Contents

1 Climate Series 1
1.1 Weather Stations 1
1.2 Temperature Series 2
1.3 Precipitation Series 10

2 Trend and Season 11
2.1 Trend Polynomials. Moving Averages 11
2.2 Temperature: Last Two Centuries—Last Twenty Years 14
2.3 Precipitation 19
2.4 Historical Temperature Variations 21
2.5 Monthly Values 21
2.6 Oscillation in Climate Series 24

3 Correlation: From Yearly to Daily Data 29
3.1 Auto-Correlation Coefficient 29
3.2 Multivariate Analysis of Correlation Matrices 33
3.3 Auto-Correlation Function 39
3.4 Prediction of Above-Average Values 44
3.5 Folk Sayings 46

4 Model and Prediction: Yearly Data 49
4.1 Differences, Prediction, Summation 49
4.2 ARIMA Method for Yearly Temperature Means 53
4.3 ARIMA-Residuals: Auto-Correlation, GARCH Model 56
4.4 Yearly Precipitation Amounts 61

Bibliografische Informationen

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

5 Model and Prediction: Monthly Data 67
5.1 Trend+ARMA Method for Monthly Temperature Means 67
5.2 Comparisons with Moving Averages and Lag-12 Differences . . . 72
5.3 Residual Analysis: Auto-Correlation 74
5.4 Monthly Precipitation Amounts 75

6 Analysis of Daily Data 77
6.1 Series of Daily Climate Records 77
6.2 Temperature: Cross-Correlation Between Stations 78
6.3 Precipitation: Logistic Regression 82
6.4 Precipitation: Categorical Data Analysis 88
6.5 Heavy Precipitation: Event-Time Analysis 94

7 Spectral Analysis 103
7.1 Periodogram, Raw and Smoothed 103
7.2 Statistical Bounds 104
7.3 Yearly and Winter Temperature, Detrended 108
7.4 Precipitation. Summary 110
7.5 Wavelet Analysis 113

8 Complements 121
8.1 Annual Data: Growing Polynomials 121
8.2 Annual Data: ARIMA *l*-Years Forecast 126
8.3 Monthly Data: Sin-/Cos-Modeling 133
8.4 Further Topics 136

Appendix A: Excerpt from Climate Data Sets 141

Appendix B: Some Aspects of Time Series 149

Appendix C: Categorical Data Analysis 163
