

Contents

1 Introduction

K. Kian Ang, Hisham M. Mehanna

Clinical Assessment and Imaging Evaluation of Recurrence	1
Principles of the Assessment of Potential Recurrence ...	1
History and Examination	1
Previous Treatment Records	2
Imaging	2
Examination under Anesthetic	4
Needle or Open Biopsy	4

2 Molecular Biology of Recurrence

Kevin J. Harrington

Introduction	7
The Biology of Treatment Resistance	7
Activation of Alternative Signaling Pathways	12
Biological Processes Involved in Metastasis	12
Conclusions	14

3 Imaging Modalities for Head and Neck Cancer Recurrence

Oludolapo O. Adesanya

Therapy-related Changes in the Head and Neck Region	17
Imaging Modalities for Detection of Recurrence	38
Imaging for Recurrence at Specific Sites	47

4 Concurrent Chemotherapy and Re-irradiation for Recurrent Head and Neck Cancer

Kevin S. Choe, Joseph Kamel Salama, Ezra E.W. Cohen

Introduction	67
Reasons for Tumor Recurrence Following Definitive Therapy	67
Regimens for Concurrent Chemotherapy with Re-irradiation	68
Evidence for Concurrent Chemotherapy with Re-irradiation	68
Brachytherapy for Recurrent Head and Neck Cancer ..	70
Patient Selection and Prognostic Factors	70
Simulation and Planning for Re-irradiation	72
Treatment Volume Definition	72
Beam Arrangement	73
Advances in Delivery of Radiation	73
New Approaches to CRRT	74
Conclusion	75

5 Systemic Therapy in the Treatment of Recurrent and Metastatic Head and Neck Carcinoma

Lisa Licitra, Jan B. Vermorken, Pol Specenier, Augusto Caraceni

Patient's Clinical Profile and Assessment	81
Clinical Decision Making	82
Medical Treatment	83
Special Issues in End-of-Life Supportive Care	89

6 Principles and Concepts of Reconstruction in the Recurrent Setting

Ralph Gilbert

Introduction	95
Issues in Surgical Approach—Impact of Previous Treatment	95
Management of the Vessel-depleted Neck	96
Site-specific Defect Considerations	96
Conclusion	99

7 Patient Selection for Treatment

Vinidh Paleri, Charles G. Kelly

Introduction	101
Assessment of the Recurrent Cancer	101
Factors Involved in Treatment Selection	102
Involving the Patient in the Decision-making Process	105
Treatment Options	107

8 Recurrent Laryngeal Cancer

Marc A. Cohen, Ramez Nassif, David P. Goldstein, Ralph Gilbert, Patrick Gullane

Introduction	113
Epidemiology	113
Diagnosis of Recurrent Laryngeal Cancer	114
Staging of Recurrent Laryngeal Cancer	114
Principles of Management	115
Surgical Management of Recurrent Disease	116

9 Management of Recurrent Hypopharyngeal Cancer

Jarrod Homer, Nick Slevin, Priyamal Silva

Incidence and Patterns of Recurrence in Hypopharyngeal Cancer	127
Detection of Recurrent Disease	127
Principles of Management	128
Surgical Techniques of Salvage Pharyngolaryngectomy	129
Re-irradiation for Recurrent Hypopharyngeal Cancer	131

10 Carcinoma of the Oral Cavity <i>Alexander D. Ravidis, Hisham M. Mehanna, K. Kian Ang</i>		Recurrent Pleomorphic Adenoma	221
Introduction	133	17 Recurrent Melanotic and Nonmelanotic Skin Cancer <i>Michael Veness, Gary Morgan, Julie Howle</i>	
Posttreatment Surveillance	133	Epidemiology	229
Diagnosis of Recurrence	134	Prognostic Factors	229
Principles of Management	134	Patterns of Recurrence	230
Surgical Approaches and Techniques	135	Primary Lesion Treatment	230
Outcomes	139	Regional Treatment	232
11 Carcinoma of the Oropharynx <i>Mark E. Zafereo, Beth M. Beadle, Randal S. Weber</i>		Recurrence	233
Epidemiology	145	Principles of Management	235
Prognostic Factors	145	18 Prognosis of Recurrent Head and Neck Cancer <i>R.J. Baatenburg de Jong, M.P. van der Schroeff</i>	
Investigations	146	Introduction	245
Principles of Management	147	Prognostic Factors	245
Outcomes	153	Individualized Prognosis in Recurrent HNSCC	249
12 Management of Nodal Recurrence <i>Hisham M. Mehanna, Miroslav Tedla, K. Kian Ang, Christopher M. Nutting</i>		Routine Follow-up and Recurrent Disease	250
Introduction	163	Conclusion	251
Incidence and Distribution of Nodal Recurrence	163	19 Rehabilitation after Treatment for Recurrent Head and Neck Cancer <i>Alison Perry, Julia Maclean</i>	
Evaluation of Nodal Recurrence	163	Introduction	253
Management	165	A Supportive Care Team	253
Special Considerations	167	Rehabilitation Needs of Patients with Recurrent Cancer	253
Outcomes	170	Symptoms and Their Management	255
Complication Rates	171	Supportive Care Services; "Surviving Survivorship" ..	259
13 Carcinoma of the Nasopharynx <i>William I. Wei, Lai Wan Dora Kwong</i>		Exemplary Case Studies	259
Epidemiology	175	20 Psychosocial Aspects of Recurrent Head and Neck Cancer <i>Marinella P.J. Offerman, Maarten F. de Boer, R.J. Baatenburg de Jong, Jean F.A. Pruyn</i>	
Clinical Features	176	Introduction	265
Investigations	176	Studies on Psychosocial Response after Head and Neck Cancer Recurrence	265
Principles of Management	176	Studies on Fear of Recurrence	267
Surgical Techniques	178	Current Research	267
Radiation Techniques	181	The Doctor's Message: "The Cancer is Back"	268
Chemotherapy	187	After the News of Recurrence ... How to Go On?	270
Targeted Therapy	187	Patients' Suggestions for the Professional	271
Immunotherapy	187	Summary	272
14 Skull Base and Sinonasal Cancer <i>Claudio R. Cernea, Lenine Garcia Brandão, Eduardo Weltman</i>		Concluding Thoughts	272
Introduction	191	21 Palliative and Psychosocial Issues in Advanced Head and Neck Cancer <i>Dan Munday, Cherith J. Semple</i>	
Prevalence and Prognostic Factors	191	Introduction	277
Clinical Assessment and Work-up	191	Pain Control in Advanced Head and Neck Cancer	277
Principles of Management	192	Oral Problems in Head and Neck Cancer	279
Therapy Techniques	193	Swallowing and Nutrition	281
Chemotherapy	195	Management of Complex Wounds	283
Outcomes	195	Psychosocial Issues	286
15 Recurrent Differentiated Thyroid Cancer <i>N. Gopalakrishna Iyer, Ashok R. Shaha, R. Michael Tuttle</i>		Management of the Last Days of Life	288
Introduction	199	Conclusion	290
Differentiated Thyroid Cancer	199	Subject Index	295
Principles of Management	203		
Conclusion	207		
16 Recurrent Salivary Gland Carcinoma and Pleomorphic Adenoma <i>Alfonsus J.M. Balm, Jan Paul de Boer, Coen R.N. Rasch</i>			
Salivary Gland Carcinoma	211
