1	Introduction	1
	References.....	3
2	Historical	5
	References.....	12
3	Meteorological and Electrical Engineering Basics	15
3.1	Thunderstorms.....	15
3.2	Lightning.....	16
3.3	Lightning Detection Systems.....	17
	References.....	18
4	Mechanisms of Energy Transfer	21
4.1	Direct Strike.....	21
4.2	Side Flash.....	23
4.3	Step Voltage.....	24
4.4	Contact Voltage.....	26
4.5	Wire-Mediated Lightning Accident.....	27
4.6	Upward Lightning.....	28
4.7	Barotrauma.....	29
4.8	Blinding.....	30
4.9	Secondary Accident Mechanism.....	31
4.10	Magnetic Field.....	32
	References.....	33
5	First Aid and Preclinical Emergency Medicine	37
5.1	Self-Protection.....	37
5.2	Triage.....	39
5.3	Lay Aid and Preclinical Emergency Medicine.....	40
5.3.1	Severity of Injuries.....	40
5.3.2	Causes of Respiratory and/or Cardiac Arrest.....	41

5.3.3	Basic Measures by Lay Helpers	41
5.3.4	Advanced Measures by Qualified Personnel	43
5.4	Transport	44
	References	45
6	Clinical Medicine	49
6.1	Diagnosis	49
6.1.1	Diagnosis of Lightning Strike Accidents	49
6.1.2	Principles of Diagnosing Individual Health Damages	51
6.2	Diagnosis of Early and Late Effects, Therapy, Outcome	52
6.2.1	Skin	52
6.2.2	Cardiovascular System	55
6.2.2.1	Cardiac Arrhythmias	56
6.2.2.2	Anginal Complaints and Lightning-Induced Myocardial Necrosis	56
6.2.2.3	Ventricular Hypokinesia	58
6.2.2.4	Hypertension	60
6.2.2.5	Hemorrhages	60
6.2.2.6	Pericarditis	60
6.2.2.7	Pacemakers	61
6.2.2.8	ECG Changes	61
6.2.2.9	Laboratory Parameters	62
6.2.2.10	Aorta	62
6.2.2.11	Therapy and Outcome	62
6.2.3	Central and Peripheral Nervous System	63
6.2.3.1	Classification of Injuries	64
6.2.3.1.1	Neurological Disorders According to Topographical Aspects	64
6.2.3.1.2	Neurological Disorders According to the Time of Occurrence	67
6.2.3.2	Diagnosis	69
6.2.3.3	Neuropsychological Consequences	70
6.2.3.4	Psychiatric Consequences	71
6.2.3.5	Rehabilitation	72
6.2.4	Audiovestibular System	74
6.2.4.1	Tympanic Membrane Rupture	74
6.2.4.2	Hearing Loss	76
6.2.4.3	Tinnitus	77
6.2.4.4	Balance Disorders	77
6.2.4.5	Further Damages	77
6.2.4.6	Therapy and Outcome	77

6.2.5	Visual System	78
6.2.5.1	Cataract	78
6.2.5.2	Retinal Damage	79
6.2.5.3	Inflammations	79
6.2.5.4	Further Damages	80
6.2.5.5	Therapy and Outcome	81
6.2.6	Respiratory Tract	81
6.2.7	Musculoskeletal System	84
6.2.7.1	Bone Fractures	84
6.2.7.2	Damage to the Skeletal Muscles	85
6.2.8	Kidneys	86
6.2.9	Pregnancy	88
6.2.10	Digestive Tract	89
6.2.11	Endocrine System	90
6.2.12	Other Localizations	90
	References	90
7	Death by Lightning Strike	103
7.1	External Post-Mortem Examination	104
7.1.1	Victim's Surroundings	105
7.1.2	Clothing and Jewelry of the Victim	113
7.1.3	Findings on the Corpse	116
7.1.4	Problems in Making a Diagnosis	132
7.1.5	Technical Support in Diagnosis	133
7.1.6	Diagnosis Encryption	134
7.1.7	Interdisciplinary Accident Analysis	134
7.2	Pathophysiology of the Cause of Death	134
7.2.1	Acute Death	135
7.2.2	Death After a Time Interval	136
7.3	Autopsy	139
7.4	Epidemiological Data	147
7.4.1	Frequency and Incidence	148
7.4.2	Gender Distribution	151
7.4.3	Distribution by Age	152
7.4.4	Temporal Distribution	153
7.4.5	Activities of the Victims and Accident Locations	154
7.4.6	Case Numbers per Lightning Accident	155
7.5	Lethality	156
	References	158
8	Prevention	167
8.1	Location-dependent Risk	167
8.2	Preventive Measures	169

8.2.1	Basic Knowledge	169
8.2.2	Prevention through Planning	170
8.2.3	Rules for an Approaching Thunderstorm.	171
8.2.4	Rules at the End of a Thunderstorm	172
8.2.5	Relatively Safe Places	173
	8.2.5.1 Buildings.	173
	8.2.5.2 Vehicles.	174
