structure and content 4

 1.2.3 Life cycle..... 5

 1.2.3.1 Viral entry..... 6

 1.2.3.2 Lytic infection and viral replication 6

 1.2.3.3 Viral latency 7

 1.2.4 Genome Integration into host chromosomes..... 8

 1.2.4.1 Integrated HHV-6A/B genome: structure and integration locus 9

 1.2.4.2 Inherited chromosomal integrated HHV-6A/B (iciHHV-6A/B) 10

 1.2.4.3 Integration mechanism..... 11

 1.2.5 Viral Reactivation..... 14

 1.2.5.1 Clinical outcomes..... 15

 1.2.5.2 Molecular models for HHV-6A/B reactivation..... 15

 1.3 CRISPR/Cas9 system 17

 1.3.1 CRISPR/Cas9 biology and mechanism..... 17

 1.3.2 CRISPR/Cas9 applications in research 19

 1.4 Human telomeres 20

 1.4.1 Structure and function..... 20

 1.4.2 Telomere length maintenance 20

 1.4.3 Telomere-binding proteins 21

 1.5 Project aims..... 22

2 Excision of integrated human herpesvirus 6A genomes using CRISPR/Cas9
 technology 23

 2.1 Abstract 24

 2.2 Importance..... 24

 2.3 Introduction..... 24

 2.4 Results..... 25

Table of content

2.4.1	Generation and characterization of Cas9-expressing cells for the removal of the HHV-6A genome.....	25
2.4.2	Removal of integrated HHV-6A genomes using specific gRNAs.....	26
2.4.3	Removal of the integrated HHV-6A genome by transient expression of Cas9. ...	28
2.4.4	Removal of integrated HHV-6A genomes from iciHHV-6A patient cells.....	30
2.4.5	Removal of integrated HHV-6A genomes by sorting Cas9-expressing cells.....	34
2.4.6	Consecutive removal of integrated HHV-6A genomes.	34
2.4.7	Analysis of the excision sites after the HHV-6A genome removal.....	36
2.5	Discussion	38
2.6	Materials and Methods	40
2.6.1	Cell lines and virus.....	40
2.6.2	Lentivirus delivery of Cas9.....	40
2.6.3	Generation of HHV-6A-specific gRNAs	40
2.6.4	Generation and delivery of gRNAs and Cas9 + gRNA vectors.....	40
2.6.5	Cas9 protein detection by flow cytometry and immunofluorescence	41
2.6.6	Detection of the virus-encoded GFP upon stimulation	42
2.6.7	Quantification of the HHV-6 genome by qPCR.....	42
2.6.8	Detection of HHV-6A immediate early gene expression.....	42
2.6.9	Detection of HHV-6A genomes by FISH.....	42
2.6.10	Sequencing of the excision junction after HHV-6 genome removal.....	42
2.6.11	Statistical analysis	43
2.6.12	Ethics approval and consent to participate.....	43
2.6.13	Data availability.....	43
2.7	Supplemental material	44
2.8	Acknowledgments	47
2.9	References	48
3	Impact of host telomere length on HHV-6 integration	57
3.1	Abstract	58
3.2	Introduction.....	58
3.3	Materials and Methods	59
3.3.1	Cells and Virus.....	59
3.3.2	HHV-6A Integration Assay.....	59
3.3.3	Quantitative PCR.....	59
3.3.4	Telomere Quantitative Fluorescent In Situ Hybridization.....	59
3.3.5	HHV-6 and Telomere qFISH.....	60
3.3.6	Confocal Microscopy	60
3.3.7	Microscopy Data Processing	60
3.3.8	Statistical Analysis.....	60

Table of content

3.4	Results.....	60
3.4.1	Telomere Length in HeLa Kyoto-Derived Cell Lines.....	60
3.4.2	Telomere Length and HHV-6 Integration into Telomeres	63
3.4.3	Length of Telomeres Harboring Integrated HHV-6	63
3.5	Discussion	65
3.6	Author Contributions	65
3.7	Funding.....	66
3.8	Acknowledgments	66
3.9	Conflicts of Interests	66
3.10	References	66
4	Discussion.....	73
4.1	General Discussion	73
4.2	A CRISPR/Cas9-based approach to remove integrated HHV-6A genome from latently infected cells.....	74
4.3	Involvement of host telomeres length in HHV-6A integration	77
4.4	Final remarks and outlooks	79
5	Zusammenfassung.....	81
6	Summary.....	82
7	References.....	83
8	List of publications.....	107
8.1	Scientific publication	107
8.2	Talks and poster presentations	108
9	Acknowledgments	109
10	Funding sources.....	110
11	Conflicts of interests.....	111
12	Declaration of Independence	112
