Preface — V

1	Elliptic boundary value problems and harmonic analysis methods for abstract evolution equations — 1
1.1	Basic function spaces and classical results from harmonic analysis — 1
1.2	Elliptic boundary value problems — 22
1.3	Background on harmonic analysis methods for evolution equations — 37
1.4	Scaling and well-suited space-time Banach spaces for evolution equations — 46
1.5	Sobolev spaces and wave operator adapted to Schrödinger operator with inverse-square potential — 56
1.5.1	The wave operator — 60
1.5.2	Applications — 61
1.5.3	Local smoothing estimate — 64
1.5.4	Linear profile decomposition in $\dot{H}_o^1(\mathbb{R}^3)$ — 67
2	Parabolic equations — 79
2.1	Space-time estimates for linear parabolic equations — 80
2.2	The Cauchy problem for semilinear heat equations (I) — 93
2.3	The Cauchy problem for semilinear heat equations (II) — 105
2.4	Abstract equations of parabolic type — 123
3	Navier–Stokes equations — 131
3.1	Classical theory of the Navier–Stokes equations — 134
3.2	Methods of space-time estimates — 149
3.3	Local well-posedness—the Littlewood–Paley method — 161
3.4	The Navier–Stokes equations in critical spaces — 175
3.5	Notes — 190
4	Schrödinger equations — 195
4.1	Space-time estimates for linear Schrödinger equations — 198
4.2	Progress in classical studies of nonlinear Schrödinger equations — 207
4.3	Well-posedness and scattering theory below energy norm — 224
4.4	I-method — 247
4.5	Global well-posedness and scattering for the energy-critical nonlinear Schrödinger equation — 276
4.6	Notes on dynamics of NLS — 294
4.6.1	Energy-critical NLS — 295
4.6.2	Mass-critical NLS — 300
4.6.3	Mass supercritical and energy subcritical NLS — 303

XII — Contents

5 Wave equations — 310

- 5.1 Restriction estimates and classical Strichartz estimates — **310**
- 5.2 Bilinear method and endpoint Strichartz estimate — **328**
- 5.3 Energy solution for Cauchy problems of nonlinear Klein–Gordon equations — **355**
- 5.4 Smooth solution of semilinear wave equation — **371**
- 5.5 Low regularity problems for nonlinear Klein–Gordon equations — **397**
- 5.6 Notes on dynamics of NLW — **417**
 - 5.6.1 Energy-critical NLW — **418**
 - 5.6.2 Energy-subcritical NLW — **421**

6 Nonlinear Schrödinger equation with inverse-square potential — 424

- 6.1 Local well-posedness and stability — **426**
- 6.2 Embedding nonlinear profiles — **429**
- 6.3 Existence of the minimal blowup solution — **434**
- 6.4 Precluding the minimal blowup solution — **437**
- 6.5 Focusing case — **440**
- 6.6 Notes on dynamics of NLS with inverse square potential — **443**

Bibliography — 447

Index — 459
