
Contents

1	Electrophysiological Mechanisms of Cardiac Arrhythmias . . .	1
	Martin Borlich	
2	Energy Sources for Ablation and Their Mechanisms	9
	Christian-Hendrik Heeger and Roland R. Tilz	
3	Setup in the EP Lab	19
	Dong-In Shin	
4	Puncture Techniques in the Catheter Lab.	25
	David Duncker and Dong-In Shin	
5	Orientation in Fluoroscopy.	37
	Leon Iden	
6	Basis Principles of 3D Mapping Systems	43
	Martin Borlich and Philipp Sommer	
7	Supraventricular Tachycardias	53
	Daniel Steven and Lars Eckardt	
8	Diagnosis and Therapy of AV Nodal Reentrant Tachycardia	63
	Christian von Bary and Charalampos Kriatselis	
9	Focal Atrial Tachycardia.	73
	Melanie Gunawardene and Stephan Willems	
10	AVRT	83
	Jakob Lüker	
11	Typical Atrial Flutter	95
	Dierk Thomas and Hendrik Bonnemeier	
12	Atypical Atrial Flutter.	107
	Marc Kottmaier and Tilko Reents	
13	Atrial Fibrillation—Radiofrequency Ablation (Pulmonary Vein Isolation).	119
	Sonia Busch and Till Althoff	

14 Cryoballoon Ablation	131
Julian K. R. Chun and Andreas Metzner	
15 Localization of Ventricular Arrhythmias from the 12-Lead ECG	147
Leon Iden	
16 Idiopathic Ventricular Extrasystole	155
Sonia Busch and Heidi Estner	
17 VT in Ischemic Cardiomyopathy	169
Felix Bourier and Daniel Steven	
18 VT in Non-Ischemic Cardiomyopathy	179
Christian Sohns and Vanessa Sciacca	
19 Complication Management	189
Laura Rottner and Andreas Metzner	
20 Low-Dose Fluoroscopy	201
Martin Borlich and Philipp Sommer
