|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
|                   | <b>Foreword</b> .....                                                                                                                                                                                                                                              | V   |
| <b>Chapter 1</b>  | <b>Role of soils for satisfying global demands as defined by the U.N. Sustainable Development Goals (SDGs)</b><br>Winfried E.H. Blum .....                                                                                                                         | 1   |
| <b>Chapter 2</b>  | <b>How can the soil science discipline contribute most effectively to achieving the UN Sustainable Development Goals?</b><br>Johan Bouma .....                                                                                                                     | 15  |
| <b>Chapter 3</b>  | <b>The soil nexus and sustainable development goals</b><br>Henry Lin .....                                                                                                                                                                                         | 38  |
| <b>Chapter 4</b>  | <b>Soil health and functions as a basic requirement for advancing the SDGs</b><br>Rainer Horn, Heiner Fleige, Rattan Lal and Iris Zimmermann .....                                                                                                                 | 52  |
| <b>Chapter 5</b>  | <b>The role of soil management and restoration in advancing Sustainable Development Goals</b><br>David A.N. Ussiri and Rattan Lal .....                                                                                                                            | 61  |
| <b>Chapter 6</b>  | <b>Soil management for advancing SDG 13 (Climate Action)</b><br>Fabrizio Albanito, Nuala Fitton and Pete Smith .....                                                                                                                                               | 72  |
| <b>Chapter 7</b>  | <b>Regulatory utilization of USLE/RUSLE erosion rate estimates in Uruguay: a policy coincident with the UN Sustainable Development Goals</b><br>Mario Pérez-Bidegain, Mariana Hill, Carlos Clerici, José A. Terra, Jorge Sawchik and Fernando García-Préchac ..... | 82  |
| <b>Chapter 8</b>  | <b>Restoring soils of Sub-Saharan Africa for achieving SDGs</b><br>A.O. Ogunkunle and V.O. Chude .....                                                                                                                                                             | 92  |
| <b>Chapter 9</b>  | <b>The contribution of hydropedological assessments to the availability and sustainable management of water, for all (SDG#6)</b><br>Johan van Tol, Simon Lorentz, George van Zijl and Pieter le Roux. ....                                                         | 102 |
| <b>Chapter 10</b> | <b>The relevance of soil structure conservation and carbon sequestration in Chilean volcanic ash soils for achieving sustainable development goals</b><br>José Dörner, Dorota Dec, Franciso Matus, Felipe Zúñiga, Iván Ordóñez and Rainer Horn .....               | 118 |
| <b>Chapter 11</b> | <b>Advancing the Soil-Water-Waste Nexus approach for achieving the Sustainable Development Goals</b><br>Parvathy Chandrasekhar, Anika Reetsch, Sridhar Patra, Reza Ardakanian and Kai Schwärzel .....                                                              | 126 |
| <b>Chapter 12</b> | <b>Edaphological approaches to advancing Sustainable Development Goals: an educational perspective to build a citizen preservation culture</b><br>Laura Bertha Reyes-Sánchez .....                                                                                 | 139 |

|                   |                                                                                   |     |
|-------------------|-----------------------------------------------------------------------------------|-----|
| <b>Chapter 13</b> | <b>Soil science solutions for advancing SDG 2 towards resilient agriculture</b>   |     |
|                   | A. Bonfante, A. Basile, G. Langella, P. Manna, and F. Terribile . . . . .         | 156 |
| <b>Chapter 14</b> | <b>Managing Chernozems for advancing SDGs</b>                                     |     |
|                   | Pavel Krasilnikov, Alexey Sorokin, Oleg Golozubov, and Olga Bezuglova . .         | 175 |
| <b>Chapter 15</b> | <b>Sustainable Development Goals and the International Union of Soil Sciences</b> |     |
|                   | Rattan Lal . . . . .                                                              | 189 |
