

# Contents

## Part I Introduction

<b>1</b>	<b>Introduction to Microscopy Techniques</b>	<b>3</b>
1.1	Which is More Valid: Information Obtained by Eyes or by Hand?	3
1.2	Transmission Electron Microscopy	5
1.2.1	Analytical TEM	5
1.3	Scanning Electron Microscopy (SEM)	7
1.4	Atomic Force Microscopy	7
	References	9

## Part II Biological Related (Hydrated) Matter

<b>2</b>	<b>Visualization of Organic-Inorganic Nanostructures in Liquid</b>	<b>13</b>
2.1	Introduction	13
2.2	Analytical Techniques Employed for the Characterisation of Colloidal Systems	15
2.3	Transmission Electron Microscopy: Experimental Setup, Sample Preparation and Potential Artefacts	15
2.4	Cryogenic Transmission Electron Microscopy (Cryo TEM): Experimental Setup, Sample Preparation and Potential Artefacts	16
2.5	Laser Light Scattering Versus Electron Microscopy	20
2.6	Freeze-Etching and Freeze-Fracturing of Nanoemulsions for Transmission Electron Microscopy (FF-TEM): Experimental Setup, Sample Preparation and Potential Artefacts	23
2.7	Scanning Electron Microscopy, Cryo SEM and Freeze-Fracture SEM: Experimental Setup, Sample Preparation and Potential Artefacts	25

2.8	Recent Advances: Cryo Analytical TEM (cryo ATEM) . . . . .	27
	References . . . . .	28
<b>3</b>	<b>Macromolecular Distributions in Biological Organisms In Vivo . . . . .</b>	<b>31</b>
3.1	Introduction . . . . .	31
3.2	AFM Tuning Parameters Used for the Imaging of the Epoxy Embedded Biological Samples . . . . .	34
3.3	Dependence of the AFM Phase and Topographical Contrast on the Integrity of Cellular Protein Molecules . . . . .	35
3.4	Correlative AFM/TEM Analysis of the Protein Preservation in the Samples, Prepared in Accordance with Different Freeze-Substitution Protocols . . . . .	38
3.5	Identification of the Cell Constituents in AFM Phase Image Using AFM and TEM Complementary Couples of Images . . . . .	41
3.6	Interpretation of the TEM Images Obtained from the Epoxy Fixed Sample Using Complementary AFM Data . . . . .	43
3.7	Difficulties in the AFM Image Interpretation . . . . .	45
3.8	Conclusion . . . . .	45
	References . . . . .	46
<b>4</b>	<b>Structure of the Biological Membrane (Detection of the Membrane Components In Vivo) . . . . .</b>	<b>49</b>
4.1	Introduction . . . . .	49
4.2	Cellular Membrane: Components and Functions . . . . .	49
4.3	Practical Aspects of Sample Preparation, Sources of Error and Common Artefacts . . . . .	50
4.4	Plasma Membrane by TEM . . . . .	52
4.5	Plasma Membrane by AFM . . . . .	58
	References . . . . .	59
<b>5</b>	<b>Structural and Analytical Chemical Analysis of the Organic-Inorganic Components in Biomimetic Tissue . . . . .</b>	<b>61</b>
5.1	Introduction . . . . .	61
5.2	General Mechanism of Biomimetic Tissue . . . . .	62
5.3	High Resolution Microscopical and Analytical Techniques Used for the Investigation of the Mineral Phase . . . . .	63
5.4	Correlative AFM-TEM . . . . .	66
5.5	Sample Preparation Procedure . . . . .	71
5.6	Polysaccharides-Protein Filaments . . . . .	73
5.7	Analytical TEM . . . . .	73
	References . . . . .	74

<b>6</b>	<b>Cellular Dynamics (Protein Transport, Mineralization In vivo) . . . . .</b>	77
6.1	Introduction . . . . .	77
6.2	Detection of the Macromolecular Content of a Cell by AFM and its Interpretation Using Complementary AFM-TEM Analysis. . . . .	78
6.3	Spherules Involved in Elaboration of Crustacean Cuticle During the Molt Cycle: A Correlative TEM-AFM Study . . . . .	81
	References . . . . .	83
<b>7</b>	<b>Tomography of the Hydrated Materials . . . . .</b>	85
7.1	Introduction . . . . .	85
7.2	Cryo TEM Tilt Series Based Tomography . . . . .	86
7.3	Cryo AFM Serial Section Tomography . . . . .	87
	References . . . . .	92

### Part III Polymer-Based Matter

<b>8</b>	<b>Morphology in Organic-Inorganic Composites . . . . .</b>	97
8.1	Introduction . . . . .	97
8.2	What is the Morphology of the Composite Material Containing Low Aspect Ratio/Platy/Fibrous Filler Particles? . . . . .	98
8.3	Do the Filler Substrates with Different Charge Densities Affect the Morphology? . . . . .	105
8.4	Do Different Filler Surface Modifications Affect Morphology? . . . . .	107
8.5	What is the State of Filler Alignment in the Composite? . . . . .	108
8.6	How is the Morphology Developed When Polymer is Dispersed in Polymer? . . . . .	109
8.7	What Additional Information Can Be Generated About Composites on Combining Different Techniques? . . . . .	111
	References . . . . .	113
<b>9</b>	<b>Interface Morphology . . . . .</b>	115
9.1	Introduction . . . . .	115
9.2	What is the Impact of Small Amount of Compatibilizer on the Polymer Morphology? . . . . .	115
9.3	What is the Composition of Interface in Polymer/Compatibilizer/Filler Nanocomposite? . . . . .	119
9.4	What are the Morphological Features of Polymer Blends Stabilized by Nanoparticles? . . . . .	120
9.5	How Does the Interfacial Morphology in Blends Change as a Function of Different Compositions? . . . . .	122

9.6	How Does the Morphology in the Blends Evolve When Specific Processing Conditions are Used? . . . . .	124
9.7	How Does the Morphology in the Blends Seem in 3D Microscopic Model? . . . . .	125
9.8	What is the Morphology in a Block Copolymer? . . . . .	125
	References . . . . .	125
<b>10</b>	<b>Surface and Volume Characterization</b> . . . . .	127
10.1	Introduction . . . . .	127
10.2	What is the Overall Morphology in the Volume of the Sample? . . . . .	127
10.3	Which Defects in the Volume of the Samples can be Detected? . . . . .	132
10.4	How Does the Surface Morphology Change as a Function of Synthesis Equipment? . . . . .	135
10.5	How Does the Surface Morphology of Particles Change as a Function of Reaction Conditions? . . . . .	135
10.6	What is the Surface and Volume Morphology in Particle Decorated Particles and Hollow Inorganic Particles? . . . . .	142
10.7	What is the Volume Morphology in a Polymer Monolith Formed by Association of Primary Particles? . . . . .	143
	References . . . . .	144
<b>11</b>	<b>Confirmation of Surface Reactions</b> . . . . .	147
11.1	Introduction . . . . .	147
11.2	Has the Reaction on Clay Surface Taken Place? . . . . .	147
11.3	How can the Visual Characterization Confirm the Surface Reaction? . . . . .	149
11.4	How can EDAX and EELS Quantify the Success of Surface Reactions? . . . . .	158
	References . . . . .	161
<b>12</b>	<b>Interactions Between Components</b> . . . . .	163
12.1	Introduction . . . . .	163
12.2	Is There an Interaction Between the Polymer Chains and the Filler Surface? . . . . .	163
12.3	What is the Interaction of the Surface of Particles with External Species? . . . . .	169
12.4	How Does the Surface Interact with Charged Substrate, or Stimulants Like Temperature, Salt, Sonication etc.? . . . . .	170
12.5	What is the Interaction Between Polymer Particles Grafted by Another Polymer Layer? . . . . .	172
12.6	How is One Inorganic Species Interacting with the Surface of the Other (Decoration of the Surface)? . . . . .	173

12.7	How Does the Solvent Interact with the Morphology? . . . . .	179
	References . . . . .	181
<b>13</b>	<b>Nano to Micro and Macro Characterization . . . . .</b>	<b>183</b>
13.1	Introduction . . . . .	183
13.2	What is the Morphology of the Porous Polymer Network? . . . . .	183
13.3	What is the Morphology of Polymeric Films on Substrates? . . . . .	189
13.4	What is the Morphology of an Inorganic Macroporous Network? . . . . .	191
13.5	What is the Photonic Crystal Morphology? . . . . .	193
	References . . . . .	197
