1 Modelling Solvent Sorption in Polar Polymers using a Physical, Isothermal, Non-Empirical Model	1
1.1 Introduction	1
1.2 Sorption Mechanisms in Polymers	2
1.2.1 Sorption Thermodynamics	2
1.2.2 Sorption Models	3
1.3 Model with Solvent with Adsorption Sites (H-Bonds)	9
1.3.1 Statistics of Distribution of Water Molecules	11
1.3.2 Mean Field Approximation	12
1.3.3 Sorption Isotherms	14
1.4 Comparison with Experimental Results	16
1.4.1 Sorption of Water into Polyamides	16
1.4.2 Sorption of Water into Polyacrylic Acid	20
1.4.3 Sorption of Alcohols into Polyamides	22
1.5 Conclusion	25

2	Influence of Organic Solvent Sorption upon Water Infiltration and Molecular Mobility in Polyamides.....	29
2.1	Introduction.....	29
2.2	Experimental Methods.....	31
2.2.1	Materials.....	31
2.2.2	Sorption Experiments.....	31
2.2.3	Karl Fischer Titration.....	33
2.2.4	Differential Scanning Calorimetry.....	33
2.3	Chemical Activities in Non-Ideal Solvent Mixtures.....	34
2.4	Water–Ethanol Mixtures.....	35
2.4.1	Sorption by Water–Ethanol Mixtures.....	36
2.4.2	Effect on T_g	38
2.5	Dry-Assumed Solvents.....	40
2.5.1	Pure Polar Solvents.....	43
2.5.2	Pure Non-Polar Solvents.....	48
2.6	Conclusion.....	52
3	Diffusion of Water and Oils in Thermosets and Thermoset Composites.....	57
3.1	Introduction.....	57
3.2	Sorption of Water.....	59
3.2.1	Influence of Network Structure and Cure Kinetics.....	59
3.2.2	Effects on the Glass Transition Temperature and the Mechanical Properties.....	60
3.2.3	Composites.....	61
3.3	Oil Sorption.....	62
3.3.1	Neat Resin.....	63
3.3.2	Influence of Temperature.....	63
3.3.3	Composites.....	64
4	Permeability of Oxygen through Polymers.....	69
4.1	Theoretical Background.....	69
4.1.1	Permeability.....	69
4.1.2	Diffusion.....	71
4.1.2.1	Fickian Diffusion.....	71
4.1.2.2	Non-Fickian Diffusion and Anormal Diffusion.....	72

4.1.3	Solubility.....	72
4.1.3.1	Henry's Law	72
4.1.3.2	Double-Mode Sorption Model.....	72
4.1.4	Effect of Temperature	73
4.1.5	Selectivity.....	75
4.2	Methods for Measuring Permeability and Related Values	75
4.2.1	Measurement of Permeability.....	75
4.2.2	Diffusion Coefficient Measurement.....	77
4.2.3	Solubility Coefficient Measurement.....	78
4.3	Experimental Values and Structure–Property Relationships.....	79
4.3.1	Effect of Penetrant Size and Structure	79
4.3.2	Effect of Polymer Structure and Crystallinity	80
4.3.3	Effect of Fillers	82
4.3.4	Blends and Multi-Layered Polymers	84
4.3.5	Effect of Water Concentration.....	85
4.4	The Role of Oxygen Diffusion in Polymer Degradation.....	85
4.4.1	Brief Overview of Diffusion-Limited Oxidation	85
4.4.2	Prediction of the Thickness of Oxidized Layer	87
4.4.3	Towards the Study of Coupling.....	88
4.5	Conclusions.....	89
5	Water Sorption Behavior in Polymers: Kinetic and Thermodynamic Approaches.....	93
5.1	Introduction.....	93
5.2	Theoretical Background	94
5.2.1	Sorption Kinetics	95
5.2.1.1	Fickian Sorption of Type I ($n = \frac{1}{2}$)	96
5.2.1.2	Fickian Sorption of Type II ($n = 1$)	102
5.2.1.3	Non-Fickian Sorption of Type III ($\frac{1}{2} < n < 1$).....	103
5.2.2	Sorption Isotherms.....	103
5.2.2.1	Sorption Modes.....	104
5.2.2.2	Hysteresis.....	110
5.3	Experimental Aspects.....	113
5.3.1	Sorption	113
5.3.1.1	Microgravimetry	114

5.3.1.2	Data Analysis	117
5.3.2	Water Sorption Phenomena in Polymers.....	120
5.3.2.1	Plasticization Effect.....	120
5.3.2.2	Clustering Formation – Zimm–Lunberg Theory.....	124
5.3.2.3	Relaxation Phenomenon	134
5.3.2.4	Water-Induced Crystallization	136
5.3.2.5	Aging – Degradation	138
5.4	Conclusion	144
	Index	153
