

Contents

1	Wind Energy Today	1
1.1	Status	1
1.2	Advantages and Disadvantages of Wind Energy Systems	3
1.2.1	Advantages	3
1.2.2	Disadvantages	3
1.3	Different Types of Wind Energy Converters: An Overview	4
	Bibliography	6
2	Wind: Origin and Local Effects	7
2.1	Origin and Global Availability	7
2.2	Local Effects on Wind Flow	8
2.3	Attractive Locations for Wind Energy	9
2.4	Local Effects on Wind Flow	10
2.4.1	Roughness Length and Wind Shear	10
2.4.2	Wind Speed Variability	11
2.4.3	Turbulence	12
2.4.4	Obstacles to Wind Flow	12
2.4.5	The Wind Wake and Park Effect	13
2.4.6	The Tunnel Effect and Hill Effect	14
2.5	Selecting a Turbine Site	15
	Bibliography	16
3	Physics of Wind Energy	17
3.1	Energy Content in Wind	17
3.2	Energy Conversion at the Blade	19
3.3	Power Coefficients and Principles of Design	22
3.3.1	Coefficient of Power c_p and Betz' Law	22
3.3.2	Tip Speed Ratio	22
3.3.3	Power Efficiency	23
3.3.4	Principles of Design	24

3.4	Wind Variations	25
3.4.1	Wind Shear with Height	25
3.4.2	Influence of Weibull Distribution	27
	Bibliography	29
4	Components of a Wind Energy Converter	31
4.1	Rotor Blades	31
4.2	Gearboxes	33
4.3	Generators	34
4.3.1	Generating Voltage	35
4.3.2	Generator Cooling System	35
4.3.3	Generator Rotational Speed	35
4.3.4	Two Speed, Pole Changing Generators	37
4.4	Towers	37
4.5	Miscellaneous Components	38
5	Design Considerations	45
5.1	Rotor Area of Turbines	45
5.1.1	Reasons for Choosing Large Turbines	45
5.1.2	Reasons for Choosing Smaller Turbines	45
5.2	Number of Blades	46
5.3	Horizontal or Vertical Axis Turbine	47
5.4	Upwind or Downwind Turbine	50
5.5	Load Considerations for Turbine Selection	51
5.6	Wind Turbines: With or without Gearbox	52
5.7	Requirement of Grid, Synchronous or Asynchronous Generators	54
5.8	Issue of Noise and its Control	58
	Bibliography	60
6	Operation and Control of Wind Energy Converters	61
6.1	Power Curve and Capacity Factor	61
6.1.1	Power Curve	61
6.1.2	Capacity Factor	63
6.2	Power Control of Wind Turbines	64
6.2.1	Pitch Control	65
6.2.2	Stall Controlled Wind Turbines	67
6.2.3	The Yaw Control	68
6.3	Connection to the Grid	69
6.3.1	Applications of Wind Energy Converters	69
6.3.2	Voltage Requirement	70
6.3.3	Special Aspects of the Connection of Offshore Wind Parks	71
	Bibliography	71

7 Economics and Policy Issues	73
7.1 Cost of Wind Turbines	73
7.1.1 Initial Cost of Wind Turbine	73
7.1.2 Operation and Maintenance Costs for Wind Turbines . . .	74
7.2 Electrical Tariffs	75
7.2.1 Feed-in Tariff	75
7.2.2 Net Metering System	76
7.2.3 Time Dependent Rates	77
7.2.4 Quota System and Renewable Purchase Obligation	77
7.2.5 Production Tax Incentives/Investment Incentives	78
7.2.6 Generation based Incentives	79
7.3 Mechanisms to Support Funding	79
7.3.1 Capacity Credit	79
7.3.2 Environmental Credit and Clear Development Mechanism	80
7.3.3 Tax Benefits	80
7.4 Wind Energy Economics	81
7.4.1 Financial Analysis: A Case Study for India	81
7.4.2 Financing of a Wind Park: Description of a Case in Germany	83
7.5 Wind Turbines after Operational Life	83
Bibliography	84
8 Life Cycle Assessment of a Wind Farm	85
8.1 Basic Targets and Approach	85
8.2 Case Study of Alpha Ventus	86
8.2.1 Goal and Scope Definition	86
8.2.2 Inventory Analysis	86
8.2.3 Impact Assessment	87
8.2.4 Interpretation and Results	89
8.3 Payback Time	91
Bibliography	92
9 Outlook	93
Bibliography	94
About the Authors	95
Notes	97
Glossary	99
Index	101
