

Contents

1. Introduction	1
1.1 Task of Gravimetry	1
1.2 Historical Development	3
1.2.1 Theoretical Foundation (17th and 18th Century)	4
1.2.2 Pendulum Measurements and Geodetic-Geophysical Utilization (18th and 19th Century)	6
1.2.3 Torsion Balance and Gravimeter Observations and Utilization in Applied Geophysics (First Half of the 20th Century)	10
1.2.4 Establishment of Gravity Networks and Geodetic-Geophysical Results (Second Half of the 20th Century)	12
1.2.5 Assessment of Temporal Gravity Changes	16
1.3 National and International Organizations	17
1.3.1 National Institutions	17
1.3.2 International Cooperation	19
1.3.3 Scientific Communication and Documentation	21
2. Theory of the Gravity Field	22
2.1 Coordinate Systems	22
2.1.1 Earth-Fixed Geocentric System	22
2.1.2 Local Gravity Field Systems	23
2.2 Fundamental Relationships in the Gravity Field	24
2.2.1 Gravity Acceleration and Gravity Potential	24
2.2.2 Differential and Integral Formulas for the Gravitational Potential	26
2.2.3 Spherical Harmonic Expansion	28
2.3 Geometry of the Gravity Field	31
2.3.1 Equipotential Surfaces and Plumblines	31
2.3.2 Gravity Gradient and Curvature of the Gravity Field	32
2.4 Gravity Field Models	34
2.4.1 Optimal and Standard Models	34
2.4.2 Level Ellipsoid	35
2.4.3 Normal Gravity Field	37

2.5	Height Systems	39	4.2.2	Global Gravity Field Approximation.....	86
2.5.1	Ellipsoidal Heights	39	4.2.3	Local Gravity Field Approximation.....	88
2.5.2	Heights in the Gravity Field.....	40	4.2.4	Gravity and Elevation.....	91
2.6	Disturbing Quantities in the Gravity Field.....	42	4.3	Gravity Field and Geophysics	92
2.6.1	Disturbing Potential	42	4.3.1	Gravity Field and Density Distribution	92
2.6.2	Gravity Anomaly	43	4.3.2	Global Density Models	96
2.6.3	Second Derivatives of the Disturbing Potential.....	45	4.3.3	Bouguer Anomalies, Isostatic Anomalies	100
2.7	Statistical Description of the Gravity Field	45	4.3.4	Gravity Field and Crust-Mantle Structure.....	102
2.7.1	Anomaly Covariance Function.....	45	4.3.5	Applied Gravimetry	109
2.7.2	Interpolation in the Gravity Field	47	4.3.6	Gravity Field and Topography of Sea Surface and Sea Floor	113
2.7.3	Anomaly Degree Variances	48	4.4	Gravity Field and Geodynamics	116
3. Space-Time Structure of the Exterior Gravity Field.....		50	4.4.1	Gravity Field, Tectonics, and Isostasy	116
3.1	Normal Gravity Field of the Earth	50	4.4.2	Temporal Gravity Changes and Recent Geodynamics	121
3.1.1	Normal Gravity Formulas	50	4.5	Gravity Field and Orbit Computations	124
3.1.2	Geodetic Reference System 1980.....	52	4.5.1	Astronomy and Astronautics	124
3.2	Free-Air Anomalies.....	54	4.5.2	Terrestrial Navigation	126
3.2.1	Point Free-Air Anomalies	54	5. Absolute Gravity Measurements		128
3.2.2	Height Dependency	56	5.1	Free-Fall Methods: Fundamentals.....	128
3.2.3	Mean Free-Air Anomalies	57	5.1.1	Free Fall	128
3.3	Global and Regional Structures of the Terrestrial Gravity Field.....	60	5.1.2	Symmetric Rise and Fall	129
3.3.1	Correlation of the Free-Air Anomalies	60	5.1.3	Free Fall in a Non-Homogeneous Gravity Field.....	131
3.3.2	Degree Variance Model.....	62	5.1.4	Distance and Time Measurement	133
3.3.3	Spherical Harmonic Model	64	5.1.5	Atmospheric Pressure and Microseismics.....	136
3.4	Temporal Gravity Variations	65	5.1.6	Error Sources and Accuracy.....	139
3.4.1	Changes of Gravitational Constant and Earth Rotation..	65	5.2	Free-Fall Experiments and Results.....	144
3.4.2	Gravimetric Tides of the Rigid Earth.....	67	5.2.1	Laboratory Experiments 1950-1970	144
3.4.3	Gravimetric Earth Tides and Ocean Loading Tides	70	5.2.2	Permanent Absolute Gravity Stations	145
3.4.4	Terrestrial Mass Displacements	73	5.2.3	Transportable Free-Fall Instruments	149
3.5	Gravity Fields of Moon and Planets	75	5.2.4	Transportable Rise and Fall-Instruments.....	164
3.5.1	Lunar Gravity Field.....	75	5.3	Pendulum Method	168
3.5.2	Planetary Gravity Fields	77	5.3.1	Mathematical Pendulum and Wire Pendulum.....	168
4. Importance of Gravity in Natural and Engineering Sciences		79	5.3.2	Physical Pendulum and Reversible Pendulum.....	171
4.1	Gravity in Physics	79	5.3.3	Error Sources and Accuracy.....	174
4.1.1	Gravity Data in Metrology	79	5.3.4	Pendulum Experiments and Results	179
4.1.2	Determination of the Gravitational Constant	81	6. Relative Gravity Measurements		184
4.2	Gravity Field and Geodesy	84	6.1	Dynamic Method	185
4.2.1	Gravity and Position Determination	84	6.1.1	Relative Pendulum Measurements: Fundamentals.....	185
			6.1.2	Relative Pendulum Instruments and Results	186

x	Contents		Contents	xi	
6.1.3	Inverted Pendulum.....	189	7.2.4	Inertial Accelerations due to Earth Rotation.....	271
6.1.4	Vibrating String Gravimeter.....	191	7.3	Sea and Airborne Gravimeter Systems.....	273
6.2	Static Method.....	194	7.3.1	Early Gravity Measurements at Sea.....	273
6.2.1	Vertical Spring Balance.....	194	7.3.2	Lever Spring Balance Systems.....	274
6.2.2	Lever Spring Balance.....	196	7.3.3	Vertical Measurement Systems.....	277
6.2.3	Astatization.....	199	7.3.4	Vibrating String Gravimeters.....	280
6.2.4	Non-Elastic Counterforces.....	201	7.3.5	Force-Balanced Accelerometers.....	281
6.3	Design Features of Spring Gravimeters.....	203	7.4	Error Sources and Accuracy.....	283
6.3.1	Main Construction Components.....	203	7.4.1	Sea Gravimetry.....	283
6.3.2	Elastic Springs.....	203	7.4.2	Airborne Gravimetry.....	287
6.3.3	Pick-Off Systems.....	205	7.5	Inertial Gravimetry.....	290
6.3.4	Leveling Device.....	208	7.5.1	Fundamentals.....	290
6.3.5	Compensation and Shielding Devices.....	210	7.5.2	Inertial Measurement Systems and Observation Procedure.....	293
6.4	Calibration of Relative Gravimeters.....	212	7.5.3	Error Sources and Accuracy.....	295
6.4.1	Calibration Function.....	212	8. Gravity Gradiometry.....	298	
6.4.2	Calibration by Inclination Change.....	215	8.1	Fundamentals.....	298
6.4.3	Calibration by Change of Mass.....	216	8.1.1	Importance of the Gravity Gradient Tensor.....	298
6.4.4	Calibration with Feedback System.....	218	8.1.2	Normal Gravity Field Gradients and Disturbing Gradients.....	299
6.4.5	Calibration Lines and Calibration Systems.....	219	8.1.3	Principle of Gravity Gradiometers.....	300
6.5	Static Spring Gravimeters.....	224	8.2	Stationary Gravity Gradiometry.....	303
6.5.1	Developments until 1950.....	224	8.2.1	Torsion Balance.....	303
6.5.2	Lever Torsion Spring Balances (Askania System).....	228	8.2.2	Gravimeter Gradiometry.....	306
6.5.3	Quartz Spring Gravimeters (Worden System).....	232	8.3	Gravity Gradiometry on Moving Platforms.....	307
6.5.4	Astatized Metal Spring Gravimeters (LaCoste and Romberg System).....	237	8.3.1	Fundamentals.....	307
6.6	Error Sources and Accuracy.....	241	8.3.2	Surface and Airborne Gradiometry.....	310
6.6.1	Instrumental Error Effects.....	241	8.3.3	Satellite Gradiometry.....	312
6.6.2	External Error Effects.....	244	9. Gravimetric Surveys.....	314	
6.6.3	Gravimeter Drift.....	249	9.1	Gravity Reference Systems.....	314
6.6.4	Accuracy.....	254	9.1.1	International Gravity Standardization Net 1971 (I.G.S.N.71).....	314
7. Gravity Measurements in Inaccessible Areas and on Moving Platforms.....	258		9.1.2	Gravimetric Ties to the I.G.S.N.71.....	316
7.1	Gravity Measurements in Inaccessible Areas.....	258	9.1.3	Global Absolute Gravity Network.....	317
7.1.1	Measurements on the Sea-Floor.....	258	9.2	Gravity Networks.....	318
7.1.2	Measurements in Boreholes.....	260	9.2.1	Objectives, Station Selection.....	318
7.1.3	Measurements on the Moon.....	261	9.2.2	Survey Procedure.....	320
7.2	Gravity Measurements on Moving Platforms.....	262	9.2.3	Reading Reductions and Corrections.....	322
7.2.1	Fundamentals.....	262	9.2.4	Computations.....	324
7.2.2	Vertical Disturbing Accelerations.....	264			
7.2.3	Horizontal Disturbing Accelerations.....	267			

9.2.5	Network Quality and Optimization	330
9.2.6	National Gravity Networks	334
9.3	Regional and Local Gravimetric Surveys	337
9.3.1	Objectives, Station Distribution	337
9.3.2	Survey Procedure and Computation	339
9.3.3	Determination of Horizontal Position and Elevation	340
9.3.4	Density Determination	343
9.3.5	Marine and Airborne Gravimetric Surveys	349
9.3.6	Examples of Regional and Local Gravimetric Surveys	354
9.4	Archival of Results	359
9.4.1	Station Descriptions	359
9.4.2	Gravity Data Bases	361
9.4.3	Gravimetric Products	363
10.	Determination of Temporal Gravity Changes	365
10.1	Measurement Instruments and Observation Methods	366
10.1.1	Precision Gravity Networks	366
10.1.2	Recording Gravimeter Systems: Fundamentals	368
10.1.3	Calibration of Recording Gravimeters	371
10.1.4	Recording Spring Gravimeters	375
10.1.5	Superconducting Gravimeter	378
10.2	Gravitational Effects of Non-Tectonic Origin	382
10.2.1	Atmospheric Effects	382
10.2.2	Hydrological Effects	384
10.2.3	Man-Made Gravity Changes	386
10.3	Measurement of Gravimetric Earth Tides	388
10.3.1	Objectives	388
10.3.2	Evaluation, Results, Accuracy	390
10.3.3	Utilization of Results	396
10.4	Gravity Changes by Terrestrial Mass Displacements of Geodynamic Origin	400
10.4.1	Global Gravity Changes	400
10.4.2	Regional Gravity Changes	401
10.4.3	Local Gravity Changes	406
