

Contents

Part I	Fundamentals and Framework	1
1	Software Systems	5
1.1	Information Systems	7
1.2	Embedded Systems	11
1.3	Software-Intensive Systems	15
1.4	Adaptive Systems	19
1.5	Consequences for Requirements Engineering	23
2	Software Project Failures	25
3	Requirements	31
3.1	Definition	32
3.2	Three Types of Requirements	33
3.3	The ISO/IEC Quality Requirements Framework SQuaRE	37
3.4	The Quality Model Division (ISO/IEC 2501n)	38
3.5	Impact of Constraints	48
3.6	So-Called Non-functional Requirements (NFRs)	51
4	Goal of Requirements Engineering	53
4.1	Establishing Vision in Context	54
4.2	The Three Dimensions of Requirements Engineering	55
4.3	The Requirements Engineering Process Within the Three Dimensions	57
5	“What” vs. “How” in System Development	59
5.1	Between Requirements Engineering and Design	60
5.2	Within Requirements Engineering	62
5.3	Within Design	63
5.4	Co-Evolution of Requirements and Design	65
6	Embedding Requirements Engineering in Organisations	67
6.1	Typical Interrelations with Organisational Processes	68
6.2	Early Development Phase	70
6.3	Cross-Lifecycle Activity	72
6.4	Continuous Organisational Process	74

7 Requirements Engineering & Software Development	
Processes	77
7.1 Interrelation with Development Activities.	78
7.2 Traditional Software Development Process Models	80
7.3 Agile Software Development Process Models	88
7.4 Combining Traditional and Agile Development Principles	94
8 The Requirements Engineering Framework	97
8.1 Overview of the Framework	98
8.2 The Requirements Engineering Context	99
8.3 Three Core Activities	100
8.4 Two Cross-Sectional Activities.	101
8.5 Interrelations between the Five Activities	102
8.6 Three Types of Requirements Artefacts	104
8.7 Overview of the Book	106
Recommended Literature for Part I.	109
Part II Requirements Engineering Context	111
Part II.a Foundations	113
9 Why Context Matters	117
9.1 Context and System Vision	118
9.2 Context Impact: Examples.	119
10 Definitions	127
10.1 Context Objects	128
10.2 Context Information	128
10.3 Requirements Engineering Context	130
11 Context Consideration	131
11.1 Context Consideration in the Core Activities	132
11.2 Context Consideration in the Cross-Sectional Activities.	134
12 System Decomposition and Context Consideration	137
12.1 System Decomposition.	138
12.2 Sub-System-Specific Context	139
13 System Boundary	143
13.1 System Boundary: Definition	144
13.2 Defining the System Boundary	146
13.3 Scope of Development	148
Recommended Literature for Part II.a.	149

Part II.b Context Perspectives	151
14 Foundations.	155
14.1 Characteristics of a Perspective	156
14.2 Potential Benefits of Using Perspectives	157
14.3 Example: Four Worlds of Information System Development.	158
14.4 Perspective-Based Context Object Consideration	160
15 Eight Context Perspectives.	163
15.1 Usage Perspective	165
15.2 Subject Perspective	169
15.3 IT System Perspective.	173
15.4 Development Perspective	177
15.5 Business Perspective	181
15.6 Innovation Perspective	184
15.7 Society Perspective	187
15.8 Technical Perspective	191
16 Example: Automated Car Park	195
16.1 Initial Context Objects	196
16.2 Access Control	201
16.3 Additional Functionality: Advertisement	207
16.4 Summary.	212
Recommended Literature for Part II.b	213
Part III Core Activities	215
Part III.a Elicitation	219
17 Fundamentals	223
17.1 Three Elicitation Activities.	224
17.2 Four Types of Requirements Sources	225
17.3 Use of Goals and Scenarios.	228
18 Three Elicitation Activities	231
18.1 Identification and Selection of Requirements Sources	232
18.2 Elicitation of Existing Requirements and Context Information	236
18.3 Development of New and Innovative Requirements.	239
19 Elicitation Techniques	243
19.1 Template for Describing the Techniques	244
19.2 Interview	245
19.3 Workshop	256
19.4 Focus Group.	267
19.5 Observation	271
19.6 Questionnaire	277

19.7	Perspective-Based Reading.	282
19.8	Design Thinking.	287
20	Assistance Techniques	293
20.1	Brainstorming.	294
20.2	Prototyping.	300
20.3	KJ Method	305
20.4	Mind Mapping	313
20.5	Elicitation Checklists	317
	Recommended Literature for Part III.a	323
	Part III.b Documentation	325
21	Fundamentals	329
21.1	Goal of Documentation.	331
21.2	Documenting Requirements.	332
21.3	Documenting Context Information.	333
21.4	Documenting Process Information	336
21.5	Representation Formats	339
21.6	Usage-Driven Documentation and Specification	343
22	Quality Criteria	349
22.1	For a Single Requirements Artefact.	350
22.2	For Sets of Requirements Artefacts.	354
22.3	Acceptance Criteria	356
23	Requirements Attributes	363
23.1	Attributes and Attribute Schemes	364
23.2	Typical Requirements Attributes	366
24	Requirements Specifications	377
24.1	Types of Requirements Specifications	378
24.2	Reference Structures for Requirements Documents	383
25	Natural Language	389
25.1	Advantages and Disadvantages of Textual Requirements	390
25.2	Non-Atomic, Intermingled Requirements Artefacts.	391
25.3	Ambiguity of Textual Requirements	392
25.4	Techniques for Avoiding Ambiguity	397
26	Conceptual Models	405
26.1	Properties of Conceptual Models	407
26.2	Advantages of Conceptual Models	410
26.3	Semiotics of Conceptual Models.	411
26.4	Syntax, Semantics, Pragmatics of Conceptual Models	414

26.5	Model Creation and Model Interpretation: Potential Transformation Effects	418
26.6	Conceptual Modelling Languages	422
27	Combining Model-Based and Textual Documentation	429
27.1	Textual Annotations of Model Elements	430
27.2	Interrelating Conceptual Models and Textual Artefacts	431
	Recommended Literature for Part III.b	435
	Part III.c Negotiation	437
28	Fundamentals	441
28.1	Goal of Requirements Negotiation	442
28.2	Requirements Negotiation: Definition	443
28.3	Achieving Win-Win Conflict Resolution Results	447
28.4	Benefits of Using Goals and Scenarios	448
29	Conflict Causes and Conflict Types	451
29.1	Conflict Causes	452
29.2	Conflict Types	459
30	Conflict Resolution Strategies	461
30.1	Negotiation Strategy	462
30.2	Creative Solution Strategy	464
30.3	Decision Strategy	466
30.4	Product Differentiation Strategy	468
30.5	Conflict Types and Resolution Strategies	470
	Recommended Literature for Part III.c	471
	Part IV Requirements Artefacts	473
	Part IV.a Goals	475
31	Fundamentals	479
31.1	Benefits of Using Goals	480
31.2	AND/OR Decomposition	482
31.3	AND/OR Goal Trees and Graphs	483
31.4	Goal Dependencies	486
31.5	Context Impact on Goal Dependencies	490
32	Textual Goal Documentation	491
32.1	Seven Rules for Documenting Goals	492
32.2	A Template for Documenting Goals	495
32.3	Hints	497

- 33 Goal Modelling Languages** 499
 - 33.1 i* (iStar) 2.0 500
 - 33.2 KAOS 507
 - 33.3 Selecting a Goal Modelling Language 511
- Recommended Literature for Part IV.a** 513
- Part IV.b Scenarios** 515
- 34 Fundamentals** 519
 - 34.1 Scenarios as Middle-Level Abstractions 520
 - 34.2 Capturing Context Information in Scenarios 521
- 35 Scenario Types** 525
 - 35.1 Current-State and Desired-State Scenarios 526
 - 35.2 Positive and Negative Scenarios 527
 - 35.3 Narrative Scenarios 529
 - 35.4 Misuse Scenarios 530
 - 35.5 Descriptive, Exploratory, and Explanatory Scenarios 531
 - 35.6 Instance and Type Scenarios 533
 - 35.7 System-Internal, Interaction, and Context Scenarios 535
 - 35.8 Main Scenario, Alternative Scenarios, and Exception Scenarios 540
 - 35.9 User Stories 543
 - 35.10 Use Cases 544
 - 35.11 Use of the Different Scenario Types 545
- 36 Textual Scenario Documentation** 547
 - 36.1 Eleven Rules for Documenting Scenarios 548
 - 36.2 Structured Documentation of Scenarios 553
- 37 Model-Based Scenario Documentation** 565
 - 37.1 Message Sequence Charts 566
 - 37.2 Use Case Diagrams 573
- 38 Benefits of Goals and Scenarios** 579
 - 38.1 Benefits of Goal Orientation 580
 - 38.2 Benefits of Using Scenarios 582
 - 38.3 Goal–Scenario Coupling 586
- Recommended Literature for Part IV.b** 593
- Part IV.c Solution-Oriented Requirements** 595
- 39 Fundamentals** 599
 - 39.1 Three Key Perspectives on a Solution 600
 - 39.2 Documentation of Solution-Oriented Requirements 601

- 39.3 Differences between Solution-Oriented Requirements, Goals, and Scenarios 602
 - 39.4 Relationships between Solution-Oriented Requirements, Goals, and Scenarios 604
- 40 Data Models.** 607
 - 40.1 Entity-Relationship Models 608
 - 40.2 UML Class Diagrams 615
- 41 Functional Models.** 625
 - 41.1 Data Flow Models 626
 - 41.2 Essential Data Flow Models 640
 - 41.3 UML Activity Diagrams 643
- 42 Behavioural Models** 651
 - 42.1 Finite Automata 652
 - 42.2 Statecharts 656
 - 42.3 UML State Machine Diagrams 663
- 43 Interrelations Between the Three Perspectives.** 667
 - 43.1 Navigation System Example 668
 - 43.2 Relationships between the Perspectives 674
 - 43.3 Interrelation of the Perspectives Using UML 678
- Recommended Literature for Part IV.c** 683
- Part V Cross-Sectional Activities** 687
- Part V.a Validation** 689
- 44 Fundamentals** 693
 - 44.1 Motivation 694
 - 44.2 Quality Assurance 695
 - 44.3 Six Validation Principles 696
 - 44.4 Validation of Goals and Scenarios 703
- 45 Three Validation Activities** 707
 - 45.1 Validation of Context Consideration. 708
 - 45.2 Validation of Activity Execution 715
 - 45.3 Validation of Requirements Artefacts 716
- 46 Validation Techniques.** 721
 - 46.1 Artefact Commentary 724
 - 46.2 Walkthroughs 728
 - 46.3 Inspections 731
 - 46.4 Prototyping. 738
 - 46.5 Comparison of Validation Techniques 743

- 47 Assistance Techniques 745**
 - 47.1 Perspective-Based Reading. 746
 - 47.2 Validation Checklists 750
 - 47.3 Creation of Artefacts 758
- Recommended Literature for Part V.a. 771**
- Part V.b Management 773**
- 48 Three Management Activities 777**
 - 48.1 Management of the Requirements Engineering Context 779
 - 48.2 Management of the Requirements Engineering Activities. 783
 - 48.3 Management of the Requirements Artefacts and Context Information 789
- 49 Requirements Traceability 791**
 - 49.1 Motivation 792
 - 49.2 Three Kinds of Requirements Traceability 794
 - 49.3 Traceability Relationships 798
 - 49.4 Documenting Traceability Relationships. 803
 - 49.5 Visualisation of Traceability Information 805
 - 49.6 Usage-Driven, Project-Specific Traceability 808
- 50 Requirements Prioritisation 811**
 - 50.1 Preparation of Prioritisation 812
 - 50.2 Techniques for Requirements Prioritisation 817
- 51 Configuration Management 825**
 - 51.1 Three Levels of Configuration Management. 826
 - 51.2 Artefact Versions 827
 - 51.3 Configurations of Artefacts 828
 - 51.4 Baselines of Requirements Artefacts 828
- 52 Change Management 831**
 - 52.1 Change Control Board 832
 - 52.2 Documenting Change Requests. 833
 - 52.3 Change Management Process 835
- Recommended Literature for Part V.b 841**
- Appendix 843**
- Glossary 845**
- Literature 865**
- Index 883**
