Glossary	v
1 Introduction	1
2 Theoretical Considerations	5
2.1 Energies of a Ferromagnet	5
2.1.1 Exchange Energy	6
2.1.2 Zeeman Energy	7
2.1.3 Demagnetizing Energy	7
2.1.4 Anisotropy Energy	9
2.2 Magneto-Dynamics	12
2.2.1 Equation of motion	12
2.3 Ferromagnetic resonance	15
2.3.1 In-plane configuration	17
2.3.2 Perpendicular configuration	20
2.4 Damping	20
2.4.1 Intrinsic damping	20
2.4.1.1 Eddy Currents	21
2.4.1.2 Itinerant electron mechanism	22
2.4.1.3 Slow relaxation mechanism	26
2.4.2 Extrinsic damping	30
2.4.2.1 Two magnon scattering	31
2.4.2.2 Local resonances	34
3 Experimental Technique - FMR	35
3.1 Room Temperature FMR	36
3.1.1 Microwave source	36
3.1.2 Waveguide	38
3.1.3 Detection	40
3.2 Temperature dependent FMR	41
3.2.1 Cooling Unit	41
3.2.2 HF System	43
3.2.3 Sample Rotation	44
3.3 FMR spectra	45

4	Sample Description	49
4.1	Rare Earth Doped $\text{Ni}_{80}\text{Fe}_{20}$	49
4.1.1	Sample Growth	49
4.1.2	Coupling in the intermetallic alloy	49
4.2	Ferromagnetic Semiconductor $(\text{Ga},\text{Mn})\text{As}$	51
4.2.1	Sample Growth and post growth annealing	52
4.2.2	Ferromagnetism in $(\text{Ga},\text{Mn})\text{As}$	55
4.2.3	Magnetocrystalline anisotropy	59
5	Rare earth doped NiFe films	65
5.1	Static Properties	66
5.2	Dynamic Characterization	70
5.2.1	Room temperature FMR	70
5.2.2	Temperature dependent FMR measurements	81
5.3	Parallel doping with Gd and Ho	84
6	$(\text{Ga},\text{Mn})\text{As}$	89
6.1	Static characterization of the samples	89
6.1.1	As-grown sample	89
6.1.2	Annealed sample	93
6.1.3	Determination of the spinwave parameter B	97
6.2	Dynamical Properties	102
6.2.1	Magnetic Anisotropy	103
6.2.2	Magnetic relaxation	116
7	Summary	125
	Appendix A - Damping due to fluctuating fields	131
	Appendix B - Analysis of the time domain data	133
	Bibliography	149
