1	The History of the Patch Clamp Technique	1
1.1	Bioelectricity	1
1.2	The Ion Theory	2
1.2.1	The Voltage Clamp	2
1.2.2	Hodgkin and Huxley	3
1.3	The Development of the Patch Clamp Technique	4
1.3.1	The First Channels using the Black-Film Technique	4
1.3.2	Noise Analysis	4
1.3.3	The First Patch Clamp Experiments	5
1.3.4	The Improvement of the Method: Gigaseals!	8
1.4	The Further Development of the Technique	10
	References	12
2	Bioelectrical Phenomena and their Measurement	15
2.1	The Basics	15
2.1.1	The Membrane Potential	15
2.1.2	Electrical Properties of Cells	17
2.1.2.1	Passive Properties of Cells: Resistance and Capacitance	17
2.1.2.2	Active Properties: Action Potentials	19
2.2	Recording Methods (Overview)	20
2.2.1	Cellular and Subcellular Recordings	22
2.2.2	Summated Extracellular Potentials	26
	References	28
3	Technical Basics of the Patch Clamp Method	29
3.1	Operating Principle of a Patch Clamp Amplifier	29
3.1.1	Voltage Clamp	30
3.1.2	Current Clamp	33
3.1.3	Discontinuous Amplifiers	34
3.2	Complicating Factors, and How to Deal with Them	35
3.2.1	Capacitance	35
3.2.2	Series Resistance	39
3.2.2.1	Compensation of the Series Resistance	41

3.2.2.2	Rules for Estimating Series and Membrane Resistance (R_s and R_m)	42
3.2.3	Offset-Potentials.	44
3.2.3.1	Electrode Potentials	45
3.2.3.2	Junction Potentials	46
	References.	47
4	The Patch Clamp Rig and Technical Components	49
4.1	The Optics	50
4.1.1	The Inverted Microscope	52
4.1.2	The Upright Microscope	52
4.1.3	Stereo Microscopes	55
4.1.4	Cameras	56
4.2	Microscope Stage and Mechanical Components	57
4.2.1	Optical Table, Microscope Stage and Cage	57
4.2.1.1	The Anti-Vibration Table	57
4.2.1.2	Configuration of the Setup	58
4.2.1.3	Electrical Shielding.	60
4.2.2	Micromanipulator and Pipette Holder	61
4.2.2.1	The Micromanipulator	61
4.2.2.2	The Pipette Holder	62
4.2.3	Recording Chambers	64
4.2.3.1	Simple Chambers	64
4.2.3.2	Temperature-Controlled Chambers.	65
4.2.3.3	Slice Chambers	66
4.2.4	Chamber Perfusion and Application Methods	68
4.2.4.1	Slow Perfusion	68
4.2.4.2	Fast Perfusion	71
4.3	Electronic Components	73
4.3.1	Pre-Amplifier and Amplifier	73
4.3.1.1	Choosing an Amplifier	74
4.3.2	Intermediate Amplifiers and Filters	75
4.3.3	The Stimulation Device	76
4.4	Glasses, Pipettes, Electrodes, and Solutions	77
4.4.1	The Patch Pipette	77
4.4.1.1	Pipette Glasses	79
4.4.2	Pipette Production	80
4.4.2.1	The Pipette Puller	80
4.4.2.2	Pulling the Pipettes	81
4.4.2.3	Polishing with the Microforge	81
4.4.2.4	Coating the Pipettes	82
4.4.3	Filling the Pipette.	83
4.4.4	Electrode Wires	84
4.4.4.1	Chloriding of a Silver Wire.	84

Contents	xiii
4.4.5 Intra- and Extracellular Solutions	86
4.4.5.1 Additives	90
