

Table of Contents

Micro Assembly Processes and Systems

Development of a Micro-scale Assembly Facility with a Three Fingered, Self-aware Assembly Tool and Electro-chemical Etching Capabilities	1
<i>Jacob W. Chesna, Stuart T. Smith, D.J. Hastings, Borja de la Maza, Bartoz K. Nowakowski, and Feilong Lin</i>	
Semi-automated Assembly of a MEMS-Based Micro-scale CMM Probe and Future Optimization of the Process Chain with a View to Desktop Factory Automation	9
<i>James D. Claverley, Arne Burisch, Richard K. Leach, and Annika Raatz</i>	
Design, Fabrication and Testing of Assembly Features for Enabling Sub-micron Accurate Passive Alignment of Photonic Chips on a Silicon Optical Bench	17
<i>J.F.C. van Gurp, Marcel Tichem, and U. Staufer</i>	
Parallel Packaging of Micro Electro Mechanical Systems (MEMS) Using Self-alignment	28
<i>Jens Taprogge, Felix Beyeler, Alexander Steinecker, and Bradley J. Nelson</i>	
Processes for the Self-assembly of Micro Parts	36
<i>Matthias Burgard, Norbert Schläfli, and Uwe Mai</i>	
Precisely Assembled Multi Deflection Arrays – Key Components for Multi Shaped Beam Lithography	42
<i>Matthias Mohaupt, Erik Beckert, Thomas Burkhardt, Marcel Hornaff, Christoph Damm, Ramona Eberhardt, Andreas Tünnermann, Hans-Joachim Döring, and Klaus Reimer</i>	

Handling and Manipulation in Assembly

Construction Kit for Miniaturised Handling Systems: Further Developments and First Applications	51
<i>Andreas Hoch, Matthias Haag, and Samuel Härer</i>	
Flexible Gripper System for Small Optical Assemblies – Final Tests and Findings	57
<i>Timo Prusi, Riku Heikkilä, T.H. Ha, J.Y. Song, C.W. Lee, and Reijo Tuokko</i>	

Handling and Manipulation of Microcomponents: Work-Cell Design and Preliminary Experiments	65
<i>Serena Ruggeri, Gianmauro Fontana, Claudia Pagano, Irene Fassi, and Giovanni Legnani</i>	
Adhesive Workpiece Fixturing for Micromachining	73
<i>Philipp Blumenthal and Annika Raatz</i>	
Dual-Stage Feed Drive for Precision Positioning on Milling Machine . . .	81
<i>Hendra Prima Syahputra, Hyeon Mo Yang, Byeong Mook Chung, and Tae Jo Ko</i>	
High Resolution Actuators for Severe Environments	89
<i>Christian Belly, Mathieu Bagot, and Frank Claeysen</i>	
Tolerance Management and Error Compensation Methods	
Tolerance Management for Assembly – Not a Matter of Product Size . . .	97
<i>Rainer Müller, Martin Esser, Christian Janßen, Matthias Vette, and Stefan Quinders</i>	
Modelling and Analysis of the Geometrical Errors of a Parallel Manipulator Micro-CMM	105
<i>Ali Rugbani and Kristiaan Schreve</i>	
Methods for Implementing Compensation Strategies in Micro Production Systems Supported by a Simulation Approach	118
<i>Christian Löchte, Jamal Kayasa, Christoph Herrmann, and Annika Raatz</i>	
Metrology and Quality Control	
Accuracy Measurements of Miniature Robot Using Optical CMM	126
<i>Asser Vuola and Reijo Tuokko</i>	
A System for the Quality Inspection of Surfaces of Watch Parts	134
<i>Giuseppe Zamuner and Jacques Jacot</i>	
Characterisation of High Accuracy, Feedback Controlled, Adhesive Bonding	144
<i>Rik Lafeber, Gerrit van den Bosch, Max Murre, Jitze Bassa, Leo van Moergestel, and Erik Puik</i>	

Intelligent Control of Assembly Systems

Towards Intelligent Assembly and Manufacturing Environment – Modular ICT Support for Holonic Manufacturing System	154
<i>Minna Lanz, Eeva Järvenpää, Pasi Luostarinen, Fernando Garcia, and Reijo Tuokko</i>	
Enabling Fast Ramp-Up of Assembly Lines through Context-Mapping of Implicit Operator Knowledge and Machine-Derived Data	163
<i>Konstantin Konrad, Michael Hoffmeister, Matthias Zapp, Alexander Verl, and Johannes Busse</i>	
Accelerated Ramp-Up of Assembly Systems through Self-learning	175
<i>Robert Oates, Daniele Scrimieri, and Svetan Ratchev</i>	

Process Selecting and Modelling Techniques

A Methodology for Assessing the Cost Effectiveness of Assembly Processes	183
<i>Kwabena Agyapong-Kodua and Svetan Ratchev</i>	
Model Based Planning of Complex Micro-manufacturing Strategies	191
<i>Daniel Zdebski, Shukri Afazov, Svetan Ratchev, and Joel Segal</i>	
Towards an European Approach for Characterisation of Multimaterial Micromanufacturing Process Capabilities	200
<i>Markus Dickerhof, Sabino Azcarate, and Attila Temun</i>	
Author Index	211
