

CONTENTS

FOREWORD.....	25
INTRODUCTION	27
Organic and Semiotic Evolution Proceed Side-By-Side	32
Change in Social Structure Alters Semiotic Structure	34
 PART I	
 I. THE ACT OF NAMING	39
“Laws” of Phonetic Change Exemplified in Proto-Indo-European.....	42
 II. THE RITUAL DISPLAY	43
Ritual Order: Habit Engenders Structure.....	43
Instinct, Learning, General Purpose, Free Intentionality	45
Ritualized Vocalization of Wolves and Humans	46
The Ritualized Display Performance: Group Solidarity and Patterned Method	46
The Origin of Ritual.....	48
Ritual: An Ancestral Consciousness of Form	49
Ritual Order.....	50
Formal Implications of the Ritual Display.....	51
A School of Form.....	52
Formative Instrumentality of the Ritual Display Performance.....	55
Awareness of Pattern and Cognitive Development	55
Cognitive Relevance of the Regulative Step: The Determination of Constant Units of Measurement.....	57
The Collective Walking Pace Objectified	63
Morphological Patterns of Composition.....	63
Experienced Form	65

Configurative Perception and Neocortical Integration.....	65
The Brain Responds to the Body	66
Reciprocal Action, A Category of Relation	66
The Ritual Display: Its Influence on the Evolution of Cognition	68
III. CONCERTED TONAL VOCALIZATION	69
The Larynx is the Fundamental Tone-Producing Instrument.....	69
The Discovery of an Exclusively Tonal Vocalization	70
“Toning”: The Source of the Vowels of Speech.....	72
Tonal Vocalization to Vowel Modulation: Current Therapeutic and Meditative Practices	73
An Orchestral Version of the Toning Process	75
Matrix Tonality	77
The Perception of Tones – Vowels and Musical Notes	79
The Vowel-Consonant Duality	82
Selective Frequency Modulation as the Source of Vowel Tones	83
From the Effect to the Cause.....	83
Vowels: The First Elements of Speech	85
Vowels at the Invention of the Telephone.....	85
The Vowels of Speech: Function and Source	85
Primacy of the Vowels in the Evolution of Speech	86
The Semiotic Capability and Range of a Single Vowel: [a] -/a/	89
Summary.....	89
The Distribution of Tone and Noise in Signal Calls, Speech and Music	90
Noise and Tone in Speech and Vocal Music.....	93
The Role of Noise Elements in Instrumental Music and Song.....	94

Semiotic Transition From Tone to Vowel and Lexical Determination.....	95
Semantic Development of the Term “Tone”: Its Relevance to the Syllabic Vowel and to Musical Notes	97
IV. THE SYLLABLE	101
The Acoustic Origin of the Syllable	101
Spontaneous Appearance of Tonal Utterance and Syllabic Articulation.....	101
The Syllable: A Preset Framework of Speech	102
A Generative Unit of Speech – The Syllabic Ordered Set ...	103
The Generative Universality of Vowels and Consonants: Their Syllabic Integration.....	104
Auditory Detection of the Syllable	105
Intermittent Periodic Utterance and Relational Connection – Syllabic Co-articulation.....	106
Syllabic Vowels in the Fabric of Speech	107
The Syllable Defined	108
The Term “Series” – Its Semantic Indo-European Source...	118
Speech: A Syllabic Series	118
Consistency, Replicability and Variability of the Syllabic Code: The Syllable as the Key to Lexical Composition	120
The Syllable and Its Underlying Symmetry.....	121
A Syllable is a Combinatory Ordered Set	122
Kinetic Spatial Subdivision, Scalar Tonal Composition and Syllabic Construction	124
Atavism of Intervallic Syllabic Forms.....	126
Pre-syllabic Intermittence of Information Transmission	126
Monosyllabic Speech and Monosyllabic Significance	127
Phonic Syllable and Melodic Pitch Note: A Complete Correspondence	131
Oliver Sacks: Lexical Mishearings	132

Cortical Dysarthria: The Pathology of Connected Syllabic Speech.....	134
Syllabic Articulation is Essential to Speech	135
Summary: From Tonal Articulation to Acoustic Wave Energy Field: The Framework of the Syllabic Entity	136
V. SPEECH AND MELODY: COMMON ORIGIN AND CONTRAST OF FUNCTION.....	139
Evolutionary Convergence and Divergence of Music and Speech: Physiological Source of the Octave and Scalar Composition.....	141
The Basic Tritonic Scalar System and Lexical Triadic Symmetry.....	144
The Siamang Gibbons' Octaval Morning Chant and Darwin's Surmise	145
Speech and Music are Ordered Sound: The Identity of Harmonic Formant Frequency Composition ("Formants" in Speech and "Partials" in Music).....	146
VI. ISOMERIC EVOLUTION OF SPEECH THROUGH ACOUSTIC REPROGRAMMING OF THE SIGNAL CRY	149
Homeomeric Isomorphism and Isomeric Transformation in Nature.....	151
Signal Call to Phonetic Utterance.....	153
Stages of Evolutionary Isomeric Transformation.....	155
Isomeric Reordering I.....	156
Isomeric Reordering II	157
Concerted Tonal Vocalization: Ethological and Human.....	158
From Signal Cry to Formative Syllabic Phoneme by Collective Tonal Vocalization	159
Neural and Physiological Differentiation of Vowels and Consonants	160

Ecphonic Signal Cry Repertory vs Phonetic Language System	161
Acoustic Frequency Variability Enables Reprogramming of Part Elements	162
Molecular Flexibility and Isomeric Reorganization.....	164
Signal “Parts” vs Speech “Elements”	165
Semiotic Rearrangement of the Signal Call: Information Theory	166
Principles of Neural Plasticity Enable Alterations in Acoustic Structure	167
Summary.....	169
VII. SPEECH.....	173
Cognitive Precursors of Speech	175
Evolutionary Stages in the Development of Speech.....	178
The Craft of Speech	179
Parallel Evolution of Hand and Articulate Speech.....	180
Speech, Motor Learning and Long-Term Memory	181
Modification of the Vocal Organs: Not a Requisite for Speech Evolution	183
A Retrospective View of the Successive Habituation of the Vocal Organs: Physiological to Semiotic	185
Summary: A Diachronic Retrospect.....	186
Semiological Aspects of Speech: Semantic, Syntactic and Pragmatic.....	187
Semantic and Cognitive Development of the Concept “Element” in Classical Greece From Stasisto System	195
The “Elements” of Speech	197
Commentary.....	198
Primacy of the Vowels in the Evolution of Speech	199
Collective Tonal Vocalization: The Source of the Vowels of Speech.....	202

Further Stages of Speech Evolution: Syllabic Vowels and Syllabic Articulation.....	204
The Neural Basis of Symbolic Functions: Relevance to Speech.....	207
Pulsational Regularization	209
Speech: A Pulse-Coded Modulation Process.....	210
Pulse-Coded Modulation: Concatenative, Additive and Subtractive Synthesis	213
From Speech to Thought and From Ratio to Reason: Words Are Indispensable to Reason.....	218
Analogy and Metaphor in Language and Cognition	219
Combinatory Theory and Practice: A Historical Overview	220
VIII.INTERVAL	223
The Interval Defined.....	223
The Interval: Its Source, Constructive Potential and Cognitive Relevance.....	225
Intervallic Order: Underlying Biological Framework and Cultural Application	227
Non-Kinetic and Kinetic Intervallic Order	228
The Interval Based on the Intermittence of Perception	229
Emergence of the Intervallic Arts.....	231
Acoustic Wave Propagation and Body Displacement: Two Modes of Kinetic Energy Adapted to Structural Organization.....	232
Subdivisional Intervallic Energy in Choreography, Speech and Musical Composition: Their Coeval Source.....	234
Ritualized Intervallic Motion: The Emergence of the Dance.....	235
The Intervallic Arts: Syllabic and Scalar Tonal Quality	236
Measure as Experienced and in Its Dimensional and Regulative Functions – Its Relevance to Speech.....	237

The Practical Basis of Systems of Measurement	238
Time: Subjective, Transitional-Intervallic and Mathematical.....	239
Intervallic Forms of Rhythmical Combinational Composition are Morphologically Homologous	240
Spatial Framework in Musical Scalar Subdivision.....	241
IX. RHYTHM.....	243
The Cerebellum.....	243
Patterned Rhythmic Structure in Dance, Melody and Speech	245
Cadence: Intervallic Regularity and Rhythmic Infrastructure	248
The Regularized Intervallic Rising and Falling of the Step: A Medieval and Classical Hellenic Perspective	251
Rhythmic Infrastructure: Sustaining and Productive of Musical Form and Dance.....	253
X. ORDER BASED ON ORDER.....	257
The Superposition Principle.....	257
XI. THE SPEECH CODE.....	261
Origin of the Term “Speech Code”	261
Requirements of a Semiotic Speech Code	262
Ordered Discrete Tonal Articulation: Its Pertinence to the Speech Code	262
The Vowel Triad: Origin of the Speech Code	263
The Syllabic Key to the Speech Code.....	264
The Acoustic Codification of Phenomena is Syllabic	267
Symmetry as the Structuring Element of the Speech Code... ..	267
Triadic Symmetry – Relevance to Phonic and Lexical Development.....	270
Triadic Organization in Nature	271

Triadic Structure of the Generative Key to the Speech Code	272
The Syllable: A Molecular Ordered Set at the Root of the Speech Code	274
The Symmetrical Vowel Triangle	275
The Speech Code in Evolutionary Perspective.....	276
Syntactic Dimension of the Speech Code	277
From Perceptual Conceptualization to Syntactic Statement	279
Genetic Code and Speech Code: A Semiotic Analogical Transposition	281
To Codify is to Systematize.....	282
The Speech Code: A Combinatory <i>Ars Magna</i>	283
Summary: The Speech Code, A Dual Coded System of Combinatorial Construction: The Origin of the Speech Code	285
XII. ORGANIC TYPOLOGY OF PHONIC ELEMENTS	297
Transitional Forms in the Phonic Structure of Speech	298
Classification of Phonic Elements by Type	300
The Acoustics of Consonants	303
Functional Ambivalence of the Liquids and Nasals [l r m n].....	309
The Aesthetic Quality of Consonant Sound Perception.....	310
 PART II	
I. MORPHOLOGY OF RHYTHMIC ORGANIZATION: FROM PATTERNED SPINAL PULSATIONS TO SYMBOLIC RHYTHMIC PRACTICE IN CHOREOGRAPHY, MUSIC AND SPEECH.....	315
Preliminary	315
Rhythmic Locomotion	315

Neural Source of Rhythmic Motion in Vertebrates:	
Primary Spinal Generation of Rhythms	317
Rhythmic Motion in the Absence of Sensory Input.....	319
The Cerebellum – An Explanatory Digression.....	319
The Cortex and Cortical Function	321
Relevance of Physiological Rhythmic Autonomy to Conventionally Crafted Rhythmic Modalities	324
Central Pattern Generators in Human Vertebrates.....	326
Primary Supraspinal Centers of Locomotion Coordination	327
The Rhythmic Walk Objectified	328
Coordination Among Locomotor Pattern Generators.....	329
Relevance to the Higher Symbolic Rhythmical Functions..	330
Sensory Inputs in the Production of Rhythmic Movements	331
Supraspinal Influences on Locomotor Central Pattern Generators	332
The Human Gait: The Natural Periodic Regularity of the Human Walk and Its Conventional Rhythmic Organization.....	334
Morphology of the Human Gait.....	336
Summary: Ordered, Rhythmical Locomotion and Crafted Rhythmic Practice.....	338
Rhythmic Organization: Evolution and Present Structural State.....	340
Neural Sources of Spatial Orientation	341
Rhythm: Physiological and Conventionally Formative	343
Pattern Superposed on Pattern: Its Neural Manifestation ..	344
From Natural to Symbolic Order	345
Rhythmic Motion in Dance, Music and Speech	346
The Rhythmical Basis of Speech	347

II. BIOMECHANICAL COMBINATORY PERFORMANCE OF THE TONGUE AS A MUSCULAR ARTICULATORY HYDROSTAT.....	349
Motor Primitives as the Basis for Biomechanical Directional Movement	349
The Tongue: A Muscular Hydrostat with Biomechanical Articulatory Combinatory Capability	350
The Speed-Curvature Power Law in Tongue Movements of Repetitive Speech	351
The Primal Triadic Biomechanical Vowel Interaction.....	352
Optimization by Intrinsic Biomechanical Coordination – Its Pertinence to Articulatory Tongue Movements.....	353
Anatomy of the Tongue in its Biomechanical Phonic Import.....	355
Phonic Significance of Tongue Action in the Production of Three Fundamental Vowel Qualities.....	357
A Multiplicity of Vowel Qualities	358
Physiologically Based Phonic Description	359
Consonant Articulation	360
III. PSYCHOMOTOR LEARNING: TRANSFER OF LEARNING AND TRANSPOSITION OF GENERATIVE MOTOR SKILLS.....	361
Psychomotor Skill in Music and Speech.....	361
Learned Rhythmical Psychomotor Features of Music, Speech and Dance.....	363
Length of Practice and Neural Retentive Activity	365
Optimal Conditions of Psychomotor Learning	365
Transfer and Generalization of Learning	367
Transfer of Patterned Psychomotor Skills by Generalization: From Choreographic to Scalar Melodic.....	368
Prerequisites of Transfer and Transposition.....	368

Specific Transfer Between Patterned Intervallic Forms is Contingent Upon These Factors.....	369
--	-----

PART III: ESSAYS

I. INFANT ACQUISITION OF SPEECH.....	375
Infant Speech Development: Current Stages as Described in Scientific Literature	376
The Tonal Unit: Central Developmental Feature of the Infant Cry and the Incipient Evolution of Speech.....	378
Conclusion.....	381
Perception and Neural Development in Bilingual Children	381
Rhythmical Underpinnings of Speech.....	384
Darwin: A Biographical Sketch of an Infant	385
From Indicatory Gestures and Signal Cries to Syllabic Articulation	389
Rhythm Actualized in Prosodic Intonation	392
Infant Speech Development: A Neurological and Psychoacoustical Orientation.....	394
Onset of Speech Development.....	396
Voluntary Sound Imitation: Lallation.....	398
Rhythmical Repetition of Sound Sequences	399
Developmental Immaturity – Idioglossia and Echolalia.....	400
Evolution of Symbolic Consciousness	401
Helen Keller: Articulatory and Cognitive Development	405
II. SYNTAX.....	409
Word-Sense: Truth in Syntactic Statements	409
Speech	411
The Invention of Words.....	411
The Syntactic Statement.....	412

Transitional Actualization: From Isolated Words ("Names") to Syntactic Statements	413
Abstractive – Designatory Conceptualization.....	415
The Statement: Conclusion.....	416
Stages in the Development of Syntax	418
The Dual Typology of Words in Cognitive Perspective	420
The Syntactic Statement.....	421
Minimal Complexity of Statement in Connected Speech: An Ethnographic Example	422
Syntax and the Notion of Relation: The Influence of Kin Awareness	425
The Specification of Signs By Signs.....	426
Speech: A System of Dual Referential Signs Ordered by Rules	427
Relation in the Indo-European Case System	427
Basic Indo-European Morphology: The Component Elements of Words (Examples From Classical Greek)	429
The Indo-European Morphological "Case" Variations of Nouns.....	430
Syntax Transformed by Prosody	433
Accentual Syllabic Character of Prosody	434
Conclusion.....	437
 III. THE CONVERGENCE OF LANGUAGE AND THOUGHT	 439
SCHEMA: Semantic History and Cognitive Evolution of the Term	439
Semantic Evolution	441
Schema: Significant Structure	442
The Cognitive Influence of Schematic Thinking	442
The Schematization of Kinetic Energy: Bodily Movement and Sound-Waves.....	443

Cognitive Use of the Terms “Schema, Figuration and Figurative” in English	445
Scheme	446
Schema, Scheme and Schematization in the Context of Music and Speech	448
The German Contribution	450
Time and Space: Prototypical Schemata of Perception and Cognition	451
Schemas: Internal Spatial Models of the World	453
<i>Grammatike Techne</i> (the Technique of Grammar): the Grammatical Schematization of Speech—Make by Art, Execute Skillfully	455
Summary: The Convergence of Language and Thought.....	455
 IV. DANCE, MUSIC AND SPEECH: RECIPROCALLY FORMATIVE.....	457
Preliminary	457
Arsis and Thesis	458
Intervallic Subdivision and Combinatory Composition	459
Rhythmic Autonomy	461
Declamation	461
Musically Intoned Recitation	463
Speech and Dance: Formative Mediums of Western Music	464
The Influence of Syllabic Speech On Music.....	466
Influence of Dance and Speech on Music in the 13 th Century	469
Old Provençal Poetry and Song.....	471
References.....	472
The Dance Informs Music	473
Summary.....	478

Number, Measure and Cadence in Music, Speech and Dance.....	479
Number	480
From Horizontal Step Configurations to Vertical Scalar Subdivisions	481
Number As a Classificatory Category Relevant to Music, Speech and Dance According to Latin Authors	482
Number and Interval in the Dance	483
Structural Analogy Between Dance, Music and Speech	485
Choreographic Notation.....	487
BIBLIOGRAPHY	491
