

Georges Meylan (Ed.)

QSO Absorption Lines

Proceedings of the ESO Workshop
Held at Garching, Germany,
21–24 November 1994

Springer

Contents

PART I INTRODUCTION

QSO Absorption Lines: Progress, Problems, and Opportunities	3
R.J. Weymann	

PART II DAMPED LYMAN-ALPHA SYSTEMS

Evolution of the Neutral Gas and Metal Content of Damped Lyman-Alpha Systems	13
A.M. Wolfe	
Consequences of Dust in Damped Lyman-Alpha Systems	23
S.M. Fall and Y.C. Pei	
Are Studies of Dust in Damped Lyman-Alpha Systems Biased by Extinction ?	35
P. Boissé	
QSO Absorption by Nearby Galaxies	37
M. Trewhella, M. Disney, and J. Davies	
The Mass Spectrum of Giant Hydrogen Clouds Associated with Damped Lyman-Alpha Absorbers	39
V.K. Khersonsky and D.A. Turnshek	
A Damped Lyman-Alpha Survey at $z < 1.65$	43
S. Rao, D.A. Turnshek, and F. Briggs	
High Redshift Lyman Limit and Damped Lyman-Alpha Absorbers	47
L.J. Storrie-Lombardi, R.G. McMahon, M.J. Irwin, and C. Hazard	
Moderate Resolution Studies of Damped Lyman-Alpha Systems at High Redshift	51
J. Saucedo and J. Bechtold	

Near-Infrared Hα Searches for Companion Galaxies to Damped Lyman-Alpha Systems at $z > 2$	53
A.J. Bunker, S.J. Warren, P.C. Hewett, and D.L. Clements	

Lyman-Alpha Emission from Galaxies at High Redshifts	55
M. Pettini, R.W. Hunstead, D.L. King, and L.J. Smith	

PART III ABUNDANCES

Abundances and Nature of the Absorbers	61
P. Petitjean	

The Chemical Evolution of Damped Lyman-Alpha Galaxies ..	71
M. Pettini, D.L. King, L.J. Smith, and R.W. Hunstead	

Chemical Evolution of (Proto-) Galactic Disks and Metal Abundances of Damped Lyman-Alpha Absorbers	81
U. Fritze - v. Alvensleben	

Abundances and Ionization in Multiple-Component Absorbers	85
R.F. Green, D. York, K. Huang, J. Bechtold, D. Welty, M. Carlson, P. Khare, and V. Kulkarni	

Element Abundances at High Redshifts: The N/O Ratio at Low Metallicity	89
K. Lipman, M. Pettini, and R.W. Hunstead	

Abundances in the Lyman-Alpha Clouds	95
S. Savaglio and J.K. Webb	

Relative Metal Abundance Patterns in Two Damped Lyman-Alpha Systems	101
L. Lu, B.D. Savage, T.M. Tripp, and D.M. Meyer	

As Metal Poor as It Could Be: the Damped System at $z=3.390$ Towards QSO 0000-2619	103
G. Vladilo, S. D'Odorico, P. Molaro, and S. Savaglio	

PART IV ABSORPTION LINES FROM GAS IN OUR GALAXY

Lessons Learned from UV Absorption Lines at $z = 0$	107
E.B. Jenkins	

Probing the Outer Galactic Halo with the GHRS	119
B.D. Savage, L. Lu, and K.R. Sembach	
Detection of Highly Ionized Galactic HVCs Toward Markarian 509	123
K.R. Sembach, B.D. Savage, L. Lu, and E. Murphy	
...	
<u>PART V METAL-RICH SYSTEMS AT LOW AND INTERMEDIATE REDSHIFTS</u>	
The Subclasses of Metal-Rich Absorbers	127
J. Bergeron	
Observational Constraints on the Nature of Low-Redshift Lyman-Alpha Absorbers	137
V. Le Brun, J. Bergeron, and P. Boissé	
The Nature and Evolution of Absorption-Selected Galaxies ..	139
C.C. Steidel	
From Metal-Line Absorption Profiles to Halo Kinematics? ...	153
C.W. Churchill, S.S. Vogt, and C.C. Steidel	
Keck HIRES Spectroscopy: Low-Redshift Mg II and Lyman-Alpha Systems	157
D.S. Womble	
Mg II Absorption from Low-Redshift Galaxies	161
D.V. Bowen, J.C. Blades, and M. Pettini	
The Sizes of Mg II Absorption Systems	165
M.J. Drinkwater, R.L. Webster, and P.A. Thomas	
Hunting for Mg II Absorbers with Fabry-Perot Imaging	169
G. Thimm	
Intrinsic Interstellar Absorption in Two Radio Galaxies at $z=0.8$	171
S. di Serego Alighieri, A. Cimatti, and S. Savaglio	
Molecular Absorption in the Millimeter Range	175
T. Wiklind and F. Combes	
CO Emission at $z = 0.437$ Toward 3C 196	179
D.T. Frayer and R.L. Brown	

Automated Search for Absorption Systems in Low-Resolution QSO Spectra	181
S. López and L. Wisotzki	
Quantitative Spectroscopy of HS 1700+6416 with the Hubble Space Telescope	183
D. Reimers, S. Köhler, and H.-J. Hagen	
Reanalysis of the Lyman Limit Systems in QSO HS 1700+6416	193
R. Riediger and P. Petitjean	
Metal Line Absorptions Toward the QSO HS1700+6416	195
J.L. Sanz, P.M. Rodríguez-Pascual, A. de la Fuente, M.C. Recondo, J. Clavel, M. Santos-Lleó, W. Wamsteker	
High Signal-to-Noise Echelle Spectroscopy of HS 1946+7658 ..	197
T.M. Tripp, L. Lu, and B.D. Savage	
Redshift Evolution of the Carbon Abundance in Galaxies	199
E.A. Stengler-Larrea	
Recent Results on QSO Absorption Lines	201
E.M. Burbidge	
Fine-Structure Doublets in QSO Spectra and Variability of the Fine-Structure Constant α	203
S.A. Levshakov and S. D'Odorico	
Limits on Star Formation Rates in Four Quasar Metal-Line Absorbers	205
N. Bergvall, G. Östlin, K.-G. Karlsson, E. Örndahl, and J. Rönback	
A Group of Galaxies at $z = 2.38$	207
P. Francis, B. Woodgate, S.J. Warren, P. Møller, J. Lowenthal, and T. Williams	
A Narrow-Line Emission Galaxy at $z = 2.8$ in the Field of Q0831+128	209
A. Aragón-Salamanca	

PART VI BAL QSOS AND QUASAR ENVIRONMENT

Broad Absorption Line Quasars: An Overview	213
R.J. Weymann	

The Covering Factors, Ionization Structure, and Chemical Composition of QSO Broad Absorption Line Region Gas	223
D.A. Turnshek	
The Absorption Spectrum of Nuclear Gas in Q 0059-2735	237
E.J. Wampler	
The BAL QSO Theory	241
E.Y. Vilkoviskij and I.V. Nosov	
Evaporation Dominated Flows in BAL Regions of QSOs	243
Y.A. Shchekinov	
Testing Unified X-ray – UV Absorber Models with NGC 5548	245
S. Mathur, M. Elvis, and B. Wilkes	
An Associated Absorption System in Front of a Peculiar QSO with $z_{\text{abs}} \sim z_{\text{em}} \sim 2.7$	247
L.E. Campusano and R.G. Clowes	
X-Ray Environment of 3CR Radio Sources	249
M.A. Prieto	

PART VII LYMAN-ALPHA SYSTEMS AT LOW AND HIGH REDSHIFTS

Observations of Lyman-Alpha and Lyman-Limit Systems from the HST Quasar Absorption Line Key Project	253
A. Boksenberg	
The Gaseous Extent of Galaxies and the Origin of Lyman-Alpha Absorption Systems	263
K.M. Lanzetta, J.K. Webb, and X. Barcons	
Are Low Redshift Lyman-Alpha Absorption Systems Associated with Galaxies ?	273
M. Rauch, R.J. Weymann, and S.L. Morris	
Gravitational Lenses and Quasar Absorption Lines	275
A. Smette	
Galaxies Close to the Line of Sight to Two $z = 1$ Quasars: Implications for Galactic Halos and Gravitational Lensing	287
J.W. Fried	

Ionization and Abundances of Intergalactic Gas	289
D. Tytler, X.-M. Fan, S. Burles, L. Cottrell, C. Davis, D. Kirkman, and L. Zuo	
The Proximity Effect	299
J. Bechtold	
The Proximity Effect on the Lyman-Alpha Forest Due to a Foreground QSO	311
A. Fernández-Soto, X. Barcons, R. Carballo, and J.K. Webb	
Lyman-Alpha Forest: Results and Prospects	313
R.F. Carswell	
Simulation Analysis of the Lyman-Alpha Forest	321
A. Dobrzycki and J. Bechtold	
Evidence for Large, Quiescent Lyman-Alpha Clouds from HST UV Spectroscopy of the Quasar Pair Q 0107-025A,B	323
N. Dinshaw, C.B. Foltz, C.D. Impey, R.J. Weymann, and S.L. Morris	
The Absorption Spectra of Q1107+487 and Q1442+295	327
R. Carballo, X. Barcons, and J.K. Webb	
Common Lyman-Alpha Absorption Toward the Quasar Pair Q1343+2640A,B	329
N. Dinshaw, C.D. Impey, C.B. Foltz, R.J. Weymann, and F.H. Chaffee	
The Lyman-Alpha Forest Towards HS1700+6416 at High Resolution	331
P.M. Rodríguez-Pascual, A. de la Fuente, J.L. Sanz, M.C. Recondo, J. Clavel, M. Santos-Lleó, W. Wamsteker	
High-Resolution Spectroscopy of the Bright Quasar HS 1946+7658	333
A. de la Fuente, P.M. Rodríguez-Pascual, J.L. Sanz, M.C. Recondo, J. Clavel, M. Santos-Lleó, and W. Wamsteker	

PART VIII LARGE-SCALE STRUCTURE

The Spatial Correlation of Lyman-Alpha Clouds	337
S. Bajtlik	

Small-Scale Clustering in a Column-Density-Limited Sample of the Lyman-Alpha Forest	343
V.V. Chernomordik	
Discovery of a Lyman-Alpha Cloud in a Cosmic Void	347
J. Stocke, J.M. Shull, S.V. Penton, M. Donahue, and C. Carilli	
The Observed Properties of Lyman-Alpha Clouds as Signatures of Dark Matter Potential Wells	351
V.K. Khersonsky and D.A. Turnshek	
Redshift Dependence of the Number Density of Lyman-Alpha Lines and Evolution of the Dark Matter Filamentary Structures	353
J.P. Mücke, P. Petitjean, and R. Kates	
Hydrodynamical Simulations of Lyman-Alpha Clouds	355
S. Murray and P. Petitjean	
Clustering of the Lyman-Alpha Clouds in the Line of Sight to the $z = 3.66$ QSO 0055-269	357
S. Cristiani, S. D'Odorico, A. Fontana, E. Giallongo, and S. Savaglio	
The Clustering of QSO Absorption-Line Systems	361
P. Francis and S. Veeraraghavan	
Clustering in the Lyman-Alpha Forest at $z > 4$	363
M.J. Irwin, L.J. Storrie-Lombardi, and R.G. McMahon	
Large-Scale Structure at High Redshift	365
C.D. Impey and N. Dinshaw	
Investigating the Connection Between Lyman-Alpha Absorbers and Large-Scale Galaxy Structures	369
V. Sarajedini, R.F. Green, and B.T. Jannuzi	
QSO Spectra and the Evolution of Structure	371
A.G. Doroshkevich and V.I. Turchaninov	
QSO Absorption Lines as a Cosmic Reference Frame	373
M. Rauch	

PART IX THE UV BACKGROUND

The Ultraviolet Extragalactic Background	377
P. Madau	
Effects of the Photoionizing Background on Galaxy Formation	381
M. Chiba and B.B. Nath	
The Helium Gunn–Peterson Test	383
P. Jakobsen	
New Results on the Gunn–Peterson Effect at High Redshift ..	393
E. Giallongo, S. D’Odorico, A. Fontana, S. Savaglio, S. Cristiani, and P. Molaro	
The HeII Proximity Effect	397
A. Meiksin	
On the HeII Absorption Towards Q0302–003	399
M.A. Fardal, M.L. Giroux, and J.M. Shull	
Active Galactic Nuclei as Cosmological Probes	401
E. Szuszkiewicz	

PART X FORMATION OF ABSORBING SYSTEMS

Models of Lyman–Alpha Forest Clouds	405
J.C. Charlton	
Sizes and Dynamics of the Lyman Forest Clouds	419
M.J. Rees	
Hydrodynamic Simulations of the Lyman–Alpha Forest in a Theory of Gravitational Collapse	427
J. Miralda-Escudé, R. Cen, J.P. Ostriker, and M. Rauch	
Uncertainties in the Interpretation of the Lyman–Alpha Forest Lines	433
S.A. Levshakov and W.H. Kegel	
Environmental Effects on a Lyman–Alpha Cloud Confined by a Dark Halo	435
I. Murakami and S. Ikeuchi	

Photoionization Edges of Galaxies and the HI Column Density Distribution	437
M.A. Fardal and P.R. Maloney	
Hot Galactic Halos and Lyman–Limit Systems of Quasars	439
A.C.S. Friça and S.M. Viegas	
Lyman–Alpha Clouds from Dwarf Outflows	441
B. Wang	
Consequences of HII Region Model for Absorption Systems in QSOs	443
R. Srianand and P. Khare	
QSO Absorption Line Systems as Pressure–Confined Clouds in Galactic Haloes	445
H.J. Mo	
Jeans–Type Instability of the Reheated IGM	447
H.G. Bi, G. Börner, L.Z. Fang, and Q.B. Li	
Ω_{baryon} and the Geometry of Intermediate Redshift Lyman–Alpha Absorption Systems	449
M. Rauch and M.G. Haehnelt	
 <u>PART XI WORKSHOP SUMMARY AND CONCLUSION</u>	
Summary: An Absorbing Workshop	453
V. Trimble	
Author Index	469
