

# Contents

<b>Introduction</b>	v
<b>1 Cosmic Rays: Prologue</b>	1
1.1 The Beginning: A Charged Body Loses Spontaneously Its Charge	1
1.2 Wilson and the Cloud Chamber	4
1.3 The Studies on Air Ionization	6
1.4 The Wilson Cloud Chamber	7
1.5 The Charge Loss by a Charged Body is Due to the Air Ionization	21
1.6 The Measurements with Height	23
1.7 Domenico Pacini: An Often Forgotten Contribution	27
References	29
<b>2 The Discovery: Victor F. Hess and the Balloon Ascents</b>	33
2.1 Hess and the Balloon Ascents	33
2.2 The Wien Congress and the Official Birth of Cosmic Rays	39
2.3 The First Confirmations	40
2.4 However a Great Confusion and Scepticism Survive	41
References	43
<b>3 The Confirmation: Millikan and the “Birth Cry” of Created Atoms</b>	45
3.1 The Research Moves to USA: Millikan Provides the First Unambiguous Confirmations	45
3.2 The Theory of Atom-Building	55
References	58
<b>4 A Turn: Things are not as they are Assumed to be</b>	61
4.1 The Current Belief is that Cosmic Rays are Gamma Rays	61
4.2 Dimitrij V. Skobelzyn: For the First Time a Cloud Chamber “Sees” a Cosmic Ray	61

4.3	The Geiger–Müller Counter and the Coincidence Method Step In .....	63
4.4	What about the “Birth-Cry”? .....	71
	References .....	72
<b>5</b>	<b>The Earth’s Magnetic Field and the Geomagnetic Effects</b> .....	75
5.1	The Earth’s Magnetic Field .....	75
5.2	Stoermer and the Aurora Borealis .....	78
5.3	The Theory for Cosmic Rays .....	82
5.4	The Latitude Effect .....	85
5.5	The East–West Effect .....	95
5.6	The Longitude Effect .....	97
5.7	And Eventually the Sun Steps in the Stage .....	99
	References .....	101
<b>6</b>	<b>The Positive Electron (Positron)</b> .....	105
6.1	1932, Annus Mirabilis for Nuclear Physics: A Digression Useful for a Better Understanding of What Follows .....	105
6.2	The Discovery of the Positive Electron .....	112
6.3	A Theoretical Digression: Dirac and the Negative Energy States .....	118
6.4	The Confirmation and the Official Birth of Antiparticles .....	120
	References .....	124
<b>7</b>	<b>Electromagnetic Showers</b> .....	127
7.1	Introduction .....	127
7.2	The Rossi Curve .....	129
7.3	The Interpretation of Showers and the Development of Quantum Electrodynamics .....	132
7.4	Heisenberg’s Explosion Theory .....	140
	References .....	141
<b>8</b>	<b>The Muon</b> .....	145
8.1	Introduction .....	145
8.2	Something Does Not Fit .....	146
8.3	More on the Quantum Theory and the Energy Loss by Fast Particles .....	147
8.4	The Street and Stevenson Experiment .....	151
8.5	Neddermeyer and Anderson Measurements .....	152
8.6	The Theoretical Prediction of the Existence of Mesons .....	158
8.7	The Experimental Discovery of the Muon Decay .....	160
8.8	Which Are the Products of Muon Decay? .....	167
8.9	The Leptons .....	169
	References .....	172

<b>9</b>	<b>The Discovery of the <math>\pi</math> Meson, the Nuclear Emulsions, and the First “Strange” Particles</b>	175
9.1	Introduction. The mu Mesons Are Really Peculiar	175
9.2	A New Powerful Investigation Method: Nuclear Emulsions	180
9.3	The Discovery of the $\pi$ Meson	184
9.4	The Stars	189
9.5	The Neutral Mesons	192
9.6	The Lambda Meson	193
9.7	The New Particles	193
	References	200
<b>10</b>	<b>The Extended Showers</b>	205
10.1	Introduction	205
10.2	The Discovery of Extended Atmospheric Showers, EAS	207
10.3	The Building of Large Detectors for the Extended Showers.	210
10.4	The Atmosphere May Be used as a Detector. Why Not?	217
10.5	The Auger Observatory	221
10.6	Is There a Limit to the Energy of the Primary Cosmic Ray?	223
10.7	What About the Future?	224
	References	225
<b>11</b>	<b>The Neutrino or, More Precisely, the Neutrinos: Elusive and Weird Particles, Able to Arrive from Very Far Away</b>	229
11.1	Introduction	229
11.2	The Neutrino Detection	230
11.3	The Solar Neutrinos	233
11.4	Atmospheric Neutrinos and Their Detection	241
11.5	The Solution of the Solar Neutrinos Mystery	242
11.6	Back to Solar Neutrinos	246
11.7	The Neutrinos’ Oscillation and Its Implications	247
11.8	Neutrinos from Stars: The Birth of Neutrino Astronomy	248
	References	250
<b>12</b>	<b>Which are the Primary Cosmic Rays?</b>	253
12.1	Introduction	253
12.2	A Short Digression on Space Researches	254
12.3	The Solar Wind, The Magnetic Field, and The Heliosphere	255
12.4	More on Forbush Decreases	260
12.5	The Van Allen Belts	263
12.6	The Research on the Nature of Primary Cosmic Rays	266
12.7	The Energy Spectrum	274
12.8	Gamma Rays Appeared and the Gamma-Astronomy was Born	279
12.9	Present Vision of Cosmic Radiation	282
	References	284

<b>13 The Origin of Cosmic Rays</b> .....	291
13.1 Introduction .....	291
13.2 A Brief Summary of Some of the First Hypotheses on the Origin of Cosmic Rays .....	292
13.3 The Fermi Theory .....	295
13.4 Supernovae are Resumed .....	298
13.5 Where Do Cosmic Rays Come From? .....	299
13.6 The Theory of the Origin from Supernovae Explosions.....	303
13.7 X and Gamma Rays from Space Help Discover the Origin of Cosmic Rays.....	307
13.8 What about Ultra-Energetic Rays? .....	309
