Design and Optimization for Additive Manufacturing

Konzept einer additiven Großfertigungsanlage zur skalenunabhängigen additiven Fertigung und Reparatur 1
Jens Niedermeyer, Marcus Oel, Ina Meyer, Timo Stauß, Lennart Mesecke, Myriam Maalaoui, Philipp Gerhards, Jonas Bitter-Davidts, Florian Eibl, Tobias Ehlers und Roland Lachmayer

Optimising Fatigue Quality Assurance in Additive Manufacturing: A Review on Internal Defects and Surface Roughness 19
Sebastian Mansky, Stefan Grottker, Arthur Seibel and Ingomar Kelbassa

An integrated design process for lightweight AM products using the DED process 33
Tobias S. Hartwich, Finn H. Christiansen, Lukas Schwan and Dieter Krause

Knowledge-Based Postprocessing of Topology Optimized Components using Additive Manufacturing as an Example 49
Ali Al-Zuhairi and Roman Teutsch

Mikrostruktursimulation für die Additive Fertigung von Metallen – eine Übersicht 65
Shayan Kasiri Habibabadi und Henning Wessels

The Role or Rule of the Development Methodology for Additive Manufacturing 77
Sebastian Magerkohl and Balázs Magyar

Innovative Applications for Additive Manufacturing and Printed Optics

Progress in Additive Manufacturing of Optical Elements 95

Tobias Biermann, Lennart Mesecke, Simon Teves, Panpan Xia,
Arved Ziebehrl, Tobias Grabe, Katharina Rettschlag, Ivo Ziesche,
Bernhard Roth and Roland Lachmayer

Fused Deposition Modeling and its Extension Through Metal-Filled Filaments as a Means of Self-Help for Individuals with Physical Disabilities ... 117

Manuel Ott, Philipp Jung, Christian Bödger, Rainer Koch, Iryna Mozgova
and Thomas Tröster

Additive Manufacturing Process

Development and Evaluation of a Compact Processing Head for Additive Manufacturing with Laser-Assisted Double-Wire Welding with Nontransferred Arc 131

Kai Biester, Marius Bernaschek, Marius Lammers, Alexander Barroi,
Sörn Ocylok, Volker Krause, Ulrich Prank, Florian Wagner,
Richard Banaschik, Nick Schwarz, Jörg Hermsdorf and Stefan Kaierle

Reduction of Sintering Distortion in Metal Binder Jetting – A Tribological Approach 149

Heiko Blunk and Arthur Seibel

3D-Solder-Printing for Electrical Powerlines 167

Michael Petke, Christian Schmid, Thomas Schmiedinger
and Markus Ehrlenbach

School for Additive Manufacturing

Designing a Methodological Framework for the Individualization of Prosthetic Implants: A Literature-Based Approach 181

Patrik Müller, Paul Christoph Gembarski and Roland Lachmayer

Highlighting New Possibilities: A Comparison of SLOT and μ CT in the Analysis of 3D Printed Optical Elements 207

Ole Hill, Tobias Biermann, J. Gerrit Eckert, Khodor Sleiman,
Lennart Mesecke, Katharina Rettschlag, Peter Jäschke, Stefan Kaierle,
Nadja C. Bigall, Tammo Ripken, Roland Lachmayer and Merve Wollweber

Surface Modification of Giant Shell Quantum Dots for Enhanced Stability in Additive Manufactured Silicone Waveguides 219

J. Gerrit Eckert, Tobias Biermann, Larissa Schoske, Rebecca T. Graf,
Roland Lachmayer and Nadja C. Bigall

Additive Manufacturing of Metallic Multi-Material Parts: Local Conductivity Adjustment through Functionally Graded Material Transitions of 316L and CuCrZr	231
Ina Meyer, Leon Glitt and Tobias Ehlers	
Corrosion Behavior of an Additively Manufactured Functionally Graded Material	247
Timon Steinhoff, Lennart Vincent Hölscher, Christian Klose and Thomas Hassel	
Development of a Laser Double-Wire Directed Energy Deposition Process for Functionally Graded Materials and In-Situ Alloying	261
Nick Schwarz, Jörg Hermsdorf, Henning Ahlers and Roland Lachmayer	
Autorenverzeichnis	273
