About the Author	XV
List of Abbreviations	XVII
1 Statistical Signs and Symbols	1
2 Descriptive Statistics	3
2.1 Empirical Distributions	3
2.1.1 Frequencies	3
2.1.2 Cumulative Frequencies	4
2.2 Mean Values and Measures of Dispersion	6
2.2.1 Mean Values	6
2.2.2 Measures of Dispersion	12
2.3 Ratios and Index Figures	22
2.3.1 Ratios	22
2.3.2 Index Figures	25
2.3.3 Peren-Clement Index (PCI)	38
2.4 Correlation Analysis	50
2.5 Regression Analysis	51
2.5.1 Simple Linear Regression	51
2.5.1.1 Confidence Intervals for the Regression Coefficients of a Simple Linear Regression Function	55
2.5.1.2 Student's t-Tests for the Regression Coefficients of a Simple Linear Regression Function	57
	IX

2.5.2	Multiple Linear Regression	62
2.5.2.1	Confidence Intervals for the Regression Coefficients of a Multiple Linear Regression Function	64
2.5.2.2	Student's t-Tests for the Regression Coefficients of a Multiple Linear Regression Function	66
2.5.3	Double Linear Regression	66
2.5.3.1	Confidence Intervals for the Regression Coefficients of a Double Linear Regression Function	69
2.5.3.2	Student's t-Tests for the Regression Coefficients of a Double Linear Regression Function	71
2.5.4	Dummy Variables in Regression Analysis	76
2.5.4.1	Introduction	76
2.5.4.2	Methodology	76
2.5.4.2.1	Derivation of the Simple and Multiple Regression Function ..	76
2.5.4.2.2	Estimation of the Regression Parameters according to the Least Squares Method	77
2.5.4.2.3	Integration of Categorical Influences via Dummy Variables ...	79
2.5.4.3	Quality Measures	82
2.5.4.3.1	Goodness of Fit (Global Quality Criteria)	82
2.5.4.3.2	Quality Criteria of the Regression Coefficients	85
2.5.4.3.3	Checking the Model Assumptions	87
2.5.4.4	Examples	94
2.5.4.5	Conclusion	97
3	Inferential Statistics	99
3.1	Probability Calculation	99
3.1.1	Fundamental Terms/Definitions	99
3.1.2	Theorems of Probability Theory	104

3.2	Probability Distributions	110
3.2.1	Concept of Random Variables	110
3.2.2	Probability, Distribution and Density Function	111
3.2.2.1	Discrete Random Variables	111
3.2.2.2	Continuous Random Variables	113
3.2.3	Parameters for Probability Distributions	116
3.3	Theoretical Distributions	118
3.3.1	Discrete Distributions	118
3.3.2	Continuous Distributions	128
3.4	Statistical Estimation Methods (Confidence Intervals) ..	148
3.4.1	Confidence Interval for the Arithmetic Mean of the Population μ	148
3.4.2	Confidence Interval for the Variance of the Population σ^2	152
3.4.3	Confidence Interval for the Share Value in the Population θ	154
3.4.4	Confidence Interval for the Difference of the Mean Values of Two Populations μ_1 and μ_2	156
3.4.5	Confidence Interval for the Difference of the Share Values of Two Populations θ_1 and θ_2	160
3.5	Determination of the Required Sample Size	163
3.5.1	Determination of the Required Sample Size for an Estimation of the Arithmetic Mean μ	163
3.5.2	Determination of the Required Sample Size for an Estimation of the Share Value θ	165
3.6	Statistical Testing Methods	167
3.6.1	Parameter Tests	167
3.6.1.1	Arithmetic Mean with Known Variance of the Population One Sample Test	167
3.6.1.2	Arithmetic Mean with Unknown Variance of the Population One Sample Test	170
3.6.1.3	Share Value One Sample Test	172
3.6.1.4	Variance One Sample Test	174
3.6.1.5	Difference of Two Arithmetic Means with Known Variances of the Population Two Samples Test	177

3.6.1.6	Difference of Two Arithmetic Means with Unknown Variances of the Populations under the Assumption that their Variances are Unequal Two Samples Test ..	179
3.6.1.7	Difference of Two Arithmetic Means with Unknown Variances of the Populations under the Assumption that their Variances are Equal Two Samples Test	182
3.6.1.8	Difference of Two Share Values Two Samples Test	185
3.6.1.9	Quotients of Two Variances Two Samples Test	188
3.6.2	Distribution Tests (Chi-Squared Tests)	191
3.6.2.1	Chi-Squared Goodness of Fit Test	191
3.6.2.1.1	Chi-Squared Goodness of Fit Test for a Discrete Distribution of the Population	191
3.6.2.1.2	Chi-Squared Goodness of Fit Test for a Continous Distribution of the Population	197
3.6.2.2	Chi-Squared Independence Test	201
3.6.2.3	Chi-Squared Homogeneity Test	207
3.6.3	Yates's Correction	212
4	Probability Calculation	215
4.1	Terms and Definitions	215
4.2	Definitions of Probability	216
4.2.1	The Classical Definition of Probabilty	216
4.2.2	The Statistical Definition of Probability	217
4.2.3	The Subjective Definition of Probability	218
4.2.4	Axioms of Probability Calculation	218
4.3	Theorems of Probability Calculation	220
4.3.1	Theorem of Complementary Events	220
4.3.2	The Multiplication Theorem with Independence of Events	221
4.3.3	The Addition Theorem	221
4.3.4	Conditional Probability	223

4.3.5	Stochastic Independence	224
4.3.6	The Multiplication Theorem in General Form	225
4.3.7	The Theorem of Total Probability	225
4.3.8	Bayes' Theorem (Bayes' Rule)	227
4.3.9	Overview of the Probability Calculation of Mutu- ally Exclusive and Non-Exclusive Events	230
4.4	Random Variable	231
4.4.1	The Concept of Random Variables	231
4.4.2	The Probability Function of Discrete Random Variables	231
4.4.3	The Distribution Function of Discrete Random Variables	233
4.4.4	Probability Density and Distribution Function of Continuous Random Variables	234
4.4.5	Expected Value and Variance of Random Variables	239

XIV	Contents
A Statistical Tables	243
B Case Study: Regression Analysis Using Dummy Variables in R	321
B.1 Introduction	322
B.2 Data Preparation	323
B.3 Conducting the Regression Analysis	325
B.3.1 Single Regression	325
B.3.2 Multiple Regression with Dummy Variables	327
C Bibliography	331
Index	341
