

Inhaltsverzeichnis

Zero-Emission-Transport: The Most Auspicious Energy Carriers for a Sustainable Future	1
<i>Thomas Nickels and Frank Opferkuch</i>	
How Dual Fuel (DF) Can Help to Decarbonize Certain Off-Road Application	11
<i>Bouzid Seba and Ulrich Weiss</i>	
100% H ₂ S4000 Engine for PowerGen Applications	25
<i>Andrea Prospero, Christoph Luckas, Tomas Bartkowski, Rudolf Hoff, Jonathan Lipp, Alexander Wasgindt, and Carsten Baumgarten</i>	
The Emitec Approach to the Low NO _x Frontier; Solutions for LCVs and HCVs	39
<i>Manuel Presti, Jan Kramer, and Bin Hu</i>	
Optimal Thermal Management Solutions to Support Ultra-Low NO _x Demands of Future in Off-Highway Industry	52
<i>Naveen Sridharan, Mariusz Pietrzyk, Bavo Fallon, Silva Francisco, Anthony Gohel, and Sandra Gaonac'h</i>	
Exhaust Aftertreatment for Future Emission Legislation for Non-Road Vehicles	68
<i>Jelto Frerichs, Martin Weber, Joseph Dembler, Hubertus Ulmer, and Thaddaeus Delebinski</i>	
Aftertreatment Concepts for Commercial H ₂ Internal Combustion Engine	81
<i>Onur Barış, İlker Güler, Deniz Tanımlı, and Hannes Noll</i>	
The E-Deutz System – A Modular, Electric Propulsion System for Mobile and Stationary Machinery	97
<i>Henry Kwee, Andreas Bubert, and Thomas Brehmer</i>	
Superior Continuous Torque Electric Motor	110
<i>Leonard Lorenz, Christoph Schmülling, and Holger Oechslen</i>	
Parallel-Series Hybrid Powertrain Concept for a Wheel Loader	120
<i>Yuki Kakichi, Stefan Pischinger, Joschka Schaub, Arne Müller, and Ryuhei Kawano</i>	

Dedicated System Component Development for H ₂ -Engines in Heavy Duty Applications	134
<i>Leonardo Morgado, Guilherme Faria, Holger Ehnis, and Rémi Rabuté</i>	
Schaeffler's new i-Valvetrain Systems vs. Electrically Heated Catalysts	152
<i>Stefan Hardes, Piergiacomo Traversa, Dr. Michael Elicker, and Nicola Morelli</i>	
Development of Lubricant for Hydrogen Combustion Engines—Challenges and Opportunities	173
<i>Nicolas Obrecht, Bruno Griffaton, Pierre Chapelot, and Steve Faure</i>	
Holistic Solution Enabling High Power Density & Efficiency H ₂ -Ice	192
<i>Emmanuella Sotiropoulou, Luigi Tozzi, Keith Brooks, David Lepley, Mario Pommermayr, and Bernhard Zemmann</i>	
Electrically Heated Mixer for Low Temperature AdBlue Dosing, Mitigating Deposit, and Meeting Future Low NO _x and GHG Regulations	206
<i>B. Vernham, V. Kadam, Mansour Masoudi, Nick Poliakov, and Sahm Noorfeshan</i>	
Active Crankcase Ventilation and Aeration of H ₂ -ICEs	224
<i>Eike Stitterich and Martin Rölver</i>	
Combustion and Thermal Development of a Heavy-Duty Hydrogen IC Engine	237
<i>John Hughes, Richard Osborne, Richard Penning, Ray Sullivan, David Bell, Jan Hynous, and Charles Turquand D'Auzay</i>	
Single-Cylinder- and Multi-Cylinder-Engine Investigation on TCG 7.8 H ₂ —further Development Steps for the Realization of a H ₂ Engine for NRMM	257
<i>Georg Töpfer, Jörg Seibel, Oliver Dingel, Manuel Glauner, Sascha Prehn, Jules Dinwoodie, and Bert Buchholz</i>	
The New E38 MAN Stationary Gas Engine for Power and Heat Generation	269
<i>Philipp Wöhner, Thorsten Bachmann, Martina Leistner, Thomas Malischewski, Friedrich Menzinger, and Manuel Stenglein</i>
