

Contents

Part I	Closures and Fundamentals	
---------------	----------------------------------	--

Introductory Remarks	
B. E. Launder	3
Two-Scale Double-Layer Model in Wall Bounded Turbulent Flow	
E. Arad, M. Wolfshtein	7
Modelling of Intercomponent Transfer in Reynolds Stress Closures of Homogeneous Turbulence	
M. Hallböck, T. Sjögren, and A. V. Johansson	21
Closure of the Dissipation Tensor and the Pressure–Strain Tensor Based on the Two-Point Correlation Equation	
M. Oberlack	33
Turbulence Statistics of Rotating Channel Flow	
H. I. Andersson and R. Kristoffersen	53
Dynamic Modeling of Rotating Turbulence	
K. D. Squires and U. Piomelli	71
Large Eddy Simulation and Second-Moment Closure Model of Particle Fluctuating Motion in Two-Phase Turbulent Shear Flows	
O. Simonin, E. Deutsch, and M. Boivin	85

Part II	Free Turbulent Flows	
----------------	-----------------------------	--

Introductory Remarks	
M. Sokolov	119
Numerical Simulation of Low Re-Number Turbulence in Round Jets	
J.H. Chen, J.J. Lienau, and W. Kollmann	123

Mixing in Turbulent Opposed Jet Flows

E. Mastorakos, A. M. K. P. Taylor, and J. H. Whitelaw 147

Thermal Characteristics of Turbulent Vortices in the Wake of a Circular Cylinder

J. Mi and R. A. Antonia 165

Second-Moment Closure Predictions of Buoyant Jets in Neutral and Stratified Cross-Flows

A. D. Gosman, R. Liu, and J. J. McGuirk 187

On Coherent Vortex Formation in Axisymmetric Compressible Shear Layers

K. Yu, E. Gutmark, and K. C. Schadow 207

Part III Wall Flows**Introductory Remarks**

R. F. Blackwelder 221

Detailed Measurement of the Near-Wall Region of a Turbulent Pipe Flow

F. Durst, J. Jovanović, and J. Sender 225

Direct Numerical Simulation of Turbulent Plane Couette-Poiseuille Flows: Effect of Mean Shear Rate on the Near-Wall Turbulence Structures

A. Kuroda, N. Kasagi, and M. Hirata 241

Large Eddy Simulation of Turbulent Flow in Concentric Annuli with a Thin Inner Rod

S. Satake and H. Kawamura 259

Direct and Large-Eddy Simulations of Transition of a Supersonic Boundary Layer

F. Ducros, P. Comte, and M. Lesieur 283

Fine Structure of Reynolds Shear Stress in an Unsteady Turbulent Channel Flow

S. Tardu, M. Q. Feng, and G. Binder 301

Computation of Oscillating Turbulent Flows at Transitional Re-Numbers

K. Hanjalić, S. Jakirlić, and I. Hadžić 323

Structure of Heat Transfer in the Thermal Layer Growing in a Fully Developed Turbulent Flow	
Y. Nagano, H. Sato, and M. Tagawa	343
Structure of the Turbulent Boundary Layer and Heat Transfer Downstream of a Vortex Generator Attached to a LEBU Plate	
K. Inaoka and K. Suzuki	365
Part IV Combustion and Recirculating Flows	
Introductory Remarks	
D. Bradley	385
Transient Flame Growth in a Developing Shear Layer	
R. P. Lindstedt and V. Sakthitharan	389
Spectral Measurement of Reactive and Conserved Scalars in a Turbulent Reactive-Scalar-Mixing Layer	
J. D. Li, R. J. Brown, and R. W. Bilger	411
Turbulent Mixing and Non-gradient Diffusion in Baffle-stabilized Flames	
P. Ferrão and M. V. Heitor	427
Turbulent Premixed Flame Propagation Revisited Results with a New Model	
T. Mantel, R. Borghi, and A. Picart	439
A Description of Turbulent Premixed Flames Based on Flamelet Time Statistics	
Ch. Mounaïm-Rousselle and I. Gökalp	459
Index of Contributors	473
