

Table of contents

Book arrangement	III–V
Zlatić, M.: Foreword	VII
Table of Contents	IX–XI
Editorial.	XIII–XV

Chapter I – Opening keynote paper

Panagos, P., Borrelli, P., Meusburger, K., Lugato, E., Ballabio, C., Poesen, J., Alewell, C., Montanarella, L.: Soil erosion in Europe: current status, future climate and land use scenarios	1–13
---	------

Chapter II – Land degradation processes and mechanism

Velizarova, E., Balabanova, S., Marinov, I.: Assessment of current and future drinking water quality vulnerability under anticipated climate changes at the watershed level	14–24
Gang Xie, Xiaoming Zhang, Xiangdong Wang, Xiaolin Yin, Bing Liu, Yang Zhao: Discussion and analysis of the critical slope in hillslope erosion	25–31
Tomić, M., Milanović, M., Perović, V., Rikanović, T.: The analysis of land use changes in the impact zone of the surface mining of lignite using methods of remote sensing and GIS (settlement Veliki Crljeni, Serbia)	32–43
Marić, N., Nikić, Z.: Potential of natural attenuation processes in environmental contamination by petroleum hydrocarbons	44–53
Golosov, V.N., Litvin, L.F., Chizhikova, N.A., Kiryukhina, Z.P., Safina, G.R.: Recent trend of erosion rates in the southern half of the Russian plain	54–64
Novković, I., Dragičević, S., Živković, N., Tošić, R., Čvorović, Z.: Vulnerability assessment of the Jošanička river basin to torrential floods and forest fires	65–78
Manojlović, S., Dobrosavljević, T., Gocić, M., Milošević, M.V., Manojlović, P.: Trend analysis of annual water discharge and sediment load in the Južna Morava River (Serbia) during 1958–2007	79–87
Mincev, I.: Measuring v.s modeling sediment discharge, case study: Kalimanci reservoir, Macedonia	88–100
Yang, W., Zhu, P., Duan, H.: Temporal and spatial variations of rainfall erosivity R in the Lianshui basin, red soil region, South China	101–110

Chapter III – Soil and water conservation strategies to adapt to and mitigate the effects of climate change

Suleymanov, R., Gabbasova, I.: Assessment of steppe soils in conditions of climate change	111–119
---	---------

Todosijević, M., Čakmak, D., Belanović Simić, S., Zlatić, M., Kadović, R., Lazarević, K., Perović, V.: Raspberry production using sustainable principles in western Serbia	120–132
Petrović, S.: Scenarios and effects of the substitution of fossil fuels with wood pellets in Serbia to mitigate climate change effects	133–149
Keča, L., Keča, N., Borota, D., Marčeta, M.: Prospectives of non-native tree species in Serbia	150–160
Bjedov, I., Obratov-Petković, D., Čavlović, D., Nešić, M., Skočajić, D.: The influence of climate change on invasive plants spreading in degraded native communities at several localities in Belgrade	161–171

Chapter IV – Soil and water conservation measures benefits assessment

Košanin, O., Knežević, M., Belanović Simić, S., Vićentijević, M.: Edaphic characteristics of degraded areas on Zlatibor	172–187
Golubović Ćurguz, V., Đunisijević Bojović, D., Đukić, M., Raičević, V.: Seed germination and seedling growth of <i>Ailanthus altissima</i> , <i>Acer negundo</i> , <i>Pinus sylvestris</i> , and <i>Picea abies</i> in elevated concentrations of Zn, Pb and Cd under laboratory conditions	188–199
Hrabalíková, M., Huislová, P., Holubík, O., Žižála, D., Ureš, J., Kumhálová, J.: Assessment of changes in topsoil depth redistribution by different tillage technologies	200–210

Chapter V – Sustainable watershed management

Blinkov, I.: Determining erosion intensity on a basin scale by measurements on plots	211–225
Podhrázká, J., Karásek, P., Konečná, J., Kučera, J., Pochop, M.: Assessing the risk processes and phenomena in terms of protection of soil and water by using multicriterial analysis	226–234
Stefanović, T., Bilibajkić, S., Nevenić, R., Đorđević, I., Češljarić, G., Poduška, Z., Gagić Serdar, R.: Effects of the performed biological and biotechnical works on the intensity of erosion in the Strmna reka catchment	235–245
Konečná, J., Podhrázká, J., Karásek, P., Křížková, S.: Ecological consequences of erosion control measures in agricultural landscapes	246–257

Chapter VI – Social and economic aspects and policies related to soil and water conservation

Pla Sentis, I.: Anthropogenic and climate change factors in present and future soil and water conservation efforts	258–268
--	---------

Dragović, N., Vulević, T., Zlatic, M., Ristić, R., Todosijević, M.: Compliance of the legal framework for soil and water resources management in Serbia and some regional countries with EU legislation	269–288
Vukelić, G., Zlatic, M., Lazarević, K.: Compensation of damages caused by natural disasters	289–300
Todić, D., Grbić, V.: Natural disasters: Legal framework for co-operation between the Republic of Serbia and Bosnia and Herzegovina	301–311
Babović, S., Zlatic, M., Kostadinov, S.: Socio-economic influence on the soil erosion intensity in the Panevljanska river watershed	312–322
Tomićević-Dubljević, J., Pavlović, M., Vujčić, M.: The role of local communities for managing natural resources in the area of the Besna Kobilica Mountain, Serbia .	323–334
