

Jeremy R. Walsh Ivan J. Danziger (Eds.)

Science with the VLT

Proceedings of the ESO Workshop
Held at Garching, Germany,
28 June – 1 July 1994

Springer

Contents

Part 1 The Solar System and Extra-Solar System Planets

The Solar System and the VLT	3
C. de Bergh	
Very Distant Objects in the Solar System	15
R.M. West and O.R. Hainaut	
How to Search for Extra-Solar Planets with the VLT/VISA ..	21
A. Léger, J.-M. Mariotti, D. Rouan and J. Schneider	
Astrometric Detection and Investigation of Planetary Systems with the VLT Interferometer	33
A. Quirrenbach	

Part 2 Star Formation

Star Formation Studies with the VLT	41
C. Bertout, B. Reipurth and F. Malbet	
Circumstellar Disks with VLT/VLTI	53
S.V.W. Beckwith	

Part 3 Stellar Astrophysics

Do We Need the VLT to Study Nearby Stellar Populations? ..	65
B. Gustafsson	
Nucleosynthesis in the First Galactic Stars	75
J. Andersen, B. Nordström, T.C. Beers, R. Cayrel, F. Spite, M. Spite, P.E. Nissen and B. Barbuy	

Elemental and Isotopic Abundances in Metal-Poor Stars	79
P. Magain	
Stellar Surface Structure: Doppler Imaging with the VLT-UVES	87
K.G. Strassmeier	
Observation of Surface Activity on Cool Giants with the VLT Interferometer	94
O. von der L��he, M. Sch��ssler, S.K. Solanki and P. Caligari	
Imaging the Surfaces of Late-Type Stars	100
T.R. Bedding, O. von der L��he and A.A. Zijlstra	
A Sharper View on (Post-) AGB Evolution	105
L.B.F.M. Waters	
The Asymptotic Giant Branch in the LMC, SMC and the Galactic Center	114
H.-U. K��ufl, L.B.F.M. Waters, G. Wiedemann and A. Zijlstra	
Prospects for Circumstellar Physics. Observations and Models	119
J.-P.J. Lafon	
Compact Stars In and Out of Binaries	124
F. Verbunt	
VLT High-Speed Spectro-Photometry: A Powerful Tool for Exploring Compact Stellar Objects and Related Phenomena	134
H. Barwig and K.-H. Mantel	
Observational Astrophysics on Milli-, Micro-, and Nanosecond Timescales	139
D. Dravins, L. Lindegren and E. Mezey	
Problems and Prospects in White Dwarf Stars	145
D. Koester	
Mass Determination of Very Low Mass Stars	150
A. Duquennoy, J.-M. Mariotti, M. Mayor and C. Perrier	
Evolution of Massive Stars and the VLT	155
C. Charbonnel and A. Maeder	

Part 4 Stellar Clusters

Globular Clusters with the VLT	161
F. Fusi-Pecchi, C. Cacciari, F.R. Ferraro, R. Gratton and L. Origlia	
Detailed Analysis of Stars in the Galactic Bulge with the VLT	171
R. Cayrel and P.E. Nissen	
Deep Star Counts and Cosmological Backgrounds: A Powerful New Model for the Point Source Sky	175
M. Cohen	

Part 5 Interstellar Medium

High Resolution Spectroscopy of the Interstellar Medium	183
R. Férlet	
The Interstellar Medium in Galaxies	190
J.M. van der Hulst	

Part 6 Astronomical Targets in Nearby Galaxies

Supernovae and the VLT: More Light to Examine	203
B. Leibundgut and J. Spyromilio	
Supernovae with the VLT	214
E. Capellaro, I.J. Danziger, P.A. Mazzali and M. Turatto	
Late Stages of Supernovae with the VLT	220
C. Fransson	
Faint Planetary Nebulae as Mass Tracers for Early Type Galaxies	232
M. Arnaboldi, S. Beaulieu, M. Capaccioli, K.C. Freeman and P.J. Quinn	
Resolving Distant Galaxies into Stars	236
D. Minniti and T.R. Bedding	

Proper Motions for the Nearest Galaxies Using ASTROCAM on the VLT	241
C.G. Tinney	
Quantitative Spectroscopy of Luminous Blue Stars in Distant Galaxies	246
R.-P. Kudritzki, D.J. Lennon and J. Puls	
Distance Indicators and the Expansion Field of the Universe	256
L. Labhardt and G.A. Tammann	
Distance Indicators: Beyond Distances - A Return to Astrophysics	267
G.H. Jacoby	
 Part 7 Active Galactic Nuclei	
High Resolution Infrared Imaging and Spectroscopy with the VLT: Galactic Nuclei	281
R. Genzel, A. Eckart, S. Drapatz and A. Krabbe	
Resolving Extragalactic Nuclei with the VLT	293
L.E. Tacconi-Garman, A. Eckart, S. Drapatz, R. Genzel, R. Hofmann, M. Löwe and A. Quirrenbach	
Galaxy Dynamics, Black Holes and FUEGOS: Prospects for Studying Stellar Dynamics	299
M. Stiavelli, P. Crane and P. Felenbok	
The VLT Contribution to Development of AGN Unified Schemes	304
M.J. Ward	
Subarcsecond Observations of Galactic Nuclei	314
G. Monnet, R. Bacon, P. Ferruit, E. Pécontal and E. Emsellem	
The AGN Environment	317
S. di Serego Alighieri	

Part 8 Quasars

Quasar Surveys and the VLT	329
P.C. Hewett	
QSO Absorption Line Systems	339
P. Petitjean	

Part 9 The Distant Universe

Observational Cosmology with Faint Galaxies and a (9±1)-meter Telescope	351
S.G. Djorgovski	
Deep Spectroscopy of 780 Galaxies: Results and Prospects for the VLT	361
F. Hammer, S.J. Lilly, O. Le Fèvre, D. Crampton and L. Tresse	
Deep Redshift Surveys on Faint Galaxies: Prospects for the VLT above $z=1$	367
O. Le Fèvre, D. Crampton, F. Hammer, S.J. Lilly and L. Tresse	
VLT Observations with Large Natural Gravitational Telescopes	372
Y. Mellier	
Integral Field Spectroscopy of Selected Extragalactic Objects with FUEGOS	383
J. Surdej, C. Vanderriest, M.-C. Angonin-Willaime, J.-F. Claeskens and P. Felenbok	
Perspectives in the Study of Large Scale Structure and Galaxy Evolution with the VLT	389
G. Vettolani	
The Nature of Compact Objects at $R=23$	397
G. Mathez, Y. Mellier and J.P. Picat	
Faint AGNs, Evolution and the X-Ray Background	402
G. Zamorani	

Part 10 High-Resolution Imaging and Interferometry

High-Resolution Imaging with the VLT at Optical Wavelengths	415
G. Weigelt	
From Planets to Galaxies: Adaptive Optics Revolution and VLT Interferometry	425
P. Léna	
A Strategy for High Angular Resolution Astrophysical Programmes at the VLT in the Visible	434
R. Foy	
Narrow-Angle Astrometry with the VLT Interferometer	445
O. von der Lühe, A. Quirrenbach and B. Koehler	

Part 11 Strategies for Use of the VLT

Flexible Professional Observing at the VLT	453
L. Woltjer	
The VLT: max (4×8; 1×16; $1/X \times 64$)?	458
K.S. de Boer	

Part 12 Synopses of Panel Discussions

I. Interferometry	467
II. Future Instrumentation	473
