Prologue	xi
1 Introduction	1
2 Systems Thinking	9
2.1 Constructivism and Second-Order Cybernetics	11
2.1.1 Emergence	12
2.1.2 Linking Perception and Action	16
2.2 Models	21
2.3 Pragmatism	24
2.4 Modeling of Technical Systems	25
2.4.1 Functional Model of Technical Systems	25
2.4.2 Structural Models	30
2.4.3 Hierarchical Models	40
2.4.4 Group Theory and Logical Type Theory	45
2.4.5 Process Models	47
2.4.6 Aspects of Systems	75
2.5 Context and Path Dependency	76
2.6 Modeling of Socio- and Psycho-Technical Systems	82
2.6.1 Systems of Systems	84
2.6.2 Extended Functional Models	85
3 Life Cycle Model	115
3.1 Quantitative Models of the System Life Cycle	120
3.1.1 Model of the Utilization Phase without Competition	121
3.1.2 Model of the Utilization Phase with Competition	129
3.1.3 Model of the Development Phase	134
3.2 Problems and Tasks	137
3.2.1 Continuity versus Discontinuity	139
3.2.2 Degree of Automation	140
3.2.3 Sequence versus Circularity	141
3.2.4 Consistent Approach versus Consistent Results	142

3.2.5	Complementarity of Project and Process	142
3.3	L 1: Development Phase	143
3.3.1	From the Rough to the Detail	144
3.3.2	Problem-solving Cycle	150
3.4	L 2: Utilization Phase	158
3.5	L 3: Change Management	163
3.5.1	Second-order Changes	164
3.5.2	Intervention	167
3.5.3	Participation	170
3.5.4	Mediation between Implicit and Explicit Knowledge	173
3.5.5	Intermediary Configuration of the Conversion of Skills into Knowledge	174
3.6	L 4: Palliation Phase	177
3.7	L 5: Management of Exceptional Situations	179
3.7.1	Approaches to Managing Exceptional Situations	184
3.7.2	Elements of a Management System for Exceptional Situations	188
3.8	PDCA Cycle	194
4	L 1: Systems Design	199
4.1	P 1: Initiation of a Design Project	200
4.1.1	P 1.1: Occasion	206
4.1.2	P 1.2: Situation Analysis	207
4.1.3	P 1.3: Target Definition	208
4.1.4	P 1.4: Method Planning	209
4.1.5	P 1.5: Implementation of the Order	219
4.1.6	P 1.6: Evaluation	221
4.2	P 2: Situation Analysis	221
4.2.1	P 2.1: Occasion	222
4.2.2	P 2.2: Situation Analysis	222
4.2.3	P 2.3: Target Definition	225
4.2.4	P 2.4: Method Planning	226
4.2.5	P 2.5: Conducting the Situation Analysis	286
4.2.6	P 2.6: Evaluation	287
4.3	P 3: Target Definition	290
4.3.1	P 3.1: Occasion	290
4.3.2	P 3.2: Situation Analysis	291
4.3.3	P 3.3: Target Definition	291
4.3.4	P 3.4: Method Planning	297
4.3.5	P 4.5: Target Definition	321
4.3.6	P 3.6: Evaluation	321
4.4	Method Planning	322
4.4.1	P 4.1: Occasion	326
4.4.2	P 4.2: Situation Analysis	326
4.4.3	P 4.3: Target Definition	327
4.4.4	P 4.4: Method Planning	328

4.4.5	P 4.5: Concrete Methods	343
4.4.6	P 4.6: Evaluation	385
4.5	P 5: Development of a Solution	386
4.5.1	P 5.1: Occasion	387
4.5.2	P 5.2: Situation Analysis	387
4.5.3	P 5.3: Target Definition	387
4.5.4	P 5.4: Method Planning	387
4.5.5	P 5.5: Synthesis	388
4.5.6	P 5.6: Analysis	394
4.6	P 6: Evaluation	397
4.6.1	P 6.1: Occasion	399
4.6.2	P 6.2: Situation Analysis	399
4.6.3	P 6.3: Target Definition	400
4.6.4	P 6.4: Method Planning	401
4.6.5	P 6.5: Conducting the Evaluation	412
4.6.6	P 6.6: Evaluation of the Evaluation	416
5	L 3: Phase Transitions	419
6	L 2: Systems Management	427
6.1	Organizational Structure	431
6.1.1	Hierarchy	434
6.1.2	Functional Differentiation	442
6.2	Process Organization	454
6.2.1	Bureaucracy	461
6.2.2	Continuation of Design Measures	465
	Epilogue	467
	References	469
	Index	499
