Table of Contents

Percolation since Saint-Flour ..... **ix**
Geoffrey Grimmett and Harry Kesten

Aspects of First Passage Percolation **1**
Harry Kesten

1. Introduction 2
2. Kingman's subadditive ergodic theorem and the time constant 10
3. The asymptotic shape of B(t) and $\hat{B}(t)$ 30
4. Some inequalities 44
5. The rate of convergence to the time constant 56
6. Properties of the time constant μ and the limit set B_0 94
7. The rate of convergence to the time constant revisited: the case $\mu = 0$ (and $d = 2$) 107
8. Asymptotics for large dimensions 115
9. Maximal flows and other open problems 125

Index 139

Percolation and Disordered Systems **141**
Geoffrey Grimmett

Preface 143
1. Introductory Remarks 147
2. Notation and Definitions 151
3. Phase Transition 156
4. Inequalities for Critical Probabilities 159
5. Correlation Inequalities 169
6. Subcritical Percolation 176
7. Supercritical Percolation 191
8. Critical Percolation 212
9. Percolation in Two Dimensions 224
10. Random Walks in Random Labyrinths 232
11. Fractal Percolation 251
12. Ising and Potts Models 259
13. Random-Cluster Models 263
