

Contents

1	Entropy and Disruption	1
1.1	Constitution of the Universe	1
1.1.1	Disorderly Equilibrium	1
1.1.2	Entropy Production and Environmental Pollution	4
1.1.3	The Cerberus Before the Land of Milk and Honey	14
1.2	Constraints	16
1.2.1	Information Flows	16
1.2.2	Capital Flows	19
1.2.3	Markets	22
2	Energy and Life	25
2.1	Photosynthesis and Respiration	26
2.2	Agricultural Society	27
2.3	Industrial Society	30
2.3.1	Technological Progress, Energy Slaves and Emissions	32
2.3.2	Pollutant Retention and Disposal	38
2.3.3	Rational Use of Energy	44
3	Wealth Creation and Growth	53
3.1	Economics: Orthodox	53
3.2	Oil Price Shocks	57
3.3	Growth Theory	62
3.3.1	Capital, Labour, Energy and Creativity	63
3.3.2	Production Modelling	66
3.3.3	Productive Powers	70
3.3.4	Neoclassicism	75
3.3.5	From the Law of Diminishing Returns to LinEx Functions	77
3.3.6	The Power of Energy and the Weakness of Labour	83
3.4	Technological Constraints	85
3.4.1	In the Blind Spot of Textbook Economics	86
3.4.2	Profit Optimisation	88
3.4.3	Downhill, Along the Rampart	90

4	Post-growth Economics	93
4.1	Sustainability and Growth	93
4.2	Overcoming Zero-Sum Logic as a Modern Myth	95
4.3	“Green” Growth: Continued Plunder by Other Means?	97
4.4	How Advanced Can Technical Progress Be?	99
4.5	Externalities and Efficiency	100
4.6	Economic Efficiency as a Fallacy?	102
4.7	Rebound Effects	103
4.7.1	Output Side of GDP: Material Rebound Effects	104
4.7.2	Demand Side of GDP: Financial Rebound Effects	106
4.8	Post-growth Economy	107
4.8.1	Five Milestones of a Transformation	107
4.8.2	Reducing Growth Imperatives	109
4.8.3	Industrial Supply and Subsistence	111
4.8.4	Supply Configuration	114
4.8.5	Adapted Tools to Reduce Capital Intensity	116
4.8.6	Material Zero-Sum Games	118
4.8.7	Growth-Neutral Business Areas	121
4.9	Conclusion	123
5	Countries in Disruption	125
5.1	Germany	127
5.1.1	Energy Turnaround	127
5.1.2	Migration	142
5.2	Colombia	151
5.2.1	Official Information	153
5.2.2	Magnificent Nature	154
5.2.3	Conservatives Versus Liberals	155
5.2.4	The Explosive Power of Population Growth Without Industrialisation	159
5.2.5	Suffering and Change	162
6	What Will We Choose?	165
6.1	Rerouting the Economy via Energy Taxation	166
6.1.1	Taxation According to Performance	168
6.1.2	Border Adjustment Levies	169
6.1.3	Energy Taxes Under Discussion	169
6.2	Extraterrestrial Production	171
6.3	Outlook	174

Appendices	177
A.1 Entropy, Environment, Information	177
A.1.1 Entropy Production and Emissions	177
A.1.2 Greenhouse Effects	178
A.1.3 Entropy and Information	180
A.2 Energy and Exergy	182
A.2.1 Energy Units	182
A.2.2 Energy Quantity and Quality	182
A.3 Aggregation	185
A.3.1 Value Added	186
A.3.2 Capital	188
A.3.3 Labour and Energy	190
A.4 Past and Future	190
A.4.1 Early Stage of Industrialisation	190
A.4.2 Economy Totally Digital	191
