

Contents

- iv Acknowledgement
- 1 Introduction

Adrenal

- 2 Congenital adrenal hyperplasia
- 4 Cushing syndrome
- 6 Endocrine hypertension
- 8 Hypocortisolism

Calcium and bone

- 12 Hypercalcemia
- 16 Hypocalcemia
- 18 Neonatal hypocalcemia
- 20 Rickets
- 24 Fractures and suspicion of osteoporosis

Disorders of sexual development

- 26 Disorders of sex development
- 28 Isolated micropenis
- 30 Undescended testis
- 32 Turner syndrome
- 34 Klinefelter syndrome

Glucose and metabolism

- 36 Hyperglycemia
- 38 Diabetic ketoacidosis
- 40 Obesity
- 44 Hypoglycemia

Growth and development

- 48 Failure to thrive
- 50 Delayed puberty in males
- 52 Delayed puberty in females
- 54 Short stature
- 58 Growth hormone treatment
- 62 Tall stature

Diabetes insipidus

- 66 Diabetes insipidus

Puberty

- 68 Premature pubarche/adrenarche
- 70 Precocious breast development in girls
- 74 Precocious increase of testicular volume
- 76 Gynecomastia
- 78 Hirsutism
- 80 Primary amenorrhea
- 82 Secondary amenorrhea or oligomenorrhea

Thyroid

- 84 Goiter
- 86 Hyperthyroidism
- 88 Hyperthyrotropinemia (subclinical hypothyroidism)
- 90 Thyroid nodules
- 92 Congenital hypothyroidism
- 94 Acquired hypothyroidism
- 96 Subject Index
