List of figures	V
List of tables	VII
1 Introduction.....	1
1.1 Research topic	1
1.2 Conceptual design according to the philosophy of science.....	6
1.3 Outline of the thesis	9
2 Basics of behavioral research on learning in manufacturing and production management.....	11
2.1 Integration of human behavior and operations management	11
2.2 Factors controlling learning in manufacturing and production management...16	
2.2.1 Defining learning and knowledge	17
2.2.2 Learning on the manufacturing shop floor	21
2.2.3 Learning in production planning	27
2.3 Experimental research methodology.....	32
2.3.1 Experimental studies as an appropriate research methodology to study behavioral operations management.....	32
2.3.2 Aim and scope of experiments	33
2.3.3 Quality of controlled laboratory experiments	35
2.3.4 Laboratory experimental designs and control techniques	37
3 Shop floor performance effects of knowledge transfer and performance feedback.43	
3.1 Introduction	43
3.2 Theoretical basis and hypotheses development	46
3.2.1 Learning automatically.....	46
3.2.2 Learning from knowledge transfer.....	47
3.2.3 Learning from performance feedback	48
3.2.4 Hypotheses on the performance effects of different types of knowledge transfer.....	50

3.3	Design of laboratory experimental studies.....	57
3.3.1	Experimental design of the first study.....	59
3.3.2	Experimental design of the second study.....	61
3.4	Results and discussion.....	63
3.4.1	Descriptive statistics.....	63
3.4.2	Discussion of results.....	67
3.5	Conclusions.....	74
4	Comparison of the shop floor performance effects of explicit knowledge creation by individuals and groups.....	76
4.1	Introduction.....	76
4.2	Theoretical basis of combined explicit knowledge creation, reflection, and feedback on manufacturing performance.....	79
4.2.1	Explicit knowledge creation by individuals.....	79
4.2.2	Explicit knowledge creation by groups.....	80
4.2.3	Effects on manufacturing performance.....	82
4.2.3.1	Task performance by individuals.....	82
4.2.3.2	Task performance by self-managing teams.....	84
4.3	Design of the laboratory experimental study.....	87
4.4	Results and discussion.....	92
4.5	Conclusions.....	101
5	Learning and performance effects of individual factors and different feedback mechanisms in production planning.....	104
5.1	Introduction.....	104
5.2	Theoretical foundation.....	104
5.2.1	Learning complex decision making tasks.....	105
5.2.2	Influence of individual factors.....	107
5.2.3	Influence of feedback mechanisms.....	110
5.3	Design of the laboratory experimental study.....	114
5.4	Results and discussion.....	118

5.4.1 Descriptive statistics.....	118
5.4.2 Hypotheses testing.....	122
5.5 Conclusions.....	131
6 Summary and conclusion.....	133
6.1 Learning on the manufacturing shop floor.....	133
6.2 Learning in complex production planning.....	137
7 References.....	141
8 Appendix.....	179
Appendix A.1: Questionnaire	179
Appendix A.2: Circuit diagram	180
Appendix A.3: Legend.....	180
Appendix A.4: Manual	181
Appendix A.5: Feedback report.....	183
Appendix B.1: Questionnaire	184
Appendix B.2: Circuit diagram of session 1	185
Appendix B.3: Circuit diagram of session 2.....	185
Appendix B.4: Circuit diagram of session 3.....	186
Appendix B.5: Circuit diagram of session 4.....	186
Appendix B.6: Legend.....	187
Appendix B.7: Individual feedback report.....	188
Appendix B.8: Team feedback report.....	189
Appendix C.1: Questionnaire	190
Appendix C.2: Financial feedback report.....	192
Appendix C.3: Non-financial feedback report.....	193
Appendix C.4: Cost efficiency feedback report.....	194
Appendix C.5: Production planning task.....	195
Appendix C.6: General task instructions	196
Appendix C.7: Continuous improvement questionnaire.....	197
Appendix C.8: Operational Research model	198

Appendix C.9: GAMS code.....200
